*Market Growers Journal* ,1921 Violence in Capitalism James A. Tyner,2016 What James Tyner asks separates the murder of a runaway youth from the death of a father denied a bone marrow transplant because of budget cuts Moving beyond our culture s reductive emphasis on whether a given act of violence is intentional and may therefore count as deliberate murder Tyner interrogates the broader forces that produce violence His uniquely geographic perspective considers where violence takes place the workplace the home the prison etc and how violence moves across space Approaching violence as one of several methods of constituting space Tyner examines everything from the way police departments map crime to the emergence of environmental criminology Throughout he casts violence in broad terms as a realm that is not limited to criminal acts and one that can be divided into the categories of killing and letting die His framework extends the study of biopolitics by examining the state s role in producing or failing to produce a healthy citizenry It also adds to the new literature on capitalism by articulating the interconnections between violence and political economy Simply put capitalism especially its neoliberal and neoconservative variants is structured around a valuation of life that fosters a particular abstraction of violence and crime
