Clark, 2017-04-19 This book is based on the premise that humankind is first and foremost the outcome of the process of biological evolution Recognition of this is fundamental to our understanding of who we are and how we behave All living things have evolved the physical and mental attributes that promote their prospects for survival they are good at doing the things that enable them to pass on their genes to succeeding generations and we are no exception Of course through the development of culture we have gained some freedom from our biological origins Nevertheless evolution has constructed the foundation upon which culture is built The first part of the book Ourselves Interacting with the World presents an overview of the main capabilities that evolution has endowed us with and that enable us to interact with the environment in advantageous ways This includes our senses which act as windows on the world and also of great importance our emotions and ability to remember Our ability to think is perhaps the crowning achievement of our evolutionary journey and of course we must be able to act in a timely and effective manner The second part of the book Living Together traces the history of how we became social creatures To be truly human we had to be capable of sharing and cooperation We also needed to be able to control our aggressiveness and talent for deception We settled down making the transition from hunter gatherers to urban dwellers and agreed upon values and norms of behavior that enhanced our ability to get along Ultimately we came to see good and bad as a morality of right and wrong further augmenting group cohesiveness In the final part of the book Challenges and Opportunities attention turns to a consideration of the constraints and possibilities that must be considered in looking to the future These realities can be seen to play out in four social arenas the pursuit of fairness the seeking of justice the interplay of political beliefs and good government and ultimately a united society that is at the same time a true community Our quest for these things will be greatly aided by a deep knowledge and appreciation of our evolutionary past and the indelible imprint it has left upon us It may even lead us to that most elusive of all things happiness

**Understanding Steven Millhauser** Earl G. Ingersoll, 2014-02-19 An exploration of the thematic interests and narrative strategies of a contemporary American master of fiction Earl Ingersoll introduces the fiction of Steven Millhauser whose distinguished career of more than four decades includes eight books of short fiction and four novels the latest being the Pulitzer Prize winning Martin Dressler 1996 In Understanding Steven Millhauser Ingersoll explores Millhauser's twelve

books chronologically revealing the development of a major contemporary American writer and a master of fiction who cares as deeply about his craft as the modernists did earlier in the past century While most examinations of an author's work begin with at least a biographical sketch Ingersoll has faced distinct challenges because Millhauser has resisted efforts to read his fiction through the lens of his biography Responding to an interviewer's request for a brief biography Millhauser provided the succinct 1943 Part of such resistance Ingersoll argues arises from Millhauser's belief that if readers have too many questions about an author's work the author has failed and no amount of response can redress that failure Millhauser's central characters such as August Eschenburg and J Franklin Payne are often themselves artists or technicians who are overreachers and Ingersoll shows that Millhauser's early expressions of literary realism have given way to interest in departures from the real For Millhauser stories like conjuring tricks are invented because history is inadequate to our dreams Millhauser's strength is the ability to sustain obsessions because works of fiction succeed insofar as they are able to supplant reality As a master fabulist Ingersoll argues Millhauser is preoccupied with extravagance both in the subject matter of his fiction and in his style Whether it involves Martin Dressler doing himself in by designing and constructing increasingly complex hotels or the miniaturists in the short story Cathay pushing their impulse to extremes past the eye's ability to see their art objects Millhauser's fiction is full of such an impulse which can produce prolific artists as well as compulsive lunatics The triumph of Millhauser's craft Ingersoll shows is that it merges a fascination with the relationship between imagination and experience with a precise and allusive prose to produce works seamlessly joining the everyday with the radical and fantastic in forms ranging from travelogues of the imagination to works merging the waking world with the world of dreams
