Visual Merchandising and In-store Brand Equity - 2ed Karin Zaghi, 2025-01-30T00:00:00+01:00. Crafting and managing visual merchandising in this day and age means necessarily adopting an omnichannel view to satisfy a customer who seeks a seamless, comprehensive one-stop shopping experience designed to break down the barriers between physical and virtual stores. In this new scenario, visual merchandising gives substance to a physical point of sale that must transform its very essence to become a place that exists to offer value. This is achieved by adopting a mixed model that combines the experience of a store with the access, interactivity, and convenience of e-commerce, ultimately consolidating in-store brand equity. Considering the role of digital technologies and multisensory communication, this book sets down guidelines for the store concept, delving into applications of color theory and semiotics. Moving on to examine the levers of visual merchandising, the discussion then turns to designing and managing POP materials in the channel relationship with respect to sustainability, communication goals, as well. Finally, the book closes with an evaluation of the customer's perspective in their interaction with the space they experience, perceive, and desire. This text is for people who handle communication for the store in the store as

well as retail and industry practitioners agencies producers of POP materials and finally undergraduate and master s students interested in marketing communication and retailing **Retailing** Denise T. Ogden,James R. Ogden,Robert Paul Jones,2017-08-02 Light on the fluff solid on the basics the fourth edition of Retailing is a concise text that covers strategic issues with an eye on financial considerations and operations management issues illustrated through retail cases and exercises New co author Robert Paul Jones is Department Chair of Hospitality and Retail Management in the College of Human Sciences at Texas Tech In addition to his extensive academic work Dr Jones has over 25 years of executive leadership and consulting experience in retail and hospitality He uses an Integrated Retail Management flow chart to depict retail functions Most retail texts present students with a series of chapters that provide useful information but fail to explain how the various activities involved in retailing affect each other The 4th edition offers the student an overview of the retail process through the use of an integrated retail management IRM plan The steps involved in retailing as presented in the text are tied together through the IRM plan Expanded coverage of Mobile and e Tailing and included throughout the text and not treated as a stand alone chapter This helps emphasize that e tailing is a form of retailing that uses many of the same models as other forms Includes updated cases and real world examples And omni channel retailing incorporated throughout text
