Malebranche Une Philosophie De L'expérience:

Malebranche Denis Moreau, 2004 Nicolas Malebranche 1638-1715 fut le principal représentant du cartesianisme en France. Sa pensée se présente comme une audacieuse tentative de synthèse entre la philosophie moderne de Descartes et certains thèmes fondamentaux de l'augustinisme. Malebranche est donc un représentant majeur de ce qu'il est convenu d'appeler le rationalisme chrétien. Ce livre expose et analyse une série de thèmes qui fournissent des axes directeurs pour la lecture de l'abondante œuvre de Malebranche. Il fait apparaître l'intérêt philosophique des principales problématiques malebranchistes: la théorie de la connaissance et de l'idée, la question de la connaissance de soi, les rapports entre philosophie et religion, la théorie de la causalité appelée occasionalisme, la théodicée. Il tente aussi de suggérer les multiples postérités du malebranchisme qui exerça une influence considérable sur l'ensemble des penseurs européens du XVIII^e siècle.

Naturalism and Unbelief in France, 1650-1729 Alan Charles Kors, 2016-06-20 This book shows how absolute naturalism deciphering nature without reference to God emerged from the inheritance dynamics and debates of orthodox culture. Oxford Studies in Early Modern Philosophy, Volume VII Daniel Garber, Donald Rutherford, 2015-11-26 Oxford Studies in Early Modern Philosophy is an annual series presenting a selection of the best current work in the history of early modern philosophy. It focuses on the seventeenth and eighteenth centuries, the extraordinary period of intellectual flourishing that begins very roughly with Descartes and his contemporaries and ends with Kant. It also publishes papers on thinkers or movements outside of that framework provided they are important in illuminating early modern thought. The articles in OSEMP will be of importance to specialists within the discipline but the editors also intend that they should appeal to a larger audience of philosophers, intellectual historians and others who are interested in the development of modern thought.

A. Watson, 2012-12-06 In *Representational Ideas* From Plato to Patricia Churchland Watson argues that all intelligible theories of representation by ideas are based on likeness between representations and objects. He concludes that 17th century materialist criticisms of having mental representations in the mind apply to contemporary material

representations in the brain as proposed by neurophilosophers The argument begins with Plato with particular stress on Descartes Malebranche and Arnauld He then proceeds with an examination of the picture theory developed by Wittgenstein Carnap and Goodman and concludes with an examination of Patricia Churchland Ruth Millikan Robert Cummins and Mark Rollins The use of the historical development of representationalism to pose a central problem in contemporary cognitive science is unique For students scholars and researchers in neuroscience cognitive science philosophy of mind and modern philosophy

Malebranche's Theory of the Soul Tad Schmaltz, 1996-09-05 This book offers a provocative interpretation of the theory of the soul in the writings of the French Cartesian Nicolas Malebranche 1638 1715 Though recent work on Malebranche's philosophy of mind has tended to emphasize his account of ideas Schmaltz focuses rather on his rejection of Descartes doctrine that the mind is better known than the body In particular he considers and defends Malebranche's argument that this rejection has a Cartesian basis Schmaltz reveals that this argument not only provides a fresh perspective on Cartesianism but also is relevant to current debates in the philosophy of mind
