Marx's Eighteenth Brumaire Postmodern Interpretations:

Marx's 'Eighteenth Brumaire' Mark Cowling, James Martin, 2002-09-20 Marx's account of the rise of Louis Napoleon Bonaparte is one of his most important texts. Written after the defeat of the 1848 revolution in France and Bonaparte's subsequent coup, it is a concrete analysis that raises enduring theoretical questions about the state, class conflict, and ideology. Unlike his earlier analyses, Marx develops a nuanced argument concerning the independence of the state from class interests, the different types of classes, and the determining power of ideas and imagery in politics. In the *Eighteenth Brumaire*, he applies his materialist conception of history to an actual historical event with extraordinary subtlety and an impressive command of language. This volume contains the most recent and widely acclaimed translation of the *Eighteenth Brumaire* by Terrell Carver, together with a series of specially commissioned essays on the importance of the *Brumaire* in Marx's canon. Contributors discuss its continuing significance and interest, the historical background, and its contemporary relevance for political philosophy and history.

Analysis Veit Schwab, Johannes Beetz, 2017-12-21 *Material Discourse: Materialist Analysis* explores the entanglement of material realities and discourse and shows how a materialist discourse analysis can be put into practice. A cognate concern for language and discourse as well as materiality and materialism can look back on a long tradition in the Social Sciences and Humanities. This book makes their relation an explicit focus. Located at the intersections of materialism and Discourse Studies, it highlights the materiality of discourse and the entanglement of matter and meaning. The essays collected in this volume are united by a rejection of static dichotomies such as discursive/material, language/materiality, or material/immaterial. Rather than presenting materialism and Discourse Studies as distinct from one another, they are shown to be intimately entwined. The book brings together theoretical and empirical contributions from a whole range of disciplines, fields, and academic contexts in a truly transdisciplinary and global manner. *Material Discourse: Materialist Analysis* is a timely intervention into the ongoing debates revolving around materiality, materialism, discourse, and language, as well as the

intricate relations between them **The Routledge Research Companion to Modernism in Music** Björn Heile, Charles Wilson, 2018-10-29 Modernism in music still arouses passions and is riven by controversies Taking root in the early decades of the twentieth century it achieved ideological dominance for almost three decades following the Second World War before becoming the object of widespread critique in the last two decades of the century both from critics and composers of a postmodern persuasion and from prominent scholars associated with the new musicology Yet these critiques have failed to dampen its ongoing resilience The picture of modernism has considerably broadened and diversified and has remained a pivotal focus of debate well into the twenty first century This Research Companion does not seek to limit what musical modernism might be At the same time it resists any dilution of the term that would see its indiscriminate application to practically any and all music of a certain period In addition to addressing issues already well established in modernist studies such as aesthetics history institutions place diaspora cosmopolitanism production and performance communication technologies and the interface with postmodernism this volume also explores topics that are less established among them modernism and affect modernism and comedy modernism versus the contemporary and the crucial distinction between modernism in popular culture and a popular modernism a modernism of the people In doing so this text seeks to define modernism in music by probing its margins as much as by restating its supposed essence **(Mis)readings of Marx in Continental Philosophy** J. Habjan, J. Whyte, 2014-10-14 Mis readings of Marx In Continental Philosophy reflects on the way major European philosophers related to the work of Karl Marx It brings together leading and emerging critical theorists to address the readings of Marx offered by Benjamin Adorno Arendt Althusser Foucault Derrida Deleuze Negri Badiou Agamben Rancière Latour and others **Classicising Crisis** Barbara Goff, Michael Simpson, 2020-07-29 Geopolitical shifts and economic shocks from the Early Modern period to the 21st century are frequently represented in terms of classical antecedents In this book an international team of contributors working across the disciplines of Classics History Politics and English addresses a range of revolutionary transformations in England America France Haiti Greece Italy Russia Germany and a recently globalised world all of which were accorded the classical treatment The chapters investigate discrete cases of classicising crisis while the Introduction highlights patterns among them The book asks are classical equations a prized ideal when evidence warrants or linkages forced by an implacable will to power or good faith attempts to make sense of events otherwise bafflingly unfamiliar and dangerous Finally do the events thus classicised retain even increase their power to disturb and energise or are they ultimately contained Classicising Crisis The Modern Age of Revolutions and the Greco Roman Repertoire is essential reading for students and scholars of classics classical reception and political thought in Europe and the Americas Language in Ernst Bloch's Speculative Materialism Nathaniel Barron, 2023-09-20 Nathaniel Barron offers the first book length account in English of Ernst Bloch's contribution to a Marxist philosophy of language It is ambitious both in situating Bloch's ideas in the broader Marxist engagement with language as it currently exists and in using

Bloch's utopian categories to challenge that engagement. In particular, Barron reads Voloshinov's insights into language through Bloch's categories and argues that Bloch advances on Voloshinov by offering an understanding of the social materiality of language which is more useful for challenging fascist forms of utterance. Globalizing Literary Genres Jernej Habjan, Fabienne Imlinger, 2015-10-14 Focused on the relation between processes of globalization and literary genres, this volume intervenes in the prevalent notions of globalization, literary history, genre, and the novel. Using both close reading and world history, both literary criticism and political theory, the book is a timely intervention in the debates about world postcolonial and transnational literature as they have been intensified by critical globalization studies, world systems analysis, Bourdieuan sociology, and cosmopolitanism studies. It contends that globalization, far from starting in recent decades, has a long and complex history, not unlike the history of literature itself, meaning that when we speak of globalization and literature, we in effect invoke the entire history of literature. Essays examine literary genres in relation to broader historical processes, connecting the present state of globalization to such key world historic events as the early modern geographical and scientific explorations, the Enlightenment, the expansions of modernity in the long nineteenth and twentieth centuries, postmodernity and postcoloniality, and contemporary counter-hegemonic movements. The book offers innovative readings of the pastoral from Saint Pierre to Carpentier, the novel in Kant and Wieland and in Diderot and Marx, travel writing from Verne to Cortázar, sports writing in James and Kahn, entrelacement in Bolaño, Ghosh and Soderbergh, and also the Mozambican ghost story, Indian genre fiction, fake autobiographies, Sephardic language memoirs, the postcolonial Gothic, Irish chick lit, and counter-hegemonic novels. Making important theoretical contributions to a renewed discussion about genre, especially genres of narrative fiction, this volume addresses global studies, the history of the novel, and debates over periodization and nationalism in literary history. Remembering the Reformation Alexandra Walsham, Brian Cummings, Ceri Law, Karis Riley, 2020-06-04 This stimulating volume explores how the memory of the Reformation has been remembered, forgotten, contested, and reinvented between the sixteenth and twenty-first centuries. Remembering the Reformation traces how a complex, protracted, and unpredictable process came to be perceived, recorded, and commemorated as a transformative event. Exploring both local and global patterns of memory, the contributors examine the ways in which the Reformation embedded itself in the historical imagination and analyse the enduring, unstable, and divided legacies that it engendered. The book also underlines how modern scholarship is indebted to processes of memory-making initiated in the early modern period and challenges the conventional models of periodisation that the Reformation itself helped to create. This collection of essays offers an expansive examination and theoretically engaged discussion of concepts and practices of memory and Reformation. This volume is ideal for upper-level undergraduates and postgraduates studying the Reformation, Early Modern Religious History, Early Modern European History, and Early Modern Literature. Derrida and Antiquity Miriam Leonard, 2010-07-22 Written by Derrida scholars, philosophers, and classicists, *Derrida and Antiquity* analyses a dialogue with the ancient world in

The Dangerous Class Clyde Barrow, 2020-10-19 Marx and Engels concept of the lumpenproletariat or underclass an anglicized politically neutral term appears in The Communist Manifesto and other writings It refers to the dangerous class the social scum that passively rotting mass thrown off by the lowest layers of old society whose lowly status made its residents potential tools of the capitalists against the working class Surprisingly no one has made a substantial study of the lumpenproletariat in Marxist thought until now Clyde Barrow argues that recent discussions about the downward spiral of the American white working class its main problem is that it is not working have reactivated the concept of the lumpenproletariat despite long held belief that it is a term so ill defined as not to be theoretical Using techniques from etymology lexicology and translation Barrow brings analytical coherence to the concept of the lumpenproletariat revealing it to be an inherent component of Marx and Engels analysis of the historical origins of capitalism However a proletariat that is destined to decay into an underclass may pose insurmountable obstacles to a theory of revolutionary agency in post industrial capitalism Barrow thus updates historical discussions of the lumpenproletariat in the context of contemporary American politics and suggests that all post industrial capitalist societies now confront the choice between communism and dystopia

Marxism and the State P. Wetherly, 2005-06-07 Paul Wetherly provides a restatement and defence of the classical Marxist theory of the state developing an analytical approach that draws on G A Cohen s functional interpretation of Marx s theory of history Instrumentalist and structuralist arguments are conceived as related causal mechanisms within the functional approach and the principle of economic determination is shown to be consistent with the relative autonomy of the state as an institution with its own interests and capacities This old fashioned interpretation is defended against rival approaches within contemporary Marxism

Marxism, Religion and Ideology David Bates, Iain MacKenzie, Sean Sayers, 2015-10-05 As austerity measures are put into place the world over and global restructuring is acknowledged by all as an attempt to bolster the economic system that lead to the crash there is a great need to come to grips with the economic political and philosophical legacy of Marx Of particular interest are Marx s analyses of alienation and the cycles of boom and bust thought to be integral to the functioning of capitalism Moreover as the Cold War drifts into the history books it is possible to reconsider the lasting impact of Marx s analyses without the shadows cast by the Soviet version of communism Equally though scholars are increasingly turning to Marx for insight into the rise of religion and the corresponding demise of political ideologies that seems to mark the contemporary age Are we witnessing the return of Marx Few scholars have done as much to tease out the intricacies of Marx ideology and religion and their overlapping concerns as the eminent writer and Marx biographer Professor David McLellan This book brings together a group of internationally renowned academics to reflect upon develop and criticise McLellan s analyses of these three themes with a view to contributing more broadly to

scholarly debates in these fields This exciting and timely analysis will be of interest to scholars of political theory the history of political thought including historical methodology Marx and Marxism sociology of knowledge particularly in relation to discussions of ideology religion and theology more widely
