Sociology of Law as the Science of Norms Håkan Hydén, 2021-12-28 This book proposes the study of norms as a method of explaining human choice and behaviour by introducing a new scientific perspective The science of norms may here be broadly understood as a social science which includes elements from both the behavioural and legal sciences It is given that a science of norms is not normative in the sense of prescribing what is right or wrong in various situations Compared with legal science sociology of law has an interest in the operational side of legal rules and regulation This book develops a synthesizing social science approach to better understand societal development in the wake of the increasingly significant digital technology The

underlying idea is that norms as expectations today are not primarily related to social expectations emanating from human interactions but come from systems that mankind has created for fulfilling its needs Today the economy via the market and technology via digitization generate stronger and more frequent expectations than the social system By expanding the sociological understanding of norms the book makes comparisons between different parts of society possible and creates a more holistic understanding of contemporary society The book will be of interest to academics and researchers in the areas of sociology of law legal theory philosophy of law sociology and social psychology
