*The Marvels of Animal Behavior* ,1972      **Animal Families** ,1974      **Perspectives on Animal Behavior** Judith Goodenough,Betty McGuire,Elizabeth Jakob,2009-09-22 The third edition of a successful and effective book for the introductory course in Animal Behavior The text includes strong supportive reviews a balanced approach and the latest in research and findings The author is known for an accessible and easy to understand writing style making the most difficult topics understandable      *Sociobiology and the Human Dimension* Georg Breuer,1983-01-13 This book is about animals and humans their common features and their gradual and principle differences It tells of democracy in baboons prostitution in hummingbirds bigamy in wrens baby sitting in jackals of chimpanzees at the computer console and of the super ego of dogs but it is also about the labour productivity of hunter and gatherer peoples incest avoidance in animals and humans and of the myths about matriarchy In a language accessible to any interested layman Georg Breuer gives a balanced account of the main ideas and achievements of sociobiology and the main criticisms levelled against it According to him sociobiology has given many a valuable impetus but sometimes presents a distorted or one sided view In particular it has not answered or addressed the question of why man and man only is able to identify and feel sympathy with any other human being The evolution of this most human of all traits confers on us the capability for charity and solidarity and for the happiness of true love which is unattainable by any animal      *Sociobiology* Edward O. Wilson,2000-03-24 When this classic was first published in 1975 it created a new discipline and started a tumultuous round in the nature versus nurture debate In the introduction to this edition Wilson shows how research in human genetics and neuroscience over the past quarter of a century has strengthened the case for a biological understanding of human nature      **Primate Ecology: Studies of Feeding and ranging Behavior in Lemurs, Monkey and apes** T.H. Chimpanzees fascinate people for many reasons We are struck by the apes resemblance to humanity as seen in their use of tools and their complex social lives and we are moved by the threats that human activity poses to them Our awareness of our closest living relatives testifies to the efforts of the remarkable people who study these creatures and work to protect them What motivates someone to dedicate their lives to chimpanzees How does that reflect on our own species This book brings together a range of chimpanzee experts who tell powerful personal stories about their lives and careers It features some of the world s preeminent primatologists including Jane Goodall and Frans de Waal as well as representatives of a new generation from varied backgrounds In addition to field scientists the book features anthropologists biologists psychologists veterinarians conservationists and the director of a chimpanzee sanctuary Some grew up in the English countryside others in villages in Congo some first encountered chimpanzees in a zoo others in the forests surrounding their homes All are united by a common purpose to study and understand chimpanzees in order to protect them in the wild and care for them in zoos and sanctuaries Contributors share what inspired them what shaped their career choices and what motivates them to strive for solutions to the many challenges that chimpanzees face today **The Langurs of Abu** Sarah Blaffer Hrdy, 1980 The Langurs of Abu will for many years remain one of the major studies of wild primates both for its observational and theoretical content Alison Jolly Sexual combat is not a monopoly of the human species As Sarah Blaffer Hrdy argues in this spellbinding book war between male and female animals has deep roots in evolutionary history Her account of family life among hanuman langurs the black faced gray monkeys inhabiting much of the Indian subcontinent is written with force wit and at times sorrow Male hanumans in pursuit of genetic success routinely kill babies sired by their competitors The mothers of endangered infants counter with various strategems to deceive the males and prevent destruction of their own offspring Competition and selfishness are dominant themes of langur society Competition among males for access to females competition among females for access to food resources and disregard by one female for the well being of another s infant these are some very common examples Yet there are also moments of heroic self sacrifice as when an elderly female rushes to defend her troop and its babies from an invading infanticidal male The Langurs of Abu is the first book to analyze behavior of wild primates from the standpoint of both sexes It is also a poignant and sophisticated exploration of primate
