building worlds has been only taught to writers of novels or films The same worlds are frequently used across different modes of media but successfully adapting them to games or building them for this purpose requires a specific approach Unlike all other artforms games mandate participation with the audience stepping into the world of the game and taking on the roles that the rules and pieces demand of them Likewise whenever an audience engages with a fictional world they are inherently playing a game of make believe and imagining themselves within a different context This makes world building and gaming a perfect match with each element giving more power to the other This book unlocks exactly how the two disciplines are entwined and work together and how a designer can harness that synergy to the best effect The text is composed of short focused chapters that explain every step of building a compelling world from getting your first ideas to moving towards publication It also provides a deeper understanding of the how and why of world creation and why worlds have so much power over us as players and as people Covers every step of world creation from getting ideas to seeking publication A comprehensive analysis of the field Inspirational tricks to break blocks or find new angles Practical exercises at the end of every chapter Simple and accessible for every kind of game or game designer

*Third Person* Pat Harrigan, Noah Wardrip-Fruin, 2017-03-03 Narrative strategies for vast fictional worlds across a variety of media from World of Warcraft to The Wire The ever expanding capacities of computing offer new narrative possibilities for virtual worlds Yet vast narratives featuring an ongoing and intricately developed storyline many characters and multiple settings did not originate with and are not limited to Massively Multiplayer Online Games Thomas Mann's Joseph and His Brothers J R R Tolkien's Lord of the Rings Marvel's Spiderman and the complex stories of such television shows as Dr Who The Sopranos and Lost all present vast fictional worlds Third Person explores strategies of vast narrative across a variety of media including video games television literature comic books tabletop games and digital art The contributors media and television scholars novelists comic creators game designers and others investigate such issues as continuity canonicity interactivity fan fiction technological innovation and cross media phenomena Chapters examine a range of topics including storytelling in a multiplayer environment narrative techniques for a 3 000 000 page novel continuity or the impossibility of it in Doctor Who managing multiple intertwined narratives in superhero comics the spatial experience of the Final Fantasy role playing games World of Warcraft adventure texts created by designers and fans and the serial storytelling of The Wire Taken together the multidisciplinary conversations in Third Person along with Harrigan and Wardrip Fruin's earlier collections First Person and Second Person offer essential insights into how fictions are constructed and maintained in very different forms of media at the beginning of the twenty first century
