Rip Off:

The Great American Rip-Off Susan M. Finley, 2008 This book gives the reader a look at the complicated U S health care system through the eyes of a consumer It explores two key questions Why with all of the resources that have been devoted to solving the health care crisis does the situation continue to deteriorate And what exactly could be done differently this time to turn the situation around The author examines obstacles that have stood in the way of health care reform in the past including politics government red tape profit driven providers moneyed lobbyists and special interest groups and even our own consumer entitlement mentality and challenges the reader to envision a scenario in which innovation in health care might be possible The author argues that consumers are the key to forward progress on health care we ll only see consumer driven solutions when enough people demand them This book is a challenge to consumers to speak up and hold our leaders in the medical community the government and corporate America accountable for developing solutions that work for us Susan M Finley is a small business owner and marketing strategist She began her career as a bank product manager and in 1994 co founded Michaelson Kelbick Partners Inc MKP a firm specializing in marketing and communications for the financial services industry Over the course of a decade the agency managed marketing communications for some of the largest bank mergers in recent history In 2003 she left MKP now renamed mkp communications inc Her knowledge and understanding of the complicated U S health care financing system comes from a three year research and consulting project started in the hopes of serving as a catalyst for consumer driven changes in health care She lives in North Carolina where she and her husband have recently founded Finley and Finley LLC to continue their research on potential avenues for innovation in the health care and financial services industries

The Great Rip-Off in American Education Mel Scarlett, 2012-04-30 This hard hitting critique will serve as a wake up call to university administrators and faculty as well as to the average parent or prospective college student facing ever increasing tuition costs While reports of poor teaching at the elementary and secondary school level have unleashed widespread public outcry for reform little attention has been paid to the quality of teaching in colleges and universities Yet according to the National Commission on Educating Undergraduates in the Research University universities have too often failed and continue to fail their undergraduate populations and the students paying the tuition get in all too many cases less than their money s worth Citing this report and other similar studies experienced university administrator Dr Mel Scarlett criticizes the deficits of the current undergraduate educational system and suggests improvements that would ensure that college students get the education they re paying for Among his suggestions for reform are Renewed emphasis on teaching skills in Ph D programs to ensure that those who do teach have some pedagogical training besides their special expertise The more active role of experienced professors in the teaching of undergraduates to reverse the current trend of using graduate assistants or part time faculty to teach lower level courses Encouraging students active participation in the learning process as opposed to the passive learning model of the lecture

method An adjustment of the university's publish or perish reward system which stresses research and ignores teaching Dr Scarlett lists a total of 20 deadly sins committed by universities against undergraduates and 80 improvements that would help to reform the current inadequate higher educational system The Big Ripoff Timothy P.
