The Routledge Companion to Corporate Social Responsibility Thomas Maak,Nicola Pless,Marc Orlitzky,Sukhbir Sandhu,2021-08-25 While the concept and domain of Corporate Social Responsibility CSR are not new its beginnings can be tracked back to the 1960s its scope urgency and

relevance have shifted dramatically in recent years CEO responses show that the majority of business leaders understand that they operate in an environment of contested values and that stakeholders expect companies to do better and more. However many corporate incentive systems are not in sync with societal norms and expectations. Moreover grand challenges such as climate change and global pandemics and growing interconnectedness shed light on the fault lines of value creation through complex supply chain systems exposing unacceptable working conditions modern slavery and the environmental consequences of highly distributed production at any cost. As a consequence corporate social responsibility has become a widely accepted common denominator of the role and responsibilities of business in society ranging from core functions such as health safety and environment standards to governance and recognition of stakeholders supply chain design and corporations stand on climate change and its responsibility to future generations. This volume assembles state of the art scholarship from leading scholars in the field and enables a full range view of CSR from its roots normative foundations and institutional perspectives to matters of stakeholding the global value chain social innovation and future directions. The Routledge Companion to Corporate Social Responsibility represents a prestige reference work providing an overview of the subject area of CSR for academics researchers postgraduate students as well as reflective practitioners. *Business Ethics* David Wasieleski, James Weber, 2019-06-07. As business and society is an inherently multi disciplinary scholarly area the book will draw from work in areas outside of business and management such as psychology sociology philosophy religious studies economics and other related fields as well as the natural sciences education and other professional areas of study.
