Marxism And Asia An Introduction With Readings:

Marxism and Asia Stuart Reynolds Schram, H      Carr    d'Encausse, 1969

with Readings Helene Carrere d'Encausse, *Marxism in Asia (RLE Marxism)* Colin Mackerras, Nick Knight, 2015-04-17

Marxism is a theory which originated in the context of nineteenth century industrialised Europe. Despite its European origins, Marxism has actually found greatest significance as a doctrine for change in the context of the underdeveloped peasant societies of Asia. This paradox has only been resolved through adaptation of Marxism to suit the specific features of particular Asian societies. There has consequently been a differentiation of Marxism along national lines. In this book first published in 1985, the theoretical and practical implications for this national differentiation of a universal European theory are explored, followed by a more detailed analysis of the manner in which Marxism has developed during different historical periods in particular Asian contexts.

Marxism and Asia Stuart Reynolds Schram, 1969

Karl Marx's Theory of Revolution I Hal Draper, 1977. Volume I of Hal Draper's definitive and masterful study of Marx's political thought, which focuses on Marx's attitude toward democracy, the state, intellectuals as revolutionaries, and much, much more. This series, Karl Marx's Theory of Revolution, represents an exhaustive and definitive treatment of Marx's political theory, policy, and practice. Marx and Engels paid continuing attention to a host of problems of revolution in addition to constructing their grand theory. All these political and social analyses are brought together in these volumes, as the author draws not only on the original writings of Marx and Engels but also on the sources that they used in formulating their ideas and the many commentaries on their published work. Draper's series is a massive and immensely valuable scholarly undertaking. The bibliography alone will stand as a rich resource for years to come. Yet, despite the scholarly treatment, the writing is direct, forceful, and unpedantic throughout and will appeal to the beginning student as much as the advanced reader.

Marx, Engels and National Movements (RLE Marxism) Ian Cummins, 2023-05-31

While their attempts to understand the workings of capitalism led them to the conclusion that the advanced societies of Western Europe were those most likely to be the setting for a successful socialist revolution, Marx and Engels by no means ignored developments outside this region. Indeed, given the configurations of international politics in their time, plus their conception of capitalism as a universalising system, they believed that some of the forces working for change in less advanced regions could even affect the prospects of a proletarian revolution in Western Europe itself. This book, first published in 1980, traces the development of Marx and Engels' attitudes towards and relations with the principal national movements of their time. It deals with their responses to such movements in areas as diverse as Ireland and India, Poland and China, and Russia and the United States, as well as in many other regions. Many of Marx and Engels' most significant statements on the national question were made in their journalism, occasional addresses, and private correspondence, sources not always readily accessible to or even known by some of their more immediate successors. Subsequent publication of this previously dispersed

material has enabled a more coherent picture of their ideas on the subject to be drawn Marx and Engels believed that national aspirations and the cause of socialism did not always go hand in hand and each national struggle had to be examined on its merits and judged according to whether its success would retard or enhance the prospects of a socialist revolution Based on a wide range of sources this study examines an important yet neglected area of Marx and Engels ideas and activities and indicates the criteria by which they determined their attitudes at different times to a variety of national movements at work in four continents Dialectical Materialism Zedong Mao,Nick Knight,2016-09-16 New and annotated translations of philosophical essays written by Mao Zedong in 1937 which have come to be regarded as a cornerstone in the development of Chinese Marxism The editor analyzes their textual philosophical and historical significance *Problems of Communism* ,1971 **The USSR and the Muslim World** Yaacov Ro'i,2015-07-16 The large and rapidly increasing Muslim population of the USSR put an immense strain on the Soviet political system dominated as it is by Russians The problems were not confined to internal tensions between ethnic groups but extend also to relations with neighbouring Muslim states as the invasion of Afghanistan graphically illustrated This volume first published in 1984 addresses this field of unique importance Topics covered encompass the living standards of the Soviet Muslim population the religious revival relations with the Arab world the Soviet experience of guerrilla warfare in Afghanistan and many more In short it provides coverage of the sociological political cultural economic ideological and international dimensions of Soviet Muslim relations **The New Practical Guide to Canadian Political Economy** Daniel Drache,Wallace Clement,1985-01-01 The New Practical Guide to Canadian Political Economy is a handy reference to the vast range of research and writing that political economists in Canada have completed to the date of publication The book is divided into twenty five subject bibliographies each one compiled and introduced by an expert in the field The overall range of subjects includes economic development in Canada Canada s external economic relations regional disparities and regional development social and economic classes women Native peoples politics and the Canadian state nationalism culture and political thought The book is indexed by author and includes a helpful shortlist of the staples in Canadian political economy Published in 1985 The New Practical Guide to Canadian Political Economy remains a useful reference to some of the classic literature of the discipline *Nationalism and International Society* James Mayall,1990-02-23 Geared to the interests of modern historians of world decolonization and economic nationalism this study of international relations will provide insight into issues relevant to nationalism and international society *Cosmopolitan Elites and the Making of Globality* Leonie Wolters,2024-01-11 As ideologies such as communism fascism and various nationalisms vied for global domination during the first half of the 20th century this book shows how a specific group of individuals a cosmopolitan elite became representatives of those ideologies the world over Centering on the Indian intellectual M N Roy *Cosmopolitan Elites and the Making of Globality* situates his life within various social circles that covered several ideological realms and continents An example of an individual who represented ideologies

such as anticolonial nationalism communism and humanism Roy is identified as unusual but by no means singular in this capacity and shows how other elites were similarly able to represent ideologies that sought to make the world anew This book explores how Roy and his peers and competitors became a political elite as they cultivated a cosmopolitan reputation that meant they were taken seriously even when speaking of regions outside of their own By considering the social and performative practices that turned them into credible global cosmopolitans Wolters uncovers the exclusive basis on which the universal claims of world changing ideologies were made *Rethinking Modern Political Theory* John Dunn,1985-06-06

This volume of essays discusses the weaknesses in modern political theory and suggests how they might begin to be remedied *What Is Antiracism?* Arun Kundnani,2023-06-13 This scintillating intellectual and political history provides a new understanding of racism and a better way to fight it Liberals have been arguing for nearly a century that racism is fundamentally an individual problem of extremist beliefs Responding to Nazism thinkers like gay rights pioneer Magnus Hirschfeld and anthropologist Ruth Benedict called for teaching people especially poor people to be less prejudiced Here lies the origin of today s liberal antiracism from diversity training to Hollywood activism Meanwhile a more radical antiracism flowered in the Third World Anticolonial revolutionaries traced racism to the broad economic and political structures of modernity Thinkers like C L R James Claudia Jones and Frantz Fanon showed how racism was connected to colonialism and capitalism a perspective adopted even by Martin Luther King Today liberal antiracism has proven powerless against structural oppression As Arun Kundnani demonstrates white liberals can heroically confront their own whiteness all they want yet these structures remain This deeply researched and swift moving narrative history tells the story of the two antiracisms and their fates As neoliberalism reordered the world in the last decades of the twentieth century the case became clear fighting racism means striking at its capitalist roots **Sociology and Development** Emanuel De Kadt,Gavin Williams,2013-10-11
