## **Risk Factor:**

**Global Burden of Disease and Risk Factors** Alan D. Lopez, 2006-04-02 Strategic health planning the cornerstone of initiatives designed to achieve health improvement goals around the world requires an understanding of the comparative burden of diseases and injuries their corresponding risk factors and the likely effects of intervention options The Global Burden of Disease framework originally published in 1990 has been widely adopted as the preferred method for health accounting and has become the standard to guide the setting of health research priorities This publication sets out an updated assessment of the situation with an analysis of trends observed since 1990 and a chapter on the sensitivity of GBD estimates to various sources of uncertainty in methods and data

**Risk Factor Trends** Australian Institute of Health and Welfare, 2012 This report presents comparisons over time for different age groups for key health risk factors including overweight and obesity physical activity poor diet smoking and excessive alcohol consumption The good news is that smoking rates have declined particularly among younger people However overweight obesity rates have increased for virtually all age groups especially females aged 12 to 44 back cover

Public Health and the Risk Factor William G. Rothstein, 2003 A risk factor is anything that increases the risk of disease in an individual

**Early Intervention for Trauma and Traumatic Loss** Brett T. Litz, 2004-01-01 This authoritative volume describes the state of the science of early intervention for trauma and traumatic loss across the lifespan and in a variety of contexts While few would dispute the importance of helping people cope with severe life stressors important questions remain about how to identify those at risk for chronic problems and which interventions actually facilitate recovery over time Following a review of current knowledge on the predictors and course of acute stress disorder PTSD and traumatic grief the volume presents a range of early intervention models designed for very young children older children and adults Authors examine the empirical literature and recommend evidence based clinical strategies whenever possible while delineating an extensive agenda for future research Also covered are the lessons learned from early intervention with specific populations 9 11 survivors combat veterans emergency services personnel survivors of sexual violence and others
