Regional Disparities in the Enlarged European Union Valentina Meliciani, 2015-10-14 The last twenty years have seen an increase in European integration and the emergence of the technological revolution Although tighter integration coupled with technological innovation should facilitate cross regional convergence some European regions have managed to jump ahead while others have been left behind This book examines the regional characteristics that favour growth and analyses the relevance of innovation socio economic and structural factors in shaping regional economic disparities In this book particular attention is devoted to the EU enlargement towards the East to its consequences on Europe's traditional North South divide and to the increasing regional disparities in new member states after the transition It demonstrates the growing importance of innovation and human capital in explaining the increase in income and employment disparities in old EU members particularly after the 2008 financial crisis It also shows that for newcomers regional disparities are essentially linked to socio economic factors as capital regions approach Western

standards while others mainly old industrial regions and peripheral ones lag behind This book integrates theoretical discussion with empirical evidence and will appeal to regional scientists interested in regional inequalities and to policy makers concerned with devising effective strategies to tackle regional disparities in Europe The Economic History of Central, East and South-East Europe Matthias Morys, 2020-12-29 The collapse of communism in Central East and South East Europe CESEE led to great hopes for the region and for Europe A quarter of a century on the picture is mixed in many CESEE countries the transformation process is incomplete and the economic catch up has taken longer than anticipated The current situation has highlighted the need for a better understanding of the long term political and economic implications of the Central East and South East European historical experience This thematically organised text offers a clear and comprehensive guide to the economic history of CESEE from 1800 to the present day Bringing together authors from both East and West the book also draws on the cutting edge research of a new generation of scholars from the CESEE region Presenting a thoroughly modern overview of the history of the region the text will be invaluable to students of economic history and CESEE area studies **A Life Cycle for Clusters?** Kerstin Press, 2006-09-05 rium states but on the development process following an external shock Kerstin Press adopts a new methodological approach She develops a theoretic model of clusters change and adaptation that is based on the N K model of complex systems Kauffman 1993 Taking the existing insight on the dynamics of N K systems propositions on the influence of cluster architecture on adaptability are rived In a second step these propositions are tested by simulations comparing the adaptability of clusters with given differences in their architecture regarding the degree of division of labour on the one and the governance structure on the other hand Both aspects division of labour governance were found to matter for cluster adaptability in previous empirical studies but general causalities for their role in cluster adjustment could not be derived from individual case studies Within the all else held equal perspective adopted in the simulation model one explanation for how and when division of labour and governance matter for cluster adjustment is found While the model faces several limitations these are more to be seen as possible areas for future research The present study opens up new avenues in cluster research Rather than just focussing on emergence or existence clusters are viewed as entities underlying a dynamic development The analysis of their adaptability to external changes constitutes a first important step towards a non deterministic perspective on cluster development
