

The background of the slide is a composite image. The upper portion shows a family of five (two adults and three children) silhouetted against a bright, low sun, walking along a path. The lower portion, separated by a torn paper effect, shows a close-up of several hands clasped together in a gesture of prayer or support. The overall color palette is warm, with oranges, yellows, and browns.

presents a focused and provocative set of Gilman's penetrating analyses of marriage, motherhood, and family relationships. Generally unavailable except in archives and special libraries, the lion's share of the analyses are drawn directly from Gilman's quintessentially unique self-published journal *The Forerunner*. Transcending her era, Gilman speaks with wit, insight, and candor to twenty-first-century readers about many controversial aspects of family and family life. She believes deeply that women's values—regeneration, cooperation, and compassion—make for better societies. Men's values, she concludes, are destructive, competitive, and often violent. Families produce double standards and inequalities between husbands and wives, resulting in inferior mothers and, as a direct consequence, substandard children. To improve society, Gilman argues, we need healthy, happy children. This requires well-trained, competent mothers, widespread social parenting, and enlightened, non-patriarchal marriages. Largely self-taught, Gilman supported herself through writing and lecturing. She was at one time a settlement house leader and an active member of the American Sociological Society. Her wide sociological circle included lasting friendships with Jane Addams, Edward A. Ross, and Lester F. Ward.

**Marriages, Families, and Intimate Relationships** Brian K. Williams, Stacey C. Sawyer, Carl M. Wahlstrom, 2006-07-10.     *Sex, Love, and Families* Julie Hanlon Rubio, Jason Edward King, 2020-03-30. 2021 Association of Catholic Publishers first place award in theology; 2021 Catholic Media Association Award first place award in marriage and family living. Six years into the papacy of Pope Francis, Catholics are still figuring out how to respond to his image of the church as a field hospital—a church that goes into the streets rather than remaining locked up behind closed doors. Marriage and family are primary sites of the field hospital, called to meet people's need for healing and accompaniment with compassion and love. The authors of this collection all lay a mix of single and married, traditional and progressive Catholics take up this work. They offer practical wisdom from and critical engagement with the Catholic tradition but avoid rehashing decades-old theological debates. Instead, their essays engage with and respond to realities shaping contemporary family life: like religious pluralism, technology, migration, racism, sex and gender, incarceration, consumerism, and the call to holiness. The result is a collection that envisions ways that families can be places of healing and love in and for the world.

*Female Choices* Meredith F. Small, 1993 The battle of the sexes can be explained at its deepest level writes Meredith Small as a war of different mating strategies In her intriguing and provocative book about females and sex Small concentrates on primates the prosimians monkeys and apes whose ancestry we share to show how females have evolved to be highly sexual creatures Using nonhuman female primates as a gauge she describes the sexual and reproductive strategies of our nearest cousins to demonstrate that just as males are strategists in the reproductive game females also search for good partners enjoy sex and keep their own reproductive interests in mind *Female Choices* opens with the evolution of sexual reproduction and of males and females as distinct forms Small then introduces primates and gives a detailed history of the average female's life cycle After devoting chapters to sexuality reproduction and sexual selection theory the theory behind female mate choice she discusses what female primates actually do Drawing on her own firsthand observation of nonhuman primates she shows that some are highly promiscuous others prefer several unfamiliar males and some apparently make no choices at all The behavior of the indiscriminating females often affects the evolution of relationships between the sexes and can influence the social structure of a species In a final chapter on human behavior Small maintains that the human pair

bond is a tenuous compromise made by the two sexes to bring up highly dependent infants But she writes because both sexes also have a natural tendency to seek out other partners that bond is always at risk Small insists that female choice is not necessarily sexual selection but is nonetheless important to female fitness Sure to provoke controversy her book will add a new twist to an exciting field of research while offering significant clues as to the origins of our own sexuality *Human Geographies Within the Pale of Settlement* Robert E. Mitchell, 2018-09-15 This study suggests how traditional language rich narrative histories of the Pale of Settlement can benefit from drawing on the large vocabularies, questions, theories and analytical methods of human geography, economics and the social sciences for an understanding of how Jewish communities responded to multiple disruptions during the nineteenth century Moving from the ecological level of systems of settlements and variations among individual ones down to the immediate built environment the book explores how both physical and human space influenced responses to everyday lives and emigration to America **Marriages & Families** David H. L. Olson, John D. DeFrain, 2006 **The Economics of Consanguineous Marriages** Quỳ Toàn Đỗ, Sriya Iyer, Shareen Joshi, 2006 The institution of consanguineous marriage a marriage contracted between close biological relatives has been a basic building block of many societies in different parts of the world This paper argues that the practice of consanguinity is closely related to the practice of dowry and that both arise in response to an agency problem between the families of a bride and a groom When marriage contracts are incomplete dowries transfer control rights to the party with the highest incentives to invest in a marriage When these transactions are costly however consanguinity can be a more appropriate response since it directly reduces the agency cost The paper's model predicts that dowry transfers are less likely to be observed in consanguineous unions It also emphasizes the effect of credit constraints on the relative prevalence of dowry payment and consanguinity An empirical analysis using data from Bangladesh delivers robust results consistent with the predictions of the model **The Publishers' Trade List Annual**, 1918
