Rights and the Common Good: The Communitarian Perspective

Amital Etzioni. Ed. 1995. New York: St. Martin's Press. 293 pp.

Robert C. Schehr,
University of Illinois – Springfield

Rights and the Common Good is comprised of five parts dedicated to articulation of the "Communitarian Paradigm," "Policy Applications," "Moral Infrastructure," "Shoring Up Communities," and guidance "Toward a Responsive Community." There are thirty separate entries comprising some of the most notable contributors to the communitarian literature (e.g., Robert Bellah, Christopher Lasch, Benjamin Barber, Robert Dahl). This review will focus on the contribution of Etzioni, then attempt to address in aggregate form specific themes emerging in the separate parts.

Etzioni inaugurates *Rights and the Common Good* with his "Introduction" and "Preamble" to the "Responsive Communitarian Platform." The "Introduction" is noteworthy on two counts, first, it reaffirms the communitarian commitment to "rights with responsibilities" by calling for a moratorium on new rights, what Etzioni refers to as "limiting adjustments." Etzioni contends that this is in keeping with a communitarian commitment to "balancing social forces," (that is balancing liberalism with republicanism), and the moral repudiation of individuals who take from the community without giving back. The second theme projected in the "Introduction" addresses virtue. Etzioni contends that communitarians seek the realization of shared virtues as a foundation from which to establish localized notions of the "good." Neither concept is defined.

The "Preamble" is more expansive. In it Etzioni makes a case for a society constituted by "a regime of rights" where attention is directed at cultivating greater responsibility between public and private, and the individual and collective spheres. He argues for participatory democracy, not majoritarianism, where policy decisions emerge from informed discourse constituted by shared values. The communitarian directive on moral education comprises the middle third of the "Preamble." The family (another amorphous concept in Etzioni's presentation) occupies center stage as the progenitor of moral guidance, responsible for the transmission of "moral education and character formation." It would be naive to think that Etzioni's configuration of character is not imbued with a value to his liking, but he refrains from overtly tipping his hand.

Debating Human Rights in China Marina Svensson, 2002 Drawing on little known sources Marina Svensson argues that the concept of human rights was invoked by the Chinese people well before the adoption of the Universal Declaration of Human Rights in 1948 and it has continued to have strong appeal after 1949 both in Taiwan and on the mainland These largely forgotten debates provide important perspectives on and contrasts to the official PRC line The author gives particular attention to the issues of power and agency in describing the widely divergent views of official spokespersons establishment intellectuals and dissidents Until recently the PRC dismissed human rights as a bourgeois slogan yet the globalization of human rights and the growing importance of the issue in bilateral and multilateral relations has grown Thus the regime has been forced to embrace or rather appropriate the language of human rights an appropriation that continues to be vigorously challenged by dissidents at home and abroad

Reputation and Defamation Lawrence McNamara, 2007-12-13 The proposition that the tort of defamation protects reputation has long been axiomatic in the law The axiom's endurance is surprising it has long been observed that the law is riddled with inconsistencies and moreover the courts and the scholarly literature have rarely discussed exactly what reputation is and how judgments about reputation are made Reputation and Defamation develops a theory of reputation and uses it to analyse evaluate and propose a revision of the law It is the first book to present a comprehensive study of what reputation is how it functions and how it is and should be protected under the law Reputation it argues is best understood in terms of the moral judgments a community makes about its members Viewed in this way it becomes apparent contrary to the legal orthodoxy that defamation law did not really aim and function to protect reputation until the early nineteenth century Unfortunately the modern common law has not paid sufficient attention to either the nature of reputation or the historical relationship between reputation and defamation Consequently the tests for what is defamatory do not always protect reputation adequately or appropriately The shun and avoid and ridicule tests have developed so that a publication may be actionable even where it does not tend to prompt a negative moral judgment of the plaintiff These tests should be discarded The principal lowering the estimation test however is for the most part appropriately geared to the protection of reputation Importantly the scope of legal protection has been limited Words will only be actionable if they tend to make right thinking people think the less of the plaintiff The values of Christian tradition and Victorian moralism which became embedded in the concept of the right thinking person are problematic in the current era of moral diversity A revised legal framework is proposed It retains the principal test but rethinks how and why different criteria for moral judgment should or should not be recognised when courts determine whether an attack on reputation will be actionable as defamation It is argued that the right thinking person

should be associated with an inclusive liberal premise of equal moral worth and a shared commitment to moral diversity The proposed framework demands that when courts recognise values at odds with that premise then such recognition must be justified on sound and expressly stated ethical grounds That demand serves to protect reputation appropriately and effectively in an age of moral diversity **Collective Sustainable Consumption** Anna Horodecka, Alina

Szypulewska-Porczyńska, 2024-06-21 In the face of climate change and resulting environmental and social crises sustainable consumption has become a widely discussed issue and a key plank of the UN's Sustainable Development Goals SDGs The majority of the sustainable consumption research uses the SDG framework but this only serves to reinforce an individualistic efficiency based approach and it does not sufficiently cover the specific situation of transition economies In contrast this volume promotes a collective approach to sustainable consumption and combines general theoretical issues with empirical examples from the Polish economy The first part of the book presents a theoretical approach to collective consumption which has the core concepts of justice and human nature at its heart This approach emphasises the role of collective rationality and categorises aspects of sustainable consumption as a common and public good The second part investigates diversified aspects of sustainability including socio economic inequalities as barriers to sustainable consumption consumer sovereignty in the context of current legal regulations and the impact on employees of changes to the types and conditions of work It also examines the sharing economy and the legal conditions of its development The third part adopts a political perspective focusing on the state policies enhancing the role of investment in public goods analyses photovoltaic programmes which promote prosumption and indicates challenges to sustainability faced by many countries such as the energy crisis sustainable finance and cooperative platforms This book will be of great interest to researchers and scholars interested in sustainability and consumption issues in economics management law public administration and political science **Understanding**
