engage each other in dialogue and that language depends on communication not vice versa This is the triangulating situation two creatures communicating about a common world about which Davidson has written elsewhere As for the mind body relation our ontology need posit nothing more than material objects and events but as explainers we require two mutually irreducible vocabularies mind and body In the last six essays Davidson finds interconnections between his own views and those of some of the major philosophers of the past Including a new introduction by his widow Marcia Cavell this volume completes Donald Davidson's colossal intellectual legacy *Mathematical Commentaries in the Ancient World* Karine Chemla, Glenn W.
