Human Rights in Language and STEM Education Zehlia Babaci-Wilhite, 2016-03-22 This volume explores the challenges of teaching and learning Science Technology Engineering and Mathematics STEM subjects in local languages and local contexts in a range of countries around the world Many countries around the world including African countries have been largely excluded from the transformation that is going on in STEM pedagogy in the USA where the emphasis is on the importance of language choice and the development of English Language Learner ELL STEM subjects in many parts of the world have been taught in a global language mainly English rather than using a local language and local curriculum This creates pedagogical challenges to the teaching of STEM

The contributions to this book review evidence and arguments for the teaching of STEM subjects in local languages and several chapters make this case that this should be considered a human right both in national educational programs and in development aid. Working across disciplines and domains has the potential to lead to new understanding and the removal of barriers to progress with the ultimate goal of creating solutions to persistent problems in education. Cross disciplinary work in science language and literacy has shown much promise and demonstrated the importance of developing language along with disciplinary knowledge. This volume provides a deep dive into this topic with articles by several scholars in the field of language in STEM. Jaqueline Barber, Director of the Learning Design Group at the Lawrence Hall of Science, University of California Berkeley, USA. In an increasingly technological world, STEM Education has become a priority on national agendas and in educational institutions. Meaningful access to STEM education can enable or hinder young people from gaining entry into the world of work. It is against this backdrop that the edited collection *Human Rights and Language in STEM Education* needs to be welcomed. The various chapters tackle the big questions of access and many others. This edited collection is required reading for all those working in STEM and for policy makers who tend to see language and STEM as binaries rather than as interdependent. Zubeida Desai, Professor and Dean of Education, University of the Western Cape, South Africa. This volume by researchers from 10 countries provides a thought and action provoking multidimensional analysis of issues on the dignity of the use of STEM subjects in local education in the perspective of human rights. This book is especially recommended to researchers and education policy makers in such areas as STEM Educational Theory and Praxis, Human Rights, Future sustainable Development, Science and Technology Literacy. May it inspire similar volumes in today's politically ebullient world. Francisco Gomes de Matos, Professor Emeritus of Linguistics, human linguistic rights scholar, Federal University of Pernambuco, Recife, Brazil.

After Civil Rights John D. Skrentny, 2015-11-24. A provocative new approach to race in the workplace. What role should racial difference play in the American workplace? As a nation we rely on civil rights law to address this question and the monumental Civil Rights Act of 1964 seemingly answered it: race must not be a factor in workplace decisions. In *After Civil Rights*, John Skrentny contends that after decades of mass immigration, many employers, Democratic and Republican political leaders and advocates have adopted a new strategy to manage race and work. Race is now relevant not only in negative cases of discrimination but in more positive ways as well. In today's workplace, employers routinely practice racial realism where they view race as real as a job qualification. Many believe employee racial differences and sometimes immigrant status correspond to unique abilities or evoke desirable reactions from clients or citizens. They also see racial diversity as a way to increase workplace dynamism. The problem is that when employers see race as useful for organizational effectiveness, they are often in violation of civil rights law. *After Civil Rights* examines this emerging strategy in a wide range of employment situations including the low skilled sector, professional and white collar jobs, and entertainment and media. In this important book, Skrentny urges us to acknowledge the racial realism already occurring and lays out a series

of reforms that if enacted would bring the law and lived experience more in line yet still remain respectful of the need to protect the civil rights of all workers

Young Children in the World and Their Rights Adrijana Višnjić-Jevtić, Alicja R. Sadownik, Ingrid Engdahl, 2021-04-20 This book provides different perspectives on the concept of children's rights including policy educational and children's perspectives It examines how the crucial ideas of the Convention on the Rights of the Child are respected and implemented in 14 countries in five regions of the world It looks at early childhood education children's participatory rights and at how these rights are promoted and guaranteed in different countries It explores the professional practice of education and its complexities challenges and dilemmas as well as the role of play and of listening and participation The book advocates children's rights today arguing for its vital importance in the best interests of the children In doing so it furthers the understanding of children's rights and spreads knowledge about the Convention as a means of celebrating its 30th anniversary The UN Convention on the Rights of the Child UNCRC comprises the potential to change the lives of children to the very best It may exalt children from the position of marginalized citizens to the centre of policies all over the world Even though the concept of children's rights is omnipresent the respect for children's rights must be discussed While the Convention brings the new perspective of children as citizens to the world there are still challenges in its application The book interrogates challenges in understanding and applying children rights and offers possible answers to these challenges The ratification process itself does not guarantee that children's rights are respected While all adults should take responsibility for implementing the UNCRC in everyday life Early Childhood Education should give opportunities for children to learn and live their rights
