The Martin Marauder and the Franklin Allens Franklin S. Allen, 1980 **The Martin Marauder and the Franklin Allens** Donald J. Mrozek, Robin Higham, Jeanne Newell, 1980-01-01 **Aerospace Historian**, 1983 **Air Power And The Ground War In Vietnam, Ideas And Actions** Dr Donald J. Mrozek, 2015-11-06 Ultimately this study is about a smaller Vietnam War than that which is commonly recalled It focuses on expectations concerning the impact of air power on the ground war and on some of its actual effects but it avoids major treatment of some of the most dramatic air actions of the war such as the bombing of Hanoi To many who fought the war and believe it ought to have been conducted on a still larger scale or with fewer restraints this study may seem almost perverse emphasizing as it does the utility of air power in conducting the conflict as a ground war and without total exploitation of our most awe inspiring technology Although the chapters in this study are intended to form a coherent and unified argument each also offers discrete messages The chapters are not meant to be definitive They do not exhaust available documentary material and they often rely heavily on published accounts Nor do they provide a complete chronological picture of the uses of air power even with respect to the ground war Nor is coverage of areas in which air power was employed South Vietnam Laos Cambodia and North Vietnam evenly distributed nor necessarily proportionate to the effort expended in each place during the war Lastly some may find one or another form of air power either slightly or insufficiently treated Such criticisms are beside the point for the objectives of this study are to explore a comparatively neglected theme the impact of air power on the ground and to encourage further utilization of lessons drawn from the Vietnam experience **The Martin B-26 Marauder** John O. Moench, 1992 **World War II in Europe, Africa, and the Americas, with General Sources** Loyd Lee, 1997-08-21 A broadly interdisciplinary work this handbook discusses the best and most enduring literature related to the major topics and themes of World War II Military historiography is treated in essays on the major theaters of military operations and the related themes of logistics and intelligence while political and diplomatic history is covered in chapters on international relations resistance movements and collaboration The volume analyzes themes of domestic history in essays on economic mobilization the home fronts and women in the military and civilian life The book also covers the Holocaust This handbook approaches each topic from a global viewpoint rather than focusing on individual national communities Except for nonprint material the literature research and sources surveyed are primarily those available in English The volume is aimed at both experts on the war and the general academic community and will also be useful to students and serious laymen interested in the war *Rivenhall* Bruce Stait, 2011-10-15 A look at the changing history of the Essex airfield Rivenhall **Deadly Sky** John C. McManus, 2016-08-02 From the training camps to the combat missions this is war from the perspective of the young Americans who lived through it the pilots the bombardiers the navigators and the gunners of all the combat services in both Europe and in the Pacific It is an engaging and vivid portrayal of war in the skies from 1941 to 1945 Craig L Symonds Author of World War II at Sea John C

McManus author of *The Dead* and *Those About to Die* and *September Hope* reveals the terror and triumph that shared the fiery skies of World War II from the first dogfights over Europe to the last Kamikaze attacks over the Pacific This insightful chronicle takes readers inside the experiences of America's fighter pilots and bomber crews an incredible assortment of men who in nearly four years of warfare all over the globe suffered over 120 000 casualties with over 40 000 killed Their stories span the earth into every corner of the combat theaters in both Europe and the Pacific And the aircraft explored are as varied tough and legendary as the men who flew them from the indomitable heavy duty warhorse that was the B 17 Flying Fortress to the sleek lethal P 51 Mustang fighter In *Deadly Sky* master historian John C McManus goes beyond the familiar tales of aerial heroism capturing the sights and sounds the toil and fear the adrenaline and the pain of the American airmen who faced death with every mission In this important thoroughly researched work McManus uncovers the true nature of fighting and dying in the skies over World War II
