

Nurses and Political Action

- ★ **Political-ethical conflict** = conflict between one's ethical belief system and what one feels compelled to do or is told to do by someone in a position of power. Many conflicts exist in the nursing profession, which are of concern because quality patient care and public health are at stake, e.g.
- ★ the difference between historical ideas of what nursing was and the new image of what nursing has become,
- ★ the contrast between the perceived weakness of the female gender and the strength of the nursing profession as a whole (eg, the largest single sector of the health care industry), and
- ★ the inconsistency between the goals of the physician and institutional sectors of the health care industry with goals of the nursing profession.
