Marxism Leninism A Flourishing Science:

Marxism-Leninism, a Flourishing Science Boris Nikolaevich Ponomarev,1979-01-01 *Marxism-Leninism, a Flourishing Science* Boris Nikolaevich Ponomarev, **Stalin and the Soviet Science Wars** Ethan Pollock,2021-05-11

Between 1945 and 1953 while the Soviet Union confronted postwar reconstruction and Cold War crises its unchallenged leader Joseph Stalin carved out time to study scientific disputes and dictate academic solutions He spearheaded a discussion of scientific Marxist Leninist philosophy edited reports on genetics and physiology adjudicated controversies about modern physics and wrote essays on linguistics and political economy Historians have been tempted to dismiss all this as the megalomaniacal ravings of a dying dictator But in *Stalin and the Soviet Science Wars* Ethan Pollock draws on thousands of previously unexplored archival documents to demonstrate that Stalin was in fact determined to show how scientific truth and Party doctrine reinforced one another Socialism was supposed to be scientific and science ideologically correct and Stalin ostensibly embodied the perfect symbiosis between power and knowledge Focusing on six major postwar debates in the Soviet scientific community this elegantly written book shows that Stalin's forays into scholarship can be understood only within the context of international tensions institutional conflicts and the growing uncertainty about the proper relationship between scientific knowledge and Party dictated truths The nature of Stalin's interventions makes clear that more was at stake than high politics these science wars were about asserting that the Party was rational and modern and about codifying the Soviet worldview in a battle for the hearts and minds of people around the globe during the early Cold War Ultimately however the effort to develop a scientific basis for Soviet ideology undermined the system's legitimacy [The personality cult of Stalin in Soviet posters, 1929-1953](#) Anita Pisch,2016-12-16 From 1929 until 1953 Iosif Stalin's image became a central symbol in Soviet propaganda Touched up images of an omniscient Stalin appeared everywhere emblazoned across buildings and lining the streets carried in parades and woven into carpets and saturating the media of socialist realist painting statuary monumental architecture friezes banners and posters From the beginning of the Soviet regime posters were seen as a vitally important medium for communicating with the population of the vast territories of the USSR Stalin's image became a symbol of Bolshevik values and the personification of a revolutionary new type of society The persona created for Stalin in propaganda posters reflects how the state saw itself or at the very least how it wished to appear in the eyes of the people The Stalin who was celebrated in posters bore but scant resemblance to the man Iosif Vissarionovich Dzhugashvili whose humble origins criminal past penchant for violent solutions and unprepossessing appearance made him an unlikely recipient of uncritical charismatic adulation The Bolsheviks needed a wise nurturing and authoritative figure to embody their revolutionary vision and to legitimate their hold on power This leader would come to embody the sacred and archetypal qualities of the wise Teacher the Father of the nation the great Warrior and military strategist and the Saviour of first the Russian land and then the whole world This book is the first dedicated study on the marketing of Stalin in Soviet

propaganda posters Drawing on the archives of libraries and museums throughout Russia hundreds of previously unpublished posters are examined with more than 130 reproduced in full colour The personality cult of Stalin in Soviet posters 1929-1953 is a unique and valuable contribution to the discourse in Stalinist studies across a number of disciplines

The Social and Economic Roots of the Scientific Revolution Gideon Freudenthal, Peter McLaughlin, 2009-05-20 The texts of Boris Hessen and Henryk Grossmann assembled in this volume are important contributions to the historiography of the Scientific Revolution and to the methodology of the historiography of science They are of course also historical documents not only testifying to Marxist discourse of the time but also illustrating typical European fates in the first half of the twentieth century Hessen was born a Jewish subject of the Russian Czar in the Ukraine participated in the October Revolution and was executed in the Soviet Union at the beginning of the purges Grossmann was born a Jewish subject of the Austro-Hungarian Kaiser in Poland and served as an Austrian officer in the First World War afterwards he was forced to return to Poland and then because of his revolutionary political activities to emigrate to Germany with the rise to power of the Nazis he had to flee to France and then America while his family which remained in Europe perished in Nazi concentration camps Our own acquaintance with the work of these two authors is also indebted to historical context under incomparably more fortunate circumstances the revival of Marxist scholarship in Europe in the wake of the student movement and the professionalization of history of science on the Continent We hope that under the again very different conditions of the early twenty-first century these texts will contribute to the further development of a philosophically informed socio-historical approach to the study of science

The Philosophical Heritage of V. I. Lenin and Problems of Contemporary War Arsenii Stepanovich Milovidov, Vladimir Georgievich Kozlov, 1974 **Essays on the arts and sciences** Miloslav Rechcigl, 2019-02-01 To celebrate the 270th anniversary of the De Gruyter publishing house the company is providing permanent open access to 270 selected treasures from the De Gruyter Book Archive Titles will be made available to anyone anywhere at any time that might be interested The DGBA project seeks to digitize the entire backlist of titles published since 1749 to ensure that future generations have digital access to the high quality primary sources that De Gruyter has published over the centuries

Men Out of Focus Marko Dumančić, 2020-12-16 Men Out of Focus charts conversations and polemics about masculinity in Soviet cinema and popular media during the liberal period often described as The Thaw between the death of Stalin in 1953 and the invasion of Czechoslovakia in 1968 The book shows how the filmmakers of the long 1960s built stories around male protagonists who felt disoriented by a world that was becoming increasingly suburbanized rebellious consumerist household oriented and scientifically complex The dramatic tension of 1960s cinema revolved around the male protagonists inability to navigate the challenges of postwar life Selling over three billion tickets annually the Soviet film industry became a fault line of postwar cultural contestation By examining both the discussions surrounding the period's most controversial movies as well as the cultural context in which these debates happened the book captures the official and popular reactions

to the dizzying transformations of Soviet society after Stalin **Revolutions and Revolutionists** Robert Blackey,1982
