Controversies in Globalization Peter M. Haas, John A. Hird, 2012-11-30 Debate style readers can be

powerful teaching tools but they are only effective in so far as the readings really speak to one another Without readings in true dialogue the crux of the debate is lost on students the reader fails to add real depth to the course and students are left in the lurch Controversies in Globalization solves this issue by inviting 17 pairs of scholars and practitioners to write specifically for the volume directly addressing current and relevant questions in international relations through concise yes and no pieces on topics related to security political economy the environment public health democracy demography and social issues like gender and ethnicity At the request of reviewers new to this edition are three chapters covering the financial crisis maritime security and international conflict Providing students with necessary context the editors offer introductions that effectively frame the debate and make clear what is at stake both from a theoretical as well as from a practical perspective Concluding discussion questions in each chapter encourage critical thinking and analysis Haas and Hird s edited collection helps readers come to terms with the varying perspectives on globalization and urges critical reflection and the exploration of alternate views

Post-Pandemic Asia Richard Yarrow,2022-09-30 While Thailand s health system has fared relatively well through the COVID 19 pandemic the country s economy faced significant strains and likely a harsher downturn than other economies in Southeast Asia In particular the services sector heavily reliant on international tourism suffered and debt levels worsened substantially during the pandemic Thailand s economy has steadily recovered following the peak of the pandemic in 2020 with greater optimism coming from the growing trade in goods and growing investments from China and Japan The tourism sector has also steadily regained strength since the worst points of the pandemic Despite these recent positive turns Thailand still faces daunting long term economic and societal challenges many of which were exacerbated by the COVID 19 pandemic Household finances appear increasingly stressed and debt levels have risen sharply across the economy It is unlikely that Thailand will be able to return its tourism industry to 2019 conditions for the next several years Meanwhile deteriorating demographics and education enrolments pose serious threats to long term macroeconomic prospects Thailand s population of young people is falling but the country appears to lack momentum in elevating enrolment rates and improving the quality in secondary and tertiary education The agriculture sector remains large with some crop diversification but with limited gains in productivity in the face of rising competition for instance from India and Vietnam Policymakers may aim to revitalize Thailand s economic prospects with policies aimed for instance at enhancing agricultural productivity combining and internationalizing higher education institutions easing restrictions on foreign investments and promoting greater competition by smaller enterprises against large conglomerates in addition to efforts to improve on transparency and stability and reduce corruption within Thailand s political system
