Risk Makers Risk Takers Risk Breakers Reducing The Risks For Young Literacy Learners:

Risk Makers, Risk Takers, Risk Breakers JoBeth Allen, Jana M. Mason, 1989 Increasing Language Skills of Students from Low-Income Backgrounds Celeste Roseberry-McKibbin, 2010-10-26 *Teaching Diverse Populations* Etta R. Hollins, Joyce Elaine King, Warren C. Hayman, 1994-01-01 This book presents current knowledge about teaching culturally diverse populations traditionally underserved in the nation's public schools. It approaches the challenge of improving public school education for these students in a variety of ways including relating of cultural and experiential knowledge to classroom instruction, examining the behaviors of teachers who are effective with culturally diverse populations, analyzing effective school models, reviewing models of effective instruction, and exploring ethnic identity as a variable in the formula for school success. The discussions reveal significant insights about the implications and shortcomings of existing knowledge and its application and offer directions for future research. *Handbook of Academic Learning* Gary D. Phye, 1997-01-08 The Handbook of Academic Learning provides a comprehensive resource for educational and cognitive psychologists as well as educators themselves on the mechanisms and processes of academic learning. Beginning with general themes that cross subject and age level, the book discusses what motivates students to learn and how knowledge can be made personal for better learning and remembering. Individual chapters identify proven effective teaching methods for the specific domains of math, reading, writing, science, and critical problem solving; how students learn within those domains; and how learning can be accurately assessed for given domains and age levels. The Handbook takes a constructivist perspective to academic learning, emphasizing the construction of personal knowledge of an academic nature. Constructivism within the context of learning theory is viewed as involving an active learner that constructs an academic knowledge base through the development of cognitive strategies and metacognition. The book discusses the development of basic literacy skills that provide the foundation for higher order thinking and problem solving. Constructivism recognizes the social dimension of classroom learning and emphasizes the motivational elements of self-regulation and volition as essential learner characteristics. Written by authors who have first-hand experience with both theory development and the development of authentic classroom instructional techniques, the Handbook empowers educators to develop, implement, and field test authentic instructional practices at their school site. The book provides a review of the literature, theory, research, and skill techniques for effective teaching and learning. Identifies effective teaching with specific techniques. Covers elementary school through high school. Discusses teaching methods for all main subject areas: reading, writing, math, science, and critical thinking. Identifies how students learn to learn. Reviews theory, research, techniques, and assessment. Contains field-tested examples for the educational professional at the school site. Provides a resource for staff development. **Language Disorders** Robert E. Owens, Jr., 2022-09-15 Thoroughly updated to meet the needs of today's students in communication sciences and disorders programs. *Language Disorders: A Functional Approach to Assessment and Intervention in Children* Seventh Edition is a

comprehensive overview of language disorders and clinical practice with a focus on the child's overall communication effectiveness. Unlike other texts that have a disorder-specific focus, this book emphasizes a functional and holistic approach to assessment and intervention by shifting the perspective to how a child uses the language feature targeted and how assessment can consider language as it's used. The author presents intervention methods in a system of least prompts followed by information on each area of language and literacy. Generalization is foremost throughout the text. Known for writing numerous bestselling textbooks related to speech language pathology, the author approaches this complex subject in a practical matter while maintaining a conversational writing style that resonates with students.

Key Features Each chapter begins with a case example. Information on children from culturally and linguistically diverse backgrounds is woven into each chapter. Food for Thought boxes invite students to move beyond the text and consider the implications for assessment and intervention of the material. Key terms are highlighted throughout and included in a handy glossary. Numerous tables provide easy reference on the many techniques and norms. Multiple appendices include additional practical information. New to the Seventh Edition: New and improved modern layout with color enhancements; 600 new references highlighting the latest theoretical and evidence-based practices; Greater focus on discussions of assessment of children with culturally and linguistically diverse backgrounds; New section on developmental language disorders (DLD) with new and more inclusive terms; Increased emphasis on autism spectrum disorder (ASD). The chapters on language and narrative analysis have been strengthened and consolidated into one.

Successful School Change Claude Nestor Goldenberg, 2004. Drawing on 15 years of research and teaching in low-income schools, Claude Goldenberg provides a powerful model of school change. Illustrating the everyday dynamics experienced by teachers, administrators, and students, the text focuses on successful reform efforts in an elementary school in the metropolitan Los Angeles area that serves a predominantly bilingual Latino population.

Reading Across the Life Span Steven R. Yussen, M. Cecil Smith, 2012-12-06. One of the liveliest areas of research in the social sciences is reading. Scholarly activity is currently proceeding along a number of different disciplinary lines addressing a multitude of questions and issues about reading. A short list of disciplines involved in the study of reading would include linguistics, psychology, education, history, and gerontology. Among the important questions being addressed are some long-standing concerns: How are reading skills acquired? What are the basic components of reading skill? How do skilled readers differ from less skilled ones? What are the best ways to approach instruction for different groups of readers: young, beginning, readers, poor readers with learning problems, and teenage and adult illiterates? How can reading skill best be measured? What standardized instruments and observational techniques are most useful? The large volume of textbooks and scholarly books that issue forth each year is clear evidence of the dynamic nature of the field. The purpose of this volume is to survey some of the best work going on in the field today and reflect what we know about reading as it unfolds across the life span. Reading is clearly an activity that spans each of our lives. Yet most accounts of it focus on

some narrow period of development and fail to consider the range of questions that serious scholarship needs to address for us to have a richer understanding of reading The book is divided into four parts **Shaping Literacy Achievement** Michael Pressley, Alison K. Billman, Kristen H. Perry, Kelly E. Reffitt, Julia Moorhead Reynolds, 2015-09-08 In the era of No Child Left Behind what literacy research is still needed How should it be conducted And what role does research play in determining the kinds of literacy experiences that actually take place in classrooms This forward thinking book brings together leading authorities to address these vital and hotly debated questions Contributors analyze the existing knowledge on core aspects of literacy education describe how science is currently informing practice and identify important methodological challenges and research directions A highlight of the book is a chapter in which Michael Pressley offers an insightful critique of Reading First as well as practical recommendations for improving future policies **Issues in Educational Placement** James M. Kauffman, 1995 First Published in 1995 Routledge is an imprint of Taylor Francis an informa company **How Children Learn** Terese Fayden, 2015-11-17 The inspirational stories of young learners in this book discredit assumptions behind recent educational reforms including high stakes testing and No Child Left Behind policies The experiences of the American Indian children and the author a kindergarten teacher challenge the widely held assumption that minority children enter school at risk Deficit theory assumes that minority children are responsible for their failure by cultural deficiency or family ineptitude Fayden vividly shows how truly equitable treatment of minority children can improve students inherent abilities to learn and can result in higher achievement for minority and all young children **Creating Parallel Practices** Betty Shockley, 1995

The Pursuit of Racial and Ethnic Equality in American Public Schools Kristi L. Bowman, 2014-12-19 In 1954 the Supreme Court decided Brown v Board of Education ten years later Congress enacted the Civil Rights Act These monumental changes in American law dramatically expanded educational opportunities for racial and ethnic minority children across the country They also changed the experiences of white children who have learned in increasingly diverse classrooms The authors of this commemorative volume include leading scholars in law education and public policy as well as important historical figures Taken together the chapters trace the narrative arc of school desegregation in the United States beginning in California in the 1940s continuing through Brown v Board the Civil Rights Act and three important Supreme Court decisions about school desegregation and voluntary integration in 1974 1995 and 2007 The authors also assess the status of racial and ethnic equality in education today and consider the viability of future legal and policy reform in pursuit of the goals of Brown v Board This remarkable collection of voices in conversation with one another lays the groundwork for future discussions about the relationship between law and educational equality and ultimately for the creation of new public policy A valuable reference for scholars and students alike this dynamic text is an important contribution to the literature by an outstanding group of authors **Policy and Power in Inclusive Education** Melanie Nind, Jonathan Rix, Kieron Sheehy, Katy Simmons, 2023-04-14 The movement towards inclusive education is undoubtedly an international phenomenon and it has

resulted in the development of policy initiatives impacting on schools in all nations This informative wide ranging text brings together key illustrative material from an international field It adopts a critical perspective on policy issues but goes beyond this by making explicit the assumptions that drive policy development Readers will be encouraged to develop their own framework allowing them to conduct policy analysis and evaluation within their own educational context Students and researchers interested in how principles of inclusive education are being translated into educational practices around the world will find this book an enlightening read **Historical Dictionary of American Education** Richard J.

Altenbaugh,1999-10-30 The history of American education is a vital and productive field of study This reference book provides factual information about eminent people and important topics related to the development of American public private and parochial schools covering elementary and secondary levels In addition to major state and regional leaders and reformers it includes biographies of significant national educators philosophers psychologists and writers Subjects embrace important ideas events institutions agencies and pedagogical trends that profoundly shaped American policies and perceptions regarding education The more than 350 entries are arranged alphabetically and written by expert contributors Each entry closes with a brief bibliography and the volume ends with a list of works for further reading Entries were drawn from a review of leading history of education textbooks and the History of Education Quarterly These topics were further refined by comments from leading authorities and the contributors Most of the contributors are established scholars in the history of education curriculum and instruction school law educational administration and American history a few also work as public and private school teachers and thus bring their practical experience to their entries The period covered begins in the colonial period and continues through the 1990s Children's Emergent Literacy David Lancy,1994-07-30 This book

examines emergent literacy as the foundations for language instruction and seeks to relate the work of those doing research on literacy acquisition and those designing programs to facilitate children s literacy development It bridges theory and practice looking at both cognitive processes and settings in which children first experience literacy With contributions by leading researchers in the field the book examines emergent literacy in nonliterate homes oral language supports parent child reading literacy and working class families literacy from a developmental perspective parental involvement and collaborative efforts of teachers and parents An essential collection for all research and education in the language arts methods area Will also appeal to educators involved in reading instruction and parent education Handbook of Research

on Reading Comprehension Susan E. Israel,Gerald G. Duffy,2014-06-03 Researchers of reading comprehension literacy educational psychology psychology and neuroscience are brought together for this handbook to document and summarize the current body of research on theory methods instruction and assessment in reading comprehension *At-Risk Students* Robert Donmoyer,Raylene Kos,1993-01-01 This book explores the circumstances of at risk students and argues that well intentioned policymakers and educators run the risk of making matters worse rather than better for these students even if

their actions are based on the best social science evidence available The book demonstrates the diverse idiosyncratic nature of these students argues that traditional social science methods cannot capture this idiosyncrasy and diversity and presents research methods policies and programs that can accommodate student diversity *Reading, Language, and Literacy* Fran Lehr, Jean Osborn, 2012-10-12 The impetus for this book emerged from a conference that brought together publishers and reading researchers and educators for the purpose of examining the best available research evidence about what we know and what we have yet to learn about the teaching of reading and about how children learn to read The goal of the conference was to contribute to a sound research base upon which to develop classroom practices that will ensure that every American child will become fully literate Because the field is still so deeply divided over the best ways to translate belief into classroom practice the editors decided to highlight rather than gloss over these divisions It is hoped that the papers in this volume will promote thought and discussion that will lead to action in improving reading instruction for children now and into the new century *Reading, Writing, Playing, Learning* Lori Jamison Rog, Donna-Lynn Galloway, 2017-01-12 This practical handbook shows teachers how to nurture a kindergarten learning environment in which children feel safe comfortable and able to take risks It offers innovative ways to encourage children to explore experiment discover solve problems and freely interact with one another Based on extensive classroom practice it demonstrates when teachers need to provide support ask questions and provoke thinking and when they should step back and give children room to explore on their own This remarkable book offers concrete suggestions for creating play based learning in a culture of inquiry It is committed to creating classrooms where children can learn and grow while they play *The SAGE Handbook of Early Childhood Literacy* Joanne Larson, Jackie Marsh, 2012-11-09 This new edition of the much loved Handbook of Early Childhood Literacy has been revised and updated to retain its cutting edge focus on emergent and important areas of research This comprehensive work guides the reader through current social cultural and historical analysis on a global scale The new edition contains a greater range of methodologies and chapters on space and literacy disabilities and early childhood literacy digital literacies indigenous literacy play and literacy policy In the Handbook readers will find coverage of all the key topics in early childhood literacy The exceptional list of contributors offers in depth expertise in their respective areas of knowledge The Handbook is essential for Undergraduate students Masters students PhD students CPD students researchers and literacy centre personnel The second edition of this internationally respected and widely used text encompasses a myriad of new issues and insights both through new contributions and thoughtfully revised chapters which raise fresh questions and challenges for research and practice In pushing the boundaries still further the handbook retains its rightful place at the forefront of research into early childhood literacy practice in the 21st century Professor Teresa Cremin Open University UK This handbook provides in depth knowledge of insights and theories about the dynamic process of how children come to know literacy as thinking humans in social and cultural spaces There is a rich array of research perspectives of children's meaning making through family and
