IMAX theaters to see jaw dropping footage from the wild and the venerable BBC still scores triumphs with series such as Planet Earth As cinematic technology brings ever more breathtaking images to the screen and as our direct contact with nature diminishes an ever expanding audience craves the indirect experience of wild nature that these films provide But this success has a dark side as Chris Palmer reveals in his authoritative and engrossing report on the wildlife film business A veteran producer and film educator Palmer looks past the headlines about TV host Steve Irwin s death by stingray and filmmaker Timothy Treadwell falling prey to his beloved grizzlies to uncover a more pervasive and troubling trend toward sensationalism extreme risk taking and even abuse in wildlife films He tracks the roots of this trend to the early days of the genre and he profiles a new breed of skilled ethical filmmakers whose work enlightens as well as entertains and who represent the future that Palmer envisions for the industry he loves **Bowker's Complete Video Directory 2001** ,2001

Earning My Spots Mark Eastburn,2016-11-01 Sam and his family are the only werehyenas in their town and they do their best to keep up their cover in front of the humans while the other more aggressive shifters mock the werehyena family for being weak and passive But Sam sees no other life for himself as he believes what he is told he is inferior to the other shifters One night a pack of shifters raids Sam s house and takes his family leaving him all alone With the help of some new friends Sam sets off on a journey from Maine to South America to rescue his family Along the way he meets various shifters who aid him on his quest He even meets a tribe of werehyenas in Louisiana who teach him how powerful his kind actually is and how far his ancestry goes back From them Sam learns he has a great destiny to fulfill As Sam draws closer to finding his family he begins to understand how different the world of shifters is that exists outside of his small hometown Shifters are tired of humans destroying their homes and they want not only revenge but also to force humans into submission It becomes clear that Sam is the only one who can stop a war that s on the brink of erupting Fans of the Spirit Animals and Warriors series will enjoy accompanying Sam on his quest as he discovers not only that his destiny and inner strength are greater than he thought but also that being a werehyena is not as laughable as he assumed **Landers Film Reviews** ,1986 *Flight*

Maps: adventures With Nature In Modern America Jennifer Jaye Price, 1999-04-22 A quirky brilliant debut book that explores the evolution of our relationship to nature and the ways in which we attach meaning to it today Flight Maps should find its place on any bookshelf with the likes of David Quammen and John McPhee The American Spectator ,1996 **Scene, Channel 2 and 17** ,1990 **Wildlife Films** Derek Bousé, 2011-11-29 If as many argue movies and television have become Western culture's premier storytelling media so too have they become for most members of society the primary source of encounters with the natural world particularly wild animals The television fare offered nightly by national and cable networks such as PBS and the Discovery Channel provides millions of viewers with their only experience of the wilderness and its inhabitants The very films that so many viewers take as accurate portrayals of wildlife however have evolved primarily as a form of entertainment following the established codes and conventions of narrative exposition The result has been not the representation of nature but its wholesale reconstruction and reconfiguration according to film and television conventions audience expectations and the demands of competition in the media marketplace Wildlife Films traces the genealogy of the nature film from its origins as the animal locomotion studies that mark the very beginnings of motion pictures themselves to the founding of the Animal Planet cable channel that boasts all animals all the time The narrative and thematic elements that unite wildlife films as a genre have their roots not in the documentary film tradition but in the older traditions of oral and written animal fables as reflections of human society Derek Bous contends that classic wildlife films often portray animal protagonists living in families modeled on an ideal of the human nuclear family and working in communities that resemble an ideal of bucolic human society In these stories presented as documentaries animals are motivated by human emotions and conduct relationships according to human customs This imposition of culturally satisfying narrative patterns upon the lives of animals has not only led to the misrepresentation of the natural world it has promoted the notion that our values our moral vision our models of society and family structure derive from nature rather than being cultural formations Sightlines ,1981 **Science Books & Films** ,1982 **BBC Wildlife** ,1997 **Library Journal** ,1982
