Martin Buber And The Human Sciences:

Martin Buber and the Human Sciences Maurice Friedman, 2012-02-01 The specific focus of Martin Buber and the Human Sciences is dialogue as the foundation of and integrating factor in the human sciences using dialogue in the special sense which Buber has made famous mutuality presentness openness meeting the other in his or her uniqueness and not just as a content for one s own thought categories and knowing as deriving in the first instance from mutual contact rather than knowledge of a subject about an object By the human sciences the authors editors mean material that can be meaningfully approached in a dialogic way hence the humanities education psychology speech communication anthropology history sociology and economics The essays in Martin Buber and the Human Sciences demonstrate that thirty years after Buber s death his influence is still resonating in many countries and in many fields An Analysis of Martin Buber's I and Thou Simon Ravenscroft, 2018-05-20 Martin Buber's I and Thou argues that humans engage with the world in two ways One is with the attitude of an I towards an It where the self stands apart from objects as items of experience or use The other is with the attitude of an I towards a Thou where the self enters into real relation with other people or nature or God Addressing modern technological society Buber claims that while the I It attitude is necessary for existence human life finds its meaning in personal relationships of the I Thou sort I and Thou is Buber's masterpiece the basis of his religious philosophy of dialogue and among the most influential studies of the human condition in the 20th century Martin Buber and the Eternal Maurice S. undergraduate education from the point of view of a philosopher of communication Ronald C Arnett takes a positive view of higher education during a time when education is being assailed as seldom before Arnett responds to this criticism with convincing support of the academy reinforced by his personal experiences as well as those of others scholars and teachers Arnett s book is an invitation to converse about higher education as well as a reminder of the potential for dialogue between teacher and student dialogue that the author defines as a willingness to enter conversation about ideas to maintain relationships through differences and to ask value questions Arnett see education as more than the dispensing of information He emphasizes the importance of character development as well as the the development of relationships between students and teachers Arnett stresses the importance of honesty and integrity in students teachers and administrators and he insists that education should focus more on the good of the entire school than on the individual Arnett does not offer this book as the truth about education nor as a how to teach manual Rather he regards it as an attempt to understand education from a communication perspective and as a reminder of the positive and constructive aspects of teaching The book is based on Arnett s belief that educators who care about ideas and people not only improve education but also benefit the community Rediscovering Gandhi Jonathan K.
