This readable introduction highlights the continuing relevance of Marx's ideas in the light of the problems of contemporary capitalism **Marx's Capital: An Unfinishable Project?**, 2018-04-10 For almost 150 years scholars have been debating how to interpret Marx's seminal work *Capital* while they had access to just some of Marx's economic manuscripts This changed in 2013 with the publication of all the known economic writings of Marx and Engels in the Marx Engels Gesamtausgabe MEGA One can now reconstruct the lines of intellectual development and one can also explore in detail how Friedrich Engels went about compiling volumes II and III of *Capital* from the vast legacy of manuscripts that Marx left behind after his death in 1883 It should be possible now to develop a more comprehensive and accurate picture of Marx as an economic theoretician This volume of essays aims to initiate this process Contributors are Christopher J Arthur Matthias Bohlander Timm Gra mann Jorge Grespan Gerald Hubmann Heinz D Kurz Marcel van der Linden Kenji Mori Fred Moseley Lucia Pradella Geert Reuten Regina Roth and Carl Erich Vollgraf Essays on Marx's Capital Geert Reuten, 2024-05-13

In this book Geert Reuten presents 21 of his previously published essays on the three volumes Marx's *Capital* dating from 1991 2019 The essays largely take the form of a summary of Marx's text a Volume or its Parts or Chapters followed by an appreciation and when required a reconstruction The book thus offers an overview of each of the three volumes of *Capital* including their interconnection as well as a focus on specific Parts of *Capital* Throughout the general overviews and more focused analyses Reuten emphasises Marx's systematic dialectical method and his monetary value form analysis

Exploring Marx's Capital Jacques Bidet, 2007-01-01 This volume originally published in French under the title *Que faire*

du Capital offers a new interpretation of Marx's great work. It shows how the novelty and lasting interest of Marx's theory arises from the fact that as against the project of a pure economics it is formulated in concepts that have simultaneously an economic and a political aspect, neither of these being separable from the other. Jacques Bidet conducts an unprecedented investigation of Marx's work in the spirit of the history of science, exploring it as a process of theoretical development. Traditional exegesis reads the successive drafts of Capital as if they were complementary and mutually illuminated one another. In actual fact, like any scientist, Marx only wrote a new version in order to correct the previous one. He started from ideas borrowed from Ricardo and Hegel, and between one draft and the next it is possible to see these being eliminated and restructured. This labour moreover was never fully completed. The author thus re-assesses Marx's entire system in its set of constitutive categories: value, market, labour, power, classes, working class, exploitation, production, fetishism, ideology. He seeks to pin down the difficulties that these encountered and the analytical and critical value they still have today. Bidet attaches the greatest importance to Marx's order of exposition, which assigns each concept its place in the overall system and makes the validity of the construction depend on the pertinence of its initial presuppositions. This is particularly the case with the relationship between market mechanism and capitalism, and thus also between the market and socialism. This book is an English translation of Jacques Bidet, *Que faire du capital: Philosophie économique et politique dans La Capital de Marx*, published by Presses Universitaires de France, Paris, 2000.

Marx's Capital and Capitalism Today Tony Cutler, Barry Hindess, Athar Hussain, Paul Q. Hirst, 2013-10-17. This volume is concerned with the re-evaluation and criticism of Capital itself. It is in three parts, each covering a specific area of Marxist theory. The first part contains an investigation into Marx's theory of value and considers the types of questions and modes of analysis to which this theory leads. In the second part, the nature and implications of necessary economic laws of tendency in the capitalist mode of production are covered. Finally, there is an analysis of the role of class structure and economic agents in Marxist theory.

On Marx's "Capital". Friedrich Engels, 1975.

The Constitution of Capital R. Bellofiore, N. Taylor, 2004-03-25. The essays in this collection address specific themes in Volume I of Marx's Capital. Although the essays can be read independently, they present complementary perspectives on issues at the cutting edge of recent scholarship on Marx's work. Although all Parts of Capital I are discussed, the book is not intended to be a textbook. It will be read by specialists in the field as well as graduate students in the history of economic thought, political economy, and philosophy.

How to Read Marx's Capital Michael Heinrich, 2021-08-23. An accessible companion to Karl Marx's essential Capital. With the recent revival of Karl Marx's theory, a general interest in reading Capital has also increased. But Capital, Marx's foundational nineteenth-century work on political economy, is by no means considered an easily understood text. Central concepts such as abstract labor, the value form, or the fetishism of commodities can seem opaque to us as first-time readers, and the prospect of comprehending Marx's thought can be truly daunting. Until that is, we pick up Michael Heinrich's *How to Read Marx's Capital*. Paragraph by paragraph, Heinrich provides extensive commentary

and lucid explanations of questions and quandaries that arise when encountering Marx's original text. Suddenly such seemingly gnarly chapters as *The Labor Process* and *the Valorization Process* and *Money or the Circulation of Capital* become refreshingly clear as Heinrich explains just what we need to keep in mind when reading such a complex text. Deploying multiple appendices referring to other pertinent writings by Marx, Heinrich reveals what is relevant about *Capital* and why we need to engage with it today. *How to Read Marx's Capital* provides an illuminating and indispensable guide to sorting through cultural detritus of a world whose political and economic systems are simultaneously imploding and exploding.

The Struggle for the State in Jordan Jamie Allinson, 2015-01-05 Why do the states of the Arab world seem so unstable? Why do alliances between them and with outside powers change? Jamie Allinson argues that the answer lies in the expansion of global capitalism in the Middle East. Drawing out the unexpected way in which Jordan's Bedouin tribes became allied to the British Empire in the twentieth century and the legacy of this for the international politics of the Middle East, he challenges the existing views of the region. Using the example of Jordan, this book traces the social bases of the struggles that produced the country's foreign relations in the latter half of the twentieth century to the reforms carried out under the Ottoman Empire and the processes of land settlement and state formation experienced under the British Mandate. By examining the attempts of Jordan to create foreign alliances during a time of upheaval and instability in the region, Allinson offers wider conclusions concerning the nature of the interaction between state and society in the wider Middle East.

A Guide to Marx's 'Capital' Vols III Kenneth Smith, 2012-11-15 This book provides a comprehensive guide to all three volumes of Karl Marx's *Capital* with advice on further reading and points for further discussion. Recognizing the contemporary relevance of *Capital* in the midst of the current financial crisis, Kenneth Smith has produced an essential guide to Marx's ideas, particularly on the subject of the circulation of money capital. This guide uniquely presents the three volumes of *Capital* in a different order of reading to that in which they were published, placing them instead in the order that Marx himself sometimes recommended as a more user-friendly way of reading. Dr Smith also argues that for most of the twentieth century the full development of the capitalist mode of production (CMP) has been undermined by the existence of a non-capitalist third world which has caused the CMP to take on the form of what Marx called a highly developed mercantile system rather than one characterized by an uninterrupted circuit of industrial capital of the kind he expected would develop. While the guide can be read as a book in its own right, it also contains detailed references to Volumes I-III so that students, seminars, and discussion groups can easily make connections between Smith's explanations and the relevant parts of *Capital*.

Dr Smith also argues that for most of the twentieth century the full development of the capitalist mode of production (CMP) has

been undermined by the existence of a non capitalist third world which has caused the CMP to take on the form of what Marx called a highly developed mercantile system rather than one characterized by an uninterrupted circuit of industrial capital of the kind he expected would develop **Karl Marx's Economics** John Cunningham Wood,1993 Marx's Capital after 150 Years Marcello Musto,2019-09-23 Faced with a new crisis of capitalism many scholars are now looking back to the author whose ideas were too hastily dismissed after the fall of the Berlin Wall During the last decade Marx s Capital has received renewed academic and popular attention It has been reprinted in new editions throughout the world and the contemporary relevance of its pages is being discussed again Today Marx s analyses are arguably resonating even more strongly than they did in his own time and Capital continues to provide an effective framework to understand the nature of capitalism and its transformations This volume includes the proceedings of the biggest international conference held in the world to celebrate the 150th anniversary of Capital s publication The book is divided into three parts I Capitalism Past and Present II Extending the Critique of Capital III The Politics of Capital It contains the contributions of globally renowned scholars from 13 countries and multiple academic disciplines who offer diverse perspectives and critical insights into the principal contradictions of contemporary capitalism while pointing to alternative economic and social models Together they reconsider the most influential historical debates on Capital and provide new interpretations of Marx s magnum opus in light of themes rarely associated with Capital such as gender ecology and non European societies The book is an indispensable source for academic communities who are increasingly interested in rediscovering Marx beyond 20th century Marxism Moreover it will be of great appeal to students as well as established scholars interested in critique of capitalism and socialist theory Women Characters and Writers in Contemporary Literature Dr. Ajda BAŞTAN,2020-09-04 This book is composed of my selected and published academic articles up to now My main research areas are women characters and violence in the British literature And in this work you can meet several women characters from the British literature who have inspired a great number of readers Besides Nobel Prize awarded women writers from all over the world are also mentioned here Furthermore some philosophical theories and mental diseases are discussed in brief I hope you will enjoy while reading this book **An Introduction to Marx's 'Capital'** Ranganayakamma, Karl Marx s Capital is a work that discusses scientifically not only economic and political issues but also the entire process of development of human society Capital consists of 4 volumes The title of the first volume is Process of Production of Capital This contains 8 parts and a total of 21 chapters The title of the second volume is Process of Circulation of Capital This contains 3 parts The total number of chapters is 21 The title of the third volume is Process of capitalist production as a whole This contains 7 parts The total number of chapters is 52 The fourth volume is in the form of three separate volumes each one of which is called a part The common title of all the three parts is Theories of Surplus Value All the three parts contain a total of 24 chapters Each one of these 3 parts has an Addendum All these as a whole constitute Capital This book is an introduction to Marx s Capital **A Contemporary**

History of Marx's Capital Paolo Favilli, 2025-09-03 Paolo Favilli provides both students and scholars with an original reading of themes and issues found in Karl Marx's *Das Kapital* and its connections with present day challenges. By way of continuous cross referencing between present and past Favilli demonstrates claims that the scientific status of *Das Kapital* advanced by countless texts since its original publication are themselves deeply imbued by the spirit of the times. If in 1963 Jean Paul Sartre could write that Marxism was the unsurpassable philosophical horizon of our times, what could make an undergraduate student today consider such a claim plausible? Informed by the latest research on Marxist theory and decades teaching the Philosophy of History Favilli employs a didactic approach stimulating student engagement and learning opportunities in the classroom. This approach allows for a better understanding of relationship between the present and the multiple temporalities that characterise and periodise the contemporary era. What follows is a critique of the contemporary academy for its hangover of post 1989 *nuovismo* cult of novelty and inability to make the proper distinctions between Marxism as party state, the works of Karl Marx and Marxism as an object of history. This led to the spectacle where after 1989 those who had spent most of their careers as Marxist hued scholars not only abandoned this identity but also spurned any recognition that Marx and Marxism were worthwhile objects of inquiry. This book was first published in Italian as *A proposito de Il capitale. Il lungo presente e i miei studenti* Corso di storia contemporanea Milan FrancoAngeli 2021. This English translation includes a new foreword by the author.

[Responses to Marx's Capital](#), 2017-11-01 *Responses to Marx's Capital* From Rudolf Hilferding to Isaak Illich Rubin is a collection of primary sources dealing with the reception of the economic works of Karl Marx from the First to the Third International. The documents translated for the first time from German and Russian range from the original reviews of the three volumes of *Capital* and the three volumes of *Theories of Surplus Value* to the debates between the Marxist economists and the bourgeois academic representatives of the theory of marginal utility and the German historical school. The volume closes with six essays by the prominent economist Isaak I. Rubin including *Essays on Marx's Theory of Money* and *The Dialectical Development of Categories in Marx's Economic System*.
