**Facing Catastrophe** Robert R. M. Verchick, 2012-04-02 As Hurricane Katrina vividly revealed disaster policy in the United States is broken and needs reform What can we learn from past disasters storms floods earthquakes tsunamis landslides and wildfires about preparing for and responding to future catastrophes How can these lessons be applied in a future threatened by climate change In this bold contribution to environmental law Robert Verchick argues for a new perspective on disaster law that is based on the principles of environmental protection His prescription boils down to three simple commands Go Green Be Fair and Keep Safe Going green means minimizing exposure to hazards by preserving natural buffers and integrating those buffers into artificial systems like levees or seawalls Being fair means looking after public health safety and the environment without increasing personal and social vulnerabilities Keeping safe means a more cautionary approach when confronting disaster risks Verchick argues that government must assume a stronger regulatory role in managing natural infrastructure distributional fairness and public risk He proposes changes to the federal statutes governing environmental impact assessments wetlands development air emissions and flood control among others Making a strong case for more transparent governmental decision making Verchick offers a new vision of disaster law for the next generation

**Walking to New Orleans** Robert R. N. Ross, Deanne E. B. Ross, 2008-09-22 Two and a half years after the devastation of Hurricanes Katrina and Rita New Orleans and south Louisiana continue to struggle in an unsettled gumbo of environmental social and rebuilding

chaos Citizens await the fruition of four successive recovery and reconstruction planning processes and the realization of essential infrastructure repairs Repopulation in Orleans Parish has slowed considerably the parish remains at best two thirds of its former size thousands of former residents who wish to return face barriers of many kinds Heroic efforts at rebuilding have occurred through the efforts of individual neighborhood associations and voluntary associations who have attempted to address serious losses in affordable housing and health care services Walking to New Orleans traces how a dominant but paradoxical model of the relation between the human and natural worlds in Western culture has informed many environmental and engineering dilemmas and has contributed to the history of social inequities and injustice that anteceded the disasters of the hurricanes and subsequent flooding It proposes a model for collaborative recovery that links principles of ethics and engineering in which citizens become active ongoing participants in the process of the reconstruction and redesign of their unique locus of habitation Equally important it gives voice to the citizens and associations who are desperately working to rebuild their homes and lives both in urban New Orleans and in the villages of coastal Louisiana

*C. C. Lockwood's Atchafalaya* C. C. Lockwood, 2007-09-01 At nearly 1.4 million acres the Atchafalaya Basin in south central Louisiana comprises America's largest swamp wilderness Award winning nature photographer C. C. Lockwood is the foremost chronicler of this natural treasure What began as a curious side trip in 1973 became a decades long love affair and for more than thirty years Lockwood has explored the Atchafalaya's waters and captured its haunting beauty on film Now twenty five years after the publication of his first book he returns to his favorite subject in *C. C. Lockwood's Atchafalaya* His passion for the Atchafalaya as expressed in his photographs can be compared to John James Audubon's exuberant appreciation for the state's abundant

bird life as depicted in his prints more than 150 years ago The art of both exalts Louisiana s wildlife and cautions against taking it for granted Lockwood revisits and reflects on the places he has frequented most in the swamp recalling his escapades both long past and recent among gators and skeeters He shares the thoughts of basin residents about how the Atchafalaya has changed over time for better and for worse Increases and decreases in various bird and other animal populations changes in water levels and consistency flora mainstays and trees gone missing burgeoning aquatic vegetation all are keenly observed by this explorer Lockwood finds undiminished the seductive seasonal and diurnal moods of the swamp autumn and spring sunset and moonrise as breathtaking now as in the past In nearly one hundred dazzling color photographs Lockwood brilliantly documents the Atchafalaya s timeless beauty He shows amazingly diverse and abundant wildlife rookeries with thousands of egrets and herons waters with billions of crawfish and ridges with deer squirrel and woodcock Waters run deep in Lockwood s soul as evidenced in his intimate treatment of the meandering bayous fringed with bald cypress trees the many glassy lakes reflecting vegetation into double images and the mighty Atchafalaya River the lifeline of the swamp No place in the world gives me such a feeling of peace as America s largest river basin swamp writes Lockwood In these pages he pays homage to the queen of U S wetlands     *Marsh Mission* ,2007     **Expressions of Place**
