

The background of the book cover is an abstract, textured composition. The upper half is a deep, vibrant blue, while the lower half transitions into a mottled green and blue, resembling a landscape or a close-up of a natural surface. The texture is grainy and painterly.

Mormonism: A Very Short Introduction Richard Lyman Bushman, 2008-04-22. Beginning with a handful of members in 1830 the church that Joseph Smith founded has grown into a world wide organization with over 12 million adherents playing prominent roles in politics sports entertainment and business. Yet they are an oddity. They are considered wholesome conservative and friendly on one hand and clannish weird and self righteous on the other. *Mormonism: A Very Short Introduction* explains who Mormons are what they believe and how they live their lives. Written by Richard Lyman Bushman an eminent historian and practicing Mormon this compact informative volume ranges from the history of the Church of Jesus Christ of Latter day Saints to the contentious issues of contemporary Mormonism. Bushman argues that Joseph Smith still serves as the Mormons' Moses. Their everyday religious lives are still rooted in his conceptions of true Christianity. They seek revelation to solve life's problems just as he did. They believe the authority to seal families together for eternity was restored through him. They understand their lives as part of a spiritual journey that started in a council in heaven before the world began just as he taught. Bushman's account also describes the tensions and sorrows of Mormon life. How are Mormons to hold on to their children in a world of declining moral standards and rampant disbelief? How do rational educated Mormons stand up to criticisms of their faith? How do single Mormons fare in a church that emphasizes family life? The book also examines polygamy the various Mormon scriptures and the renegade fundamentalists who tarnish the LDS image when in fact they're not members. In a time when Mormons such as Mitt Romney and Harry Reid are playing prominent roles in American society this engaging introduction enables readers to judge for themselves how Mormon teachings shape the character of believers. Documentary Film: A Very Short Introduction Patricia Aufderheide, 2007-11-28 Documentary film can encompass

anything from Robert Flaherty's pioneering ethnography *Nanook of the North* to Michael Moore's anti Iraq War polemic *Fahrenheit 9/11* from Dziga Vertov's artful Soviet propaganda piece *Man with a Movie Camera* to Luc Jacquet's heart tugging wildlife epic *March of the Penguins*. In this concise crisply written guide Patricia Aufderheide takes readers along the diverse paths of documentary history and charts the lively often fierce debates among filmmakers and scholars about the best ways to represent reality and to tell the truths worth telling. Beginning with an overview of the central issues of documentary filmmaking its definitions and purposes its forms and founders Aufderheide focuses on several of its key subgenres including public affairs films government propaganda particularly the works produced during World War II historical documentaries and nature films. Her thematic approach allows readers to enter the subject matter through the kinds of films that first attracted them to documentaries and it permits her to make connections between eras as well as revealing the ongoing nature of documentary's core controversies involving objectivity advocacy and bias. Interwoven throughout are discussions of the ethical and practical considerations that arise with every aspect of documentary production. A particularly useful feature of the book is an appended list of 100 great documentaries that anyone with a serious interest in the genre should see. Drawing on the author's four decades of experience as a film scholar and critic this book is the perfect introduction not just for teachers and students but also for all thoughtful filmgoers and for those who aspire to make documentaries themselves. Science and Religion: A Very Short Introduction Thomas Dixon, 2008-07-24 The debate between science and religion is never out of the news emotions run high fuelled by polemical bestsellers like *The God Delusion* and at the other end of the spectrum high profile campaigns to teach Intelligent Design in schools. Yet there is much more to the debate than the clash of these extremes. As Thomas Dixon shows in this balanced and thought provoking introduction many have seen harmony rather than conflict between faith and science. He explores not only the key philosophical questions that underlie the debate but also the social political and ethical contexts that have made science and religion such a fraught and interesting topic in the modern world offering perspectives from non Christian religions and examples from across the physical biological and social sciences. Along the way he examines landmark historical episodes such as the trial of Galileo by the Inquisition in 1633 and the famous debate between Darwin's bulldog Thomas Huxley and Bishop Wilberforce in Oxford in 1860. The Scopes Monkey Trial in Tennessee in 1925 and the Dover Area School Board case of 2005 are explained with reference to the interaction between religion law and education in modern America.
