McKeen Cowles, 1998 Long term care facilities provide care to individuals who cannot care for themselves Since long term care is a service industry it is difficult to define universally accepted standards similar to those used by the manufacturing industry While most consumers can agree on performance standards for an automobile not everyone agrees on the criteria used to evaluate the quality of health care services In long term care this problem is compounded by the frailty and declining health status of many of the clients served Nursing Home Statistical Yearbook is an annual compendium of statistics on the nursing home industry drawing on data from the Health Care Financing Administration the governmental agency that administers Medicare and Medicaid Following brief introductory essays the book consists of extensive data tables providing detailed information on America's nursing homes and their residents The data are organized by state and in some instances smaller market areas Because the data are based on a newly revised and more extensive survey process much of what is presented has never before been available including average nurse and therapist staffing hours per patient day reported nationally and by state Topics include Resident Acuity Resident ADL Characteristics Other Resident Characteristics Survey Deficiencies Scope and Severity Codes Facility Characteristics Staffing Information Health Care in America John C. Burnham, 2015-05-15 A comprehensive history of sickness health and medicine in America from Colonial times to the present In *Health Care in America* historian John C. Burnham describes changes over four centuries of medicine and public health in America Beginning with seventeenth century concerns over personal and neighborhood illnesses Burnham concludes with the arrival of a new epoch in American medicine and health care at the turn of the twenty first century From the 1600s through the 1990s Americans turned to a variety of healers practices and institutions in their efforts to prevent and survive epidemics of smallpox yellow fever cholera influenza polio and AIDS Health care workers in all periods attended births and deaths and cared for people who had injuries disabilities and chronic diseases Drawing on primary sources classic scholarship and a vast body of recent literature in the history of medicine and public health Burnham finds that traditional healing care and medicine dominated the United States until the late nineteenth century when antiseptic aseptic surgery and germ theory initiated an intellectual social and technical transformation He divides the age of modern medicine into several eras physiological medicine 1910s 1930s antibiotics 1930s 1950s technology 1950s 1960s environmental medicine 1970s 1980s and beginning around 1990 genetic medicine The cumulating developments in each era led to today's radically altered doctor patient relationship and the insistent questions that swirl around the financial cost of health care Burnham's sweeping narrative makes sense of medical practice medical research and human frailties and foibles opening the door to a new understanding of our current concerns Assessing Satisfaction in Health and Long Term Care Robert Applebaum, MSW, PhD, Jane Straker, PhD, Scott Geron,
