European Security Policy and Strategic Culture Peter Schmidt, Benjamin Zyla, 2013-09-13 With the Lisbon Treaty in place and the European Union increasingly involved in international crisis management and stabilization operations in places near and far this volume revisits the trajectory of a European strategic culture Specifically it studies the usefulness of its application in a variety of circumstances including the EU's operations in Africa and the Balkans as well as joint operations with NATO and the United Nations The contributors find that strategic culture is a useful tool to explain and understand the EU's civilian and military operations not in the sense of a cause but as a European normative framework of preferences and constraints Accordingly classical notions of strategic culture in the field of international security must be adapted to highlight the specific character of Europe's strategic culture especially by taking the interaction with the United Nations and NATO

into account Though at variance over the extent to which security and defence missions have demonstrated or promoted a shared strategic culture in Europe the authors reveal a growing sense that a cohesive strategic culture is critical in the EU s ambition of being a global actor Should Europe fail to nurture a shared strategic culture its actions will be based much more on flexibility than on cohesion This book was published as a special issue of Contemporary Security Policy **The OECD's Historical Rise in Education** Christian Ydesen,2019-12-18 This edited volume focuses on the historical role of the OECD The Organisation for Economic Co operation and Development in shaping global education policy In this book contributors shed light on the present day perspective of Comparative Education as a logical addition to current scholarship on the history of international organizations in the field of education Doing so the book provides a deeper understanding of contemporary developments in education that will enable us to reflect critically on the trajectories and future developments of education worldwide
