Boffo**

Marxism Central Planning And The Soviet Economy:

Marxism, Central Planning, and the Soviet Economy Alexander Erlich, Padma Desai, 1983-01 This book contains important contributions by prominent economic theorists among them Paul Samuelson and Kenneth Arrow and by leading experts on Marxist economic thought and the Soviet economy such as Abram Bergson The book opens with an introductory essay by Padma Desai on the life and work of Alexander Erlich the distinguished Russian born economist and Sovietologist Essays in the first part of the book focus on central tenets in Marxist economic theory and are by Samuelson Marx without Matrixes Understanding the Rate of Profit Duncan Foley and John Roemer The book s second part covers resource allocation and international comparisons of Centrally Planned Economies CPEs Arrow Desai and Ricardo Martin and Richard Ericson address the issues of efficient resource allocation Bergson and Martin Weitzman deal in separate essays with the problems of comparing CPE economic performance with that of a market economy whereas Franklyn Holzman discusses the interactions between CPEs and market economies in his study of dumping The Polish Golf Cart Case Richard Portes compares central planners and monetarists suggesting that they might be fellow travelers who follow the same economic road for a considerable distance before their paths diverge The final part of the book explores several key aspects of the Soviet economy Holland Hunter writes on Soviet planning in the 1930s and Gregory Grossman in Economics of Virtuous Haste examines post revolutionary industrialization Joseph Berliner discusses the issues of social structure and fertility and in the final essay Robert Campbell reviews energy pricing policies and decisions on energy use in the USSR Padma Desai is Professor of Economics and a member of the Executive Committee of the W Averell Harriman Institute for Advanced Study of the Soviet Union at Columbia University

The Elgar Companion to Marxist Economics Ben Fine, Alfredo Saad-Filho, Marco Boffo, 2012-01-01 This Companion takes stock of the trajectory achievements shortcomings and prospects of Marxist political economy It reflects the contributors shared commitment to bringing the methods theories and concepts of Marx himself to bear across a wide range of topics and perspectives and it provides a testimony to the continuing purpose and vitality of Marxist political economy As a whole this volume analyzes Marxist political economy in three areas the critique of mainstream economics in all of its versions the critical presence of Marxist political economy within and its influence upon each of the social science disciplines and cutting across these the analysis of specific topics that straddle disciplinary boundaries Some of the contributions offer an exposition of basic concepts accessible to the general reader laying out Marx s own contribution its significance and subsequent positions and debates with and within Marxist political economy The authors offer assessments of historical developments to and within capitalism and of its current character and prospects Other chapters adopt a mirror image approach of pinpointing the conditions of contemporary capitalism as a way of interrogating the continuing salience of Marxist analysis This volume will inform and inspire a new generation of students and scholars to become familiar with Marxist political economy from an enlightened and unprejudiced position and to use

their knowledge as both a resource and gateway to future study

Plans and Disequilibria in Centrally Planned

Economies W. Charemza, M. Gronicki, 2014-06-28 The purpose of this study is to investigate interrelations between planning mechanisms and disequilibria in a case where the planning decisions are centralized and are exogenously given to enterprises The first introductory chapter is intended to provide an understanding of Poland's economic situation during the period under research In the next five chapters the basic model describing the households planners relations in terms of consumption labour money and plans are derived estimated used for calculation of excess demands for simulation of some monetary policies and finally for providing optimal control experiments in which consumption excess demand is minimized on a reasonable level of the consumption volume In the next two chapters the basic model is gradually extended and the last chapter summarizes the results by formulating a more effective macroeconomic policy

The Socialist System

Janos Kornai, 1992-05-28 This book provides a comprehensive account of the structure conduct and performance of the centrally planned economies of Eastern Europe the USSR Communist China and the Marxist LDCs looking at 26 nations in all The author focuses on reform perhaps the most important issue facing countries such as the USSR Poland Hungary and China Bureaucracy soft budget constraints markets and the nature of the socialist state are the central issues that arise in the course of reforming a socialist economy The first half of the book deals with classical socialism and provides a theoretical summary of the main features of a now closed period of history The second half deals with the processes of reform and concludes that the reform of classical socialist systems is doomed to failure as they are unable to renew themselves internally

From Marx to the Market Wlodzimierz Brus, Kazimierz Laski, 1989-11-23 BL With a new preface by the authors This is an important work of original scholarship by two of the most distinguished East European economists now working in the West The authors both of whom were involved in the Planning Office of the Polish economy in the 1950s and 1960s present here the results of their efforts to develop theoretically a system of economic management which could in practice avoid the worst excesses of both market capitalism and central planning The conclusions derived from this analysis are shown to open up a new dimension to the socialism versus capitalism controversy which has dominated much of the world throughout the twentieth century and which is especially significant as the countries of East and Central Europe re structure their economies

Models of Disequilibrium and Shortage in Centrally Planned Economies C.M. Davis, W. Charemza, 2012-12-06 The centrally planned economies CPEs of the Soviet Union and Eastern Europe have experienced severe imbalances in domestic and external markets over the past several decades As a result they have been chronically afflicted by problems such as excess demand repressed inflation deficits of commodities queues waiting lists and forced savings Economists have responded to these phenomena by developing appropriate theoretical and empirical models of CPEs Of particular note have been the pioneering studies of Richard Portes on disequilibrium econometric models and Janos Kornai on the shortage economy Each approach has attracted followers who have produced numerous innovative macro and microeconomic models

of Poland Czechoslovakia the German Democratic Republic Hungary and the USSR These models have proved to be of considerable value in the analysis of the causes consequences and remedies of disequilibrium phenomena Inevitably the new research has also generated controversies both between and within the schools of shortage and disequilibrium modelling concerning the fundamental nature of the socialist economy theoretical concepts and definitions the specification of models estimation techniques interpretation of empirical findings and policy recommendations Furthermore the research effort has been energetic but incomplete so many gaps exist in the field

Economics And Politics In The USSR Hans-Hermann Hohmann, 2019-03-05 Soviet scholars have apparently stayed clear of meaningful analysis of such touchy subjects as interdependence and conflict in the relationship between economics and politics Very little has been published on this issue no surprise in a system that controls centrally both politics and the economy with an emphasis on rapid economic development The absence of meaningful Soviet research led the Federal Institute for East European and International Studies in Cologne to sponsor an international interdisciplinary conference on the subject Contributions to the resulting book cover three main areas The first includes the impact of traditional Russian political culture on contemporary Soviet economic thinking and behavior the rank of economic aims in the priority system of Soviet politics and the function of economic institutions in the implementation of political aims The second concerns the role of political lobbies in the economy and repercussions of economic change for Soviet politics Foreign economic relations and the USSR's foreign policy make up the third area The concluding discussion reviews the state of international research and identifies areas for future study

Crime and Punishment in Soviet Officialdom William A. Clark, 1993 An analysis of political corruption and attempts to battle it in the Soviet elite without the usual baggage of moral indignation and finger pointing Examines how corruption fit into the structure of the bureaucracy and the society attitudes toward it data on its prevalence the politics and methods of combating it and the future of reform in the successor states Paper edition unseen 16 50 Annotation copyright by Book News Inc Portland OR

Free to Lose John E. ROEMER, John E Roemer, 2009-06-30 John Roemer challenges the morality of an economic system based on the private ownership of the means of production Unless you start with a certain amount of wealth in such a society you are only free to lose This book addresses crucial questions of political philosophy and normative economics in terms understandable by readers with a minimal knowledge of economics

Socialist Unemployment Susan L. Woodward, 1995-08-13 In the first political analysis of unemployment in a socialist country Susan Woodward argues that the bloody conflicts that are destroying Yugoslavia stem not so much from ancient ethnic hatreds as from the political and social divisions created by a failed socialist program to prevent capitalist joblessness Under Communism the concept of socialist unemployment was considered an oxymoron when it appeared in postwar Yugoslavia it was dismissed as illusory or as a transitory consequence of Yugoslavia's unorthodox experiments with worker managed firms In Woodward's view however it was only a matter of time before countries in the former Soviet bloc caught up with Yugoslavia confronting the

same unintended consequences of economic reforms required to bring socialist states into the world economy By 1985 Yugoslavia's unemployment rate had risen to 15 percent How was it that a labor oriented government managed to tolerate so clear a violation of the socialist commitment to full employment Proposing a politically based model to explain this paradox Woodward analyzes the ideology of economic growth and shows that international constraints rather than organized political pressures defined government policy She argues that unemployment became politically invisible owing to its redefinition in terms of guaranteed subsistence and political exclusion with the result that it corrupted and ultimately dissolved the authority of all political institutions Forced to balance domestic policies aimed at sustaining minimum standards of living and achieving productivity growth against the conflicting demands of the world economy and national security the leadership inadvertently recreated the social relations of agrarian communities within a postindustrial society

Stalin and the Literary Intelligentsia, 1928-39 A. Kemp-Welch, 2016-07-27 Stalin's fascination with writers was fully reciprocated as the many Odes to Stalin show During the 1970s a hugely elaborated system was established for the regulation of belles lettres based on institutions ideas and individuals This original study ten years in preparation is based on extensive access to Soviet archives Much new evidence has been uncovered about the inner workings of cultural policy in the Stalin period and documents by Stalin himself are published for the first time

Value, Exploitation and Class John E. Roemer, 2001 John E. Roemer one of the founders of analytical Marxism draws on contemporary mathematical economics to put forward a refined extension of the Marxian theory of exploitation labour value and class

Value, Exploitation and Class J. Roemer, 2013-10-08 John E. Roemer one of the founders of analytical Marxism draws on contemporary mathematical economics to put forward a refined extension of the Marxian theory of exploitation labour value and class

Paul Samuelson on the History of Economic Analysis Steven G. Medema, Anthony M. C. Waterman, 2014-11-17 As one of the most famous economists of the twentieth century Paul Anthony Samuelson revolutionized many branches of economic theory As a diligent student of his predecessors he reconstructed their economic analyses in the mathematical idiom he pioneered Out of Samuelson's more than eighty articles essays and memoirs the editors of this collection have selected seventeen Twelve are mathematical reconstructions of some of the most famous work in the history of economic thought work by David Hume Francois Quesnay Adam Smith Karl Marx and others One is a methodological essay defending the Whig history that he was sometimes accused of promulgating two deal with the achievements of Joseph Schumpeter and Denis Robertson and two review theoretical developments of his own time Keynesian economics and monopolistic competition The collection provides readers with a sense of the depth and breadth of Samuelson's contributions to the study of the history of economics
