Special Maps of Persia 1477-1925 Cyrus Alai, 2023-01-30 This volume complements the best seller and award winning General Maps of Persia praised by Dr John H bert Chief of the Geography and Map Division of the Library of Congress This carefully researched work is a must have item in any collection of research materials on the history of cartography I cannot wait for the arrival of subsequent volumes of further great scholarship and readable map reproductions on other detailed aspects of the history of mapping of Persia Encouraged by numerous commending reviews in five languages English French German Persian and Armenian and gratifying testimonials from many renowned authorities in the fields of History of Cartography and Iranian Studies Cyrus Alai continued his research and collected further material to produce the present volume Special Maps of Persia 1477 1925 covering every map of that region other than general maps Thus it not only complements the General Maps of Persia it is also a completely new volume in its own right and providing an even closer insight into the region The book is divided into nine chapters Historical Maps District Maps Frontier Maps Town Maps Political Maps etc Like the preceding volume it has a dual character being both a carto bibliography and a mapping history of Persia It contains 761 map entries of which 409 are illustrated mostly in colour Concise related historical accounts precede every chapter and section and essential historical notes are also supplied within many of the map entries Undoubtedly this book is a treasure house not just for cartographers but also historians social historians linguists and archaeologists *The Book of Sir Marco Polo, the Venetian, Concerning the Kingdoms and Marvels of the East* Marco Polo, Sir Henry Yule, 1875

Mapping Travel Jordana Dym, 2021-08-30 More often than not readers of travel narratives can expect to find at least one map if not several showing as English privateer William Dampier wrote the Course of the Voyage that is where the author traveler went and implicitly a sense of what was seen and experienced Dampier used a now common cartographic strategy to tell the story from beginning to end as well as around significant places on the way by marking the journey with a pricked line Despite the lines popularity and present ubiquity the complex intellectual and material process of considering travel as a continuum rather than as a series of stops along the way and of plotting a journey onto a map have attracted relatively little academic attention Drawing on a thousand years of European travel writing and map making Jordana Dym suggests that after centuries of text based itineraries and on the spot directions guiding travelers and constituting their reports maps in the fifteenth century emerged as tools for Europeans to support and report the results of land and sea travel Called in subsequent centuries route maps itinerary maps and travel maps often interchangeably what Dym defines as journey maps added lines of travel to show where travelers had been Since their emergence most have taken one of two forms itinerary maps which connected stages as points with a line and route maps which tracked unbroken lines between endpoints In the seventeenth century the conventions of journey mapping were codified and increasingly incorporated into travel writing and other genres that represented individual travel With each succeeding generation these linear journey maps have become

increasingly common and complex responding to changes in forms of transportation such as air and motor car flight and print technology especially the advent of multi color printing This is their story *The Book of Ser Marco Polo, the Venetian, Concerning the Kingdoms and Marvels of the East* Marco Polo,1874 *The Book of Ser Marco Polo, the Venetian, Concerning the Kingdoms and Marvels of the East Newly Translated and Edited, with Notes, by Henry Yule* ,1871 **The Book of Ser Marco Polo, the Venetian**, Marco Polo,1875 *The World Map, 1300-1492* Evelyn Edson,2007-05-30 In the two centuries before Columbus mapmaking was transformed *The World Map 1300 1492* investigates this important transitional period of mapmaking Beginning with a 1436 atlas of ten maps produced by Venetian Andrea Bianco Evelyn Edson uses maps of the fourteenth and fifteenth centuries to examine how the discoveries of missionaries and merchants affected the content and configuration of world maps She finds that both the makers and users of maps struggled with changes brought about by technological innovation the compass quadrant and astrolabe rediscovery of classical mapmaking approaches and increased travel To reconcile the tensions between the conservative and progressive worldviews mapmakers used a careful blend of the old and the new to depict a world that was changing and growing before their eyes This engaging and informative study reveals how the ingenuity creativity and adaptability of these craftsmen helped pave the way for an age of discovery **Regnum Chinae: The Printed Western Maps of China to 1735** Marco Caboara,2022-10-24 Listen to the New Books Network Podcast The first European map of China faintly relied on the copy of a Chinese original obtained through bribing and espionage the last covered in this book was the result of the largest land survey ever made until that time These two and another 125 maps depict sometimes uniquely sometimes copying each other a country whose images were so different that it was hard to understand which to trust This study reproduces and describes for the first time all the maps of China printed in Europe between 1584 and 1735 unravelling the origin of each individual map their different printing issues and publication dates It also tells for each the unique story that made possible these visions from another world stories marked by scholarly breakthroughs obsession missionary zeal commercial sagacity and greed For a presentation from the author related to the publication entitled *China on Copper Plates The First 150 Years of Chinese Maps in Western Prints 1584 1735* see here A summary On June 23 2022 the fourth session of the academic lecture series on *The Weavers of Four Dimensional Space Time and Their Creation on the History of Maps* was held in the form of an online seminar at the Kuang Chi International Scholars Center Dr Marco Caboara an Italian scholar from the Lee Shau Kee Library of Hong Kong University of Science and Technology gave a lively presentation entitled *China on Copperplate the First 150 Years of Western Printed Maps of China 1584 1735* The lecture was conducted in both Chinese and English Associate Professor Lin Hong from the School of Humanities of Shanghai Normal University served as the moderator and translator Dr Yang Xunling Deputy Director of the Library of Macau University of Science and Technology served as the main responder Professor Huang Yijun of Minzu University of China and Deputy Youth Associate of Fudan University Researcher Ding
