Reading Mark's Gospel as a Text from Collective Memory Sandra Huebenthal, 2020-05-28 How did the Gospel of Mark come to exist And how was the memory of Jesus shaped by the experiences of the earliest Christians For centuries biblical scholars examined texts as history literature theology or even as story Curiously absent however has been attention to processes of collective memory in the creation of biblical texts Drawing on modern explorations of social memory Sandra Huebenthal presents a model for reading biblical texts as collective memories She demonstrates that the Gospel of Mark is a text evolving from collective narrative memory based on recollections of Jesus's life and teachings Huebenthal investigates the principles and structures of how groups remember and how their memory is structured and presented In the case of Mark's Gospel this includes examining which image of Jesus as well as which authorial self image this text as memory constructs *Reading Mark's Gospel as a Text from Collective Memory* serves less as a key to unlock questions about the historical Jesus and more as an examination of memory about him within a particular community providing a new and important framework for interpreting the earliest canonical gospel in context

Oden,2011-07-27 We often regard the author of the Gospel of Mark as an obscure figure about whom we know little Many would be surprised to learn how much fuller a picture of Mark exists within widespread African tradition tradition that holds that Mark himself was from North Africa that he founded the church in Alexandria that he was an eyewitness to the Last Supper and Pentecost that he was related not only to Barnabas but to Peter as well and accompanied him on many of his travels In this provocative reassessment of early church tradition Thomas C Oden begins with the palette of New Testament evidence and adds to it the range of colors from traditional African sources including synaxaries compilations of short biographies of saints to be read on feast days archaeological sites non Western historical documents and ancient churches The result is a fresh and illuminating portrait of Mark one that is deeply rooted in African memory and seldom viewed appreciatively in the West *Rock Art and Memory in the Transmission of Cultural Knowledge* Leslie F. Introduction and Use of the Graded Lessons, International Course Josephine L. Baldwin,1915 Conscious Life John S.

Torday,Rob G. Sacco,2025-07-17 Understanding consciousness is the most important scientific principle left to be understood That is particularly true with the ready availability of software for Artificial Intelligence The conventional way of thinking about evolution is focused on materiality whereas a true understanding of evolution can only be understood by re focusing on the flow of energy in service to Symbiogenesis This book focuses on the role of quantum mechanics in the process of evolution based on the perspective of energy flow rather than the description of biologic materiality A basic understanding of that frame shift is comparable to the Periodic Table of Elements showing the interrelationship between the alchemical description of matter and its energetic origin in the Big Bang Based on the author s earlier works going back 25 years regarding the role of cell cell communication in development and speciation this book is designed to encourage an across space time perspective on how and why we have evolved Energy and Evolution posits that the flow of energy is the primary force driving evolution in our Universe This perspective offers a superior framework for understanding biological complexity and environmental adaptability Evolution is presented not as a series of random mutations and adaptations but as a cohesive and purposeful progression toward enhanced communication and efficiency within and between organisms Central to this thesis are symbiogenesis and quantum entanglement which highlight the Universe s interconnectedness and emphasize collaboration and energy synergy over Darwinian competition The book explores the Fibonacci sequence and the golden ratio as self organizing principles inherent in complex systems ranging from the micro to the macro from the periodic table to the cosmos and even in consciousness human development and aging Fibonacci spirals are described as symbolizing the constant oscillation between conscious and unconscious states akin to the balance between gravitational and radiant forces While speculative and ambitious in scope Energy and Evolution represents a sincere effort to integrate mathematics cosmology biology consciousness research and modern physics into a comprehensive theory that holds profound implications for understanding humanity s origins and future paths Diane Hennacy Powell MD Author of The ESP Enigma A Scientific Case

Advancing a phenomenological approach to deep time Our imagination today is dominated by the end of the world from sci fi and climate fiction to actual predictions of biodiversity collapse climate disruption and the emergence of the Anthropocene This obsession with the world's precarity The Memory of the World contends relies on a flawed understanding of time that neglects the past and present with the goal of managing the future Not only does this mislead sustainability efforts it diminishes our encounters with the world and with human and nonhuman others Here Ted Toadvine takes a phenomenological approach to deep time to show how our apocalyptic imagination forgets the sublime and uncanny dimensions of the geological past and far future Guided by original readings of Maurice Merleau Ponty Emmanuel Levinas

Jacques Derrida Jean Luc Nancy and others he suggests that reconciling our embodied lives with the memory of the earth transforms our relationship with materiality other forms of life and the unprecedented future Integrating insights from phenomenology deconstruction critical animal studies and new materialism The Memory of the World argues for a new philosophy of time that takes seriously the multiple pleated and entangled temporal events spanning cosmic geological evolutionary and human durations

Diaspora, Memory and Identity Vijay Agnew, 2005-01-01 Memories establish a connection between a collective and individual past between origins heritage and history Those who have left their places of birth to make homes elsewhere are familiar with the question Where do you come from and respond in innumerable well rehearsed ways Diasporas construct racialized sexualized gendered and oppositional subjectivities and shape the cosmopolitan intellectual commitment of scholars The diasporic individual often has a double consciousness a privileged knowledge and perspective that is consonant with postmodernity and globalization The essays in this volume reflect on the movements of people and cultures in the present day when physical social and mental borders and boundaries are being challenged and sometimes successfully dismantled The contributors from a variety of disciplinary perspectives discuss the diasporic experiences of ethnic and racial groups living in Canada from their perspective including the experiences of South Asians Iranians West Indians Chinese and Eritreans

Diaspora Memory and Identity is an exciting and innovative collection of essays that examines the nuanced development of theories of Diaspora subjectivity double consciousness gender and class experiences and the nature of home

Jesus, the Temple, and Early Christian Memory Scott Brevard, 2025-08-07 Jewish identity during the Second Temple period 515 BCE 70 CE was complex multifaceted and variable but many studies of this period treat Jewish attitudes toward one key feature the Jerusalem temple as simple and uniform Brevard aims to complicate this notion by examining early Christian traditions of Jesus s relationship with the temple Early Christian memory constructed transformed and transmitted traditions about the past into their present contexts Examining early Christian memory as represented by canonical and noncanonical gospel traditions in the first three centuries CE allows scholars to ask how certain figures institutions or beliefs were remembered and represented as well as to posit theories as to why memories were constructed in particular ways and how these memories related to their contemporary historical and social frameworks Early Christians remembered Jesus as having a complex relationship with the Jerusalem temple and these early Christian traditions of Jesus impacted their own contemporary worldviews This complicated relationship with the temple however was not a new phenomenon but one that was already familiar to those constructing experiencing remembering and transmitting their Jewish identity throughout the diaspora world in the Second Temple period
