Marxism In The Chinese Revolution:

Marxism in the Chinese Revolution Arif Dirlik, 2005-06-07 Representing a lifetime of research and writing by noted historian Arif Dirlik the essays collected here explore developments in Chinese socialism and the issues that have occupied historians of the Chinese revolution for the past three decades Dirlik engages Chinese socialism critically but with sympathy for the aspirations of revolutionaries who found the hope of social political and cultural liberation in Communist alternatives to capitalism and the intellectual inspiration to realize their hopes in Marxist theory The book's historical approach to Marxist theory emphasizes its global relevance while avoiding dogmatic and Eurocentric limitations These incisive essays range from the origins of socialism in the early twentieth century through the victory of the Communists in mid century to the virtual abandonment by century's end of any pretense to a socialist revolutionary project by the leadership of the Chinese Communist Party All that remains of the revolution in historical hindsight are memories of its failures and misdeeds but Dirlik retains a critical perspective not just toward the past but also toward the ideological hegemonies of the present Taken together his writings reaffirm the centrality of the revolution to modern Chinese history They also illuminate the fundamental importance of Marxism to grasping the flaws of capitalist modernity despite the fact that in the end the socialist response was unable to transcend the social and ideological horizons of capitalism

Marxism and the Chinese Experience Arif Dirlik, Maurice J. Meisner, 1989 These essays consider the implications for Chinese socialism of the repudiation of the Cultural Revolution and the legacy of Mao Zedong as well as the meaning of the new definition and direction Mao's successors have given socialism The themes have been selected for conceptual coherence within a socialist problematic of social change Representing anthropology art history economics history literature and politics various inquiries point in a twofold direction the meaning of socialism for China and the meaning of Chinese Socialism for socialism as a global phenomenon meaning not in some abstract sense but rather as it is constituted in the process of political ideological activity which articulates and defines social relationships within China as well as China's relationship to the world

Mao Zedong and the Chinese Revolution Gregor Benton, 2008 Comprehensively indexed and with an introduction newly written by the editor a leading expert in the field Mao Zedong and the Chinese Revolution is sure to be recognized as a vital reference resource for all serious Mao scholars

Marxism in the Chinese Revolution Arif Dirlik, 2005 Representing a lifetime of research and writing by noted historian Arif Dirlik the essays collected here explore developments in Chinese socialism and the issues that have occupied historians of the Chinese revolution for the past three decades Dirlik engages Chinese socialism critically but with sympathy for the aspirations of revolutionaries who found the hope of social political and cultural liberation in Communist alternatives to capitalism and the intellectual inspiration to realize their hopes in Marxist theory The book's historical approach to Marxist theory emphasizes its global relevance while avoiding dogmatic and Eurocentric limitations These incisive essays range from the origins of socialism in the early twentieth century through the victory of the

Communists in mid century to the virtual abandonment by century s end of any pretense to a socialist revolutionary project by the leadership of the Chinese Communist Party All that remains of the revolution in historical hindsight are memories of its failures and misdeeds but Dirlik retains a critical perspective not just toward the past but also toward the ideological hegemonies of the present Taken together his writings reaffirm the centrality of the revolution to modern Chinese history They also illuminate the fundamental importance of Marxism to grasping the flaws of capitalist modernity despite the fact that in the end the socialist response was unable to transcend the social and ideological horizons of capitalism **A Place**

In The Sun A. James Gregor, 2019-04-16 China has endured a century of turmoil beginning with the anti dynastic revolution associated with Sun Yat Sen through the military and tutelary rule of Chiang Kai shek the revolutionary regime of Mao Zedong and the radical reforms of Deng Xiaoping China has had little respite Historians and social scientists have attempted to understand some of this history as being the consequence of the impact of European ideologies including Marxism Marxism Leninism and Fascism Rarely instructive or persuasive the discussions regarding this issue have more often than not led to puzzlement rather than enlightenment In *A Place in the Sun* A James Gregor offers an interpretation of the role of European Marxist and Fascist ideas on China s revolutionaries that is both original and based on a lifetime of scholarship devoted to revolutionary ideologies Gregor renders a detailed analysis of their respective influence on major protagonists In the exposition Gregor reveals an unsuspected and complex set of relationships between the Chinese revolution and essentially European ideologies His discussion concludes with a number of estimations that suggest implications for the future of modern China and its relationship with the advanced industrial democracies How post Dengist China the world s most populous nation is to be understood remains uncertain to most comparativists and historians Gregor provides one well supported alternative and he is carefully attentive to the implications of this alternative **Origins of the Chinese**

Revolution, 1915-1949 Lucien Bianco, 1971 Analyzes the internal pressures and social crises that fostered the beginnings of the Chinese Revolution **Revolution and History** Arif Dirlik, 1989-09-18 A fascinating contribution to Marxist historiography and to the history of Marxist historiography Dirlik s story of the reemergence of the modes of production debate in the early years of the Chinese revolution has much to tell us about that debate itself and not least about its intimate relationship to political practice and revolutionary strategy Fredric Jameson Duke University *The Chinese Revolution, 1900-1950* Ranbir Vohra, 1974 *Anarchism in the Chinese Revolution* Arif Dirlik, 1991 Arif Dirlik s latest offering is a revisionist perspective on Chinese radicalism in the twentieth century He argues that the history of anarchism is indispensable to understanding crucial themes in Chinese radicalism And anarchism is particularly significant now as a source of democratic ideals within the history of the socialist movement in China Dirlik draws on the most recent scholarship and on materials available only in the last decade to compile the first comprehensive history of his subject available in a Western language He emphasizes the anarchist contribution to revolutionary discourse and elucidates this theme through

detailed analysis of both anarchist polemics and social practice The changing circumstances of the Chinese revolution provide the immediate context but throughout his writing the author views Chinese anarchism in relation to anarchism worldwide

Chinese Marxism Adrian Chan, 2003-06-29 This groundbreaking study of Chinese Marxism examines the ideology and praxis of Marxism as it has developed in China from its earliest beginnings to current debates This is the first systematic full length analysis of the development and nature of Marxist ideology in China Adrian Chan challenges established scholarship in both the West and China which continues to be overshadowed by Cold War dogma and party orthodoxy respectively It has long been argued that Chinese Marxism was merely an offshoot of Soviet thought blended with ill defined traditional Chinese ideas Using previously neglected Chinese sources including newspapers political journals and communist party documents Chan refutes this Showing how the first Chinese revolutionaries were directly influenced by the writings of Marx Chinese Marxism argues that Bolshevism was a secondary influence on Chinese communist thought Mao himself drew upon Marxian themes in the creation of party orthodoxy In doing so he signalled his differences from Lenin and Stalin on important issues of theory and practice However not all party leaders accepted this Marxian praxis This has led to continuous conflict between proponents of Maoist Marxism and Soviet type scientific Marxism Leninism Chinese Marxism presents detailed studies of the Great Leap Forward and the Cultural Revolution to illustrate the consequences of this ongoing ideological conflict and brings the story up to the present day with an analysis of the current Thermidorean Reaction and the controversial embracing of Confucianism

Dialectic of the Chinese Revolution Jiwei Ci, 2022 Behind the profound social and economic changes now taking place in China is a complex history of communism s invention and loss of meaning This history from 1949 to the present has been extensively studied by scholars using the methods of history and political science Dialectic of the Chinese Revolution makes an innovative departure from these studies through a series of reflections on the history of communist China as a history of consciousness It focuses on important aspects of the Chinese experience such as memory and amnesia energy and meaning and the center and periphery mentality that are amenable more to a philosophical and psychological approach than to an empirical one The author goes beyond the concept of utopianism that is customarily applied to the Chinese communist experience by viewing this epoch in terms of the movement from utopianism to nihilism to hedonism He traces the path of Chinese communism from the early belief that denial and hard work combined with Marxism and Maoism would create a utopia of material and spiritual abundance to the disappointment of this belief and the ensuing search for individual pleasure and prosperity In this progression which the author describes as the unfolding of the hedonistic potential of utopianism Marxism became China s road to capitalism and consumerism The book consists of essays that approach the trajectory of utopianism nihilism hedonism from six different viewpoints the impact of Marxism on China s relationship to itself and to the West the manipulation of language and cultural memory the effects of founding morality on a revolutionary teleology the tension

between the ascetic and the hedonistic aspects of utopianism the paralysis of the will resulting from continual mobilizations and failures and the relationship of past present and future as mirrored in constantly shifting beliefs Rethinking Mao

Nick Knight,2007-01-01 Rethinking Mao offers an innovative perspective on the thought of Mao Zedong the major architect of the Chinese Revolution and leader of the People s Republic of China until his death in 1976 Utilizing a number of recently discovered documents written by Mao Nick Knight rethinks Mao by subjecting a number of controversial themes to fresh scrutiny This book provides a sophisticated analysis of Mao s views on the role of the peasants and working class in the Chinese revolution his theoretical attempt to make Marxism appropriate to Chinese conditions and his understanding of the Chinese road to socialism Knight includes a discussion of the theoretical difficulties in interpreting Mao s thought Rethinking Mao represents a challenge to many of the conventional accounts of Mao and his thoughts This book will appeal to scholars and students of Chinese history and politics as well as the history of Marxism in China **An Examination of**

China ,1977 Previously untranslated writings of Chinese revolutionaries a group termed ultra left by the Peking establishment They present their views on socialist democracy Maoist ideology and China s future Marxism in Asia Colin Mackerras,Nick Knight,2015-04-17 Marxism is a theory which originated in the context of nineteenth century industrialised Europe Despite its European origins Marxism has actually found greatest significance as a doctrine for change in the context of the underdeveloped peasant societies of Asia This paradox has only been resolved through adaptation of Marxism to suit the specific features of particular Asian societies There has consequently been a differentiation of Marxism along national lines In this book first published in 1985 the theoretical and practical implications for this national differentiation of a universal European theory are explored followed by a more detailed analysis of the manner in which Marxism has developed during different historical periods in particular Asian contexts
