Risks At Sea Amsterdam Insurance And Maritime Europe 1766 1780:

Risks at Sea Frank C. Spooner, 2002-07-04 This book places the marine insurance business of Amsterdam in the wider context of the political economy of Europe during the second half of the eighteenth century The analysis is based on the simultaneous quotations of premiums for the twenty two groups of destinations which formed a major part of the commercial matrix of the Netherlands It considers the operation of the market at two levels On the one hand the provision of insurance responded to risk uncertainties in the market in the 1760s and 1770s Amsterdam experienced three serious upheavals in the form of the financial crises of 1763 and 1772-73 and the hostilities leading to American independence and the Fourth Anglo-Dutch War On the other hand underwriters accepted risks in situations of structural uncertainty The book is fully illustrated with graphs and maps and uses a wide range of original documents drawn from archives and libraries in Europe An appendix provides the basic data of premiums quoted in the price lists of the market Maritime Risk Management Phillip

Hellwege, Guido Rossi, 2021-04-21 Insurance is a legal an actuarial and a financial product and it is one out of many risk management strategies It follows that its history can only be studied in the broader context of the development of such strategies applying an interdisciplinary approach The theme of the present volume is maritime risk management After an overview over the history of insurance the contributions to the present volume examine different maritime risk management strategies by adopting a variety of methodological approaches Some contributions focus on normative provisions others contrast practice with legal scholarship or focus on the emergence of insurance companies as opposed to individual insurers Again other contributions give insights in marine insurance practice in specific cities or analyse insurance practice through the lens of specific insurance litigation As to the time frame the different contributions span from antiquity to the nineteenth century

Marine Insurance in the Netherlands 1600-1870 Sabine Go, 2009 Marine insurance has been of great importance to the expansion of long distance trade and economic growth in the early modern period in particular for seafaring nations such as the Dutch Republic The Amsterdam market became Europe's leading insurance market and within the Republic other insurance systems also emerged Little is known about the differing institutional frameworks governing these industries and the interaction between the institutions and the actors in the industry This study examines the development of marine insurance in the Netherlands in Amsterdam Rotterdam and the province of Groningen from c 1600 to 1870 from an institutional point of view It examines how the behavior of authorities insurers underwriters and brokers was affected by the formal and informal constraints of the industry and how in turn their conduct has influenced the institutional framework and induced institutional change Three insurance systems in the Netherlands each with its own distinctive characteristics and the interaction between institutions and actors is examined By examining developments over a period of two and half centuries the path of long term institutional change becomes discernable **Marine Insurance** Adrian Leonard, 2016-02-03 Since its invention in Italy in the fourteenth century marine insurance has provided merchants with

capital protection in times of crisis thus oiling the gears of trade and commerce With a focus on customs laws and organisational structures this book reveals the Italian origins of marine insurance and tracks the spread of underwriting practices and institutions in Europe and America through the early modern era With contributions from eleven leading researchers from seven countries the book examines key institutional developments in the history of marine insurance The authors discuss its invention in Italy and its evolution from private to corporate structures assessing the causes and impacts of various state interventions Amsterdam and Antwerp are analysed as one time key centres of underwriting as is the emergence and maturity of marine insurance in London The book evaluates an experiment in corporate underwriting in Cadiz and the development of insurance institutions in the United States before applying the metrics of underwriting to discuss commerce raiding in the Atlantic up to the nineteenth century

The Rise of the Amsterdam Market and Information

Exchange Clé Lesger, 2016-12-05 Most scholars agree that during the sixteenth century the centre of European international trade shifted from Antwerp to Amsterdam presaging the economic rise of the Dutch Republic in the following century Traditionally this shift has been accepted as the natural consequence of a dynamic and progressive city such as Amsterdam taking advantage of expanding commercial opportunities at the expense of a more conservative rival hampered by outmoded medieval practices Yet whilst this theory is widely accepted is it accurate In this groundbreaking study Cl Lesger argues that the shift of commercial power from Antwerp to Amsterdam was by no means inevitable and that the highly specialized economy of the Low Countries was more than capable of adapting to the changing needs of international trade It was only when the Dutch Revolt and military campaigns literally divided the Low Countries into separate states that the existing stable spatial economy and port system fell apart and a restructuring was needed Within this process of restructuring the port of Amsterdam acquired a function radically different to the one it had prior to the division of the Netherlands Before the Revolt it had served as the northern outpost in a gateway system centred on Antwerp but with access of that port now denied to the new republic Amsterdam developed as the main centre for Dutch shipping trade and crucially the exchange of information Drawing on a wide variety of neglected archival collections including those of the Bank of Amsterdam this study not only addresses specific historical questions concerning the commercial life of the Low Countries but through the case study of Amsterdam also explores wider issues of early modern European commercial trade and economic development

Colonial Empires Compared Bob Moore, Henk van Nierop, 2017-03-02 During the seventeenth century the Dutch and English emerged as the world s leading trading nations building their prosperity largely upon their maritime successes During this period both nations strongly contested for maritime supremacy and colonial dominance yet by the nineteenth century it was Britain who had undoubtedly come out on top of this struggle with a navy that dominated the seas and an empire of unparalleled size This volume examines the colonial development of these two nations at a crucial period in which the foundations for the modern nineteenth and twentieth century imperial state were laid The volume consists of ten essays five by British and five by Dutch scholars based on papers originally delivered to the Fourteenth Anglo Dutch Historical Conference 2000 The essays are arranged into five themes which take a strongly comparative approach to explore the development of the British and Dutch colonial empires in the late eighteenth and early nineteenth centuries These themes examine the nature of Anglo Dutch relations the culture of imperialism and perceptions of the overseas world the role of sea power in imperial expansion the economics of colonial expansion and the extension of the metropolitan state to the colonies Taken together these essays form an important collection which will greatly add to the understanding of the British and Dutch colonial empires and their relative successes and failures

Cities of Commerce Oscar Gelderblom, 2015-12-29 Cities of Commerce develops a model of institutional change in European commerce based on urban rivalry Cities continuously competed with each other by adapting commercial legal and financial institutions to the evolving needs of merchants Oscar Gelderblom traces the successive rise of Bruges Antwerp and Amsterdam to commercial primacy between 1250 and 1650 showing how dominant cities feared being displaced by challengers while lesser cities sought to keep up by cultivating policies favorable to trade He argues that it was this competitive urban network that promoted open access institutions in the Low Countries and emphasizes the central role played by the urban power holders the magistrates in fostering these inclusive institutional arrangements Gelderblom describes how the city fathers resisted the

predatory or reckless actions of their territorial rulers and how their nonrestrictive approach to commercial life succeeded in attracting merchants from all over Europe Cities of Commerce intervenes in an important debate on the growth of trade in Europe before the Industrial Revolution Challenging influential theories that attribute this commercial expansion to the political strength of merchants this book demonstrates how urban rivalry fostered the creation of open access institutions in international trade

Dangerous Commerce Virginia Haufler,2019-06-07 As businesses search increasingly for opportunities beyond their national borders they face the risk that political change in other countries will jeopardize their efforts Anything from minor shifts in regulations to sudden revolutions can threaten business investment trade and credit Virginia Haufler shows that a crucial factor in the expansion of global markets has been the private sector s creation of a sophisticated insurance industry to redistribute the risks entailed in foreign commerce a privately constructed safety net for international transactions Haufler believes that the network of relationships and institutions established by the insurers constituted a privately led regime for the management of international risk She

analyzes political risks insurance during three periods of substantial uncertainty the era from the turn of the century to the beginning of World War I when British global power began to wane the interwar years leading up to the collapse of world trade and a second world war and the debt crisis decade of the 1980s Public and private involvement in supplying insurance against international risks has varied depending on demand the availability of resources and the norms of what can be insured As the scale and complexity of risks have expanded Haufler suggests responsibility has shifted from commercial insurers first to the state and now to multilateral institutions
