## Abstract

**Objective:** To understand nurse perspectives on the physical health needs of their mental health clients and how well rural services are meeting their overall care needs.

**Design:** Focus groups with semistructured format.

**Setting:** Community mental health care in a regional and rural district of Queensland.

**Participants:** Thirty-eight nurses in public mental health care.

**Results:** The major themes were (i) stigma of mental illness, (ii) barriers to accessing physical health care services, (iii) nurse adaptations under demands, and (iv) community and integration towards better overall health. Nurses integrate overall care and foster its continuity for people with physical and mental co-morbidity and can be supported much better in sustaining this.

**Conclusion:** Access and continuity of physical health care experienced by all Australians is exacerbated for people in rural areas. Physical health of people with serious mental illness residing in remote Australia needs to be a national health priority.

**KEY WORDS:** collaborative care, health services access, nursing, rural mental health, rural physical health.

## Introduction

People who have serious mental illness (SMI) have increased occurrence of physical illness.<sup>1–3</sup> People with schizophrenia live up to 25 less years<sup>4</sup> frequently

because of preventable risks that health care services are regularly found to not address adequately.<sup>5–7</sup> While people with SMI do not appear to be getting integrated physical and mental health services in general, there is little known whether the source of gaps in care identified in metropolitan and high-population regional areas such as clinical silos,<sup>8</sup> stigma of mental illness among physical health services<sup>9</sup> – generalise to rural and remote areas. Long-recognised challenges in rural health within Australia might exacerbate the problems just canvassed in relation to people with SMI accessing quality physical health care and maintenance of access to manage long-term health issues. These challenges include distance to services,<sup>10</sup> workforce shortages, such as in rural and remote nurses,<sup>11</sup> and funding shortages and fragmentation.<sup>12</sup> At the same time, strengths of rural health such as innovations in care and broad-based skills of individual staff might be important resources in ensuring overall care for people with multiple physical-mental health care needs, but there is little research to inform this.

Nurses employed in mental health care in rural and regional locations are generally the professionals with most contact with people for health service provision and overall care, and therefore might serve an integral role in providing physical and mental health care<sup>13,14</sup> and inform the wider health care community on what is taking place with respect to combined health care services for people with SMI. It is striking that there are, to our knowledge, no studies of nurse perceptions on the physical health needs of their clients in mental health care, the level of overall health care support of clients, and whether and how nurses deliver physical care. This paper reports findings of an exploratory qualitative study of nurse perspectives on the physical health of people with SMI in a large district of Queensland. In particular, the aim was to ascertain what nurses thought of the availability and appropriateness of physical health services for clients in regional, rural and remote areas, and their own health care provision in that context.

## **Nursing Perspective On Severe Mental Illness:**

**A Nursing Perspective on Severe Mental Illness** Linda Chafetz, 1993 *Mental Illness in the Family* Beverley Abosh, April Collins, 1996-01-01 *Mental Illness in the Family* traces the development of treatment approaches with families of the mentally ill over the past three decades. The essays in this book reflect the work of clinicians currently dealing with families in a variety of settings and from a number of perspectives. Topics covered include patients' views on programs for the mentally ill, the needs of families coming to terms with the mental illness of a family member, the forgotten sibling, the concept of grief, the confusion that a family member can experience when dealing simultaneously with the mental health and the criminal justice systems, and the effect of parental mental illness on young children. This volume will be of particular interest to social workers, clinical psychiatrists, psychologists, and other mental health professionals who work primarily with individuals and families who have been affected by major mental illness.

**Interprofessional Perspectives Of Mental Health Crisis: For Nurses, Health, and the Helping Professions** Kris Deering, Joanne Williams, 2022-03-04 There is plenty in this book to get your teeth into and help us think about how we work with people in mental health crises and how we might best make a difference. Alan Simpson, Professor of Mental Health Nursing, Health Service and Population Research, King's College London, UK. Any one of us could experience a mental health crisis. However, a high quality interdisciplinary response can be lifesaving and life changing. This book is an important contribution to the literature as it has examples of good practice for all professionals, both on the frontline and in service development. Dr Adrian James, President, Royal College of Psychiatrists, UK. This publication is a valuable and timely resource given the increasing recognition of the impact of mental health needs in a range of different professional settings. Victoria Sweetmore, Acting Discipline Lead for Mental Health and Learning Disability Nursing, University of Derby, UK. *Interprofessional Perspectives of Mental Health Crisis* improves the care of those experiencing a mental health related crisis by providing insight into the roles different UK statutory services have and the need for collaborative mental health care. For those studying and working in the field of mental health crisis, this vital work will bridge your understanding by offering a cross discipline perspective of the different services, their role in aiding service users, and the ways we can work more collaboratively together to meet the mental health needs of those requiring care. Throughout the book, it promotes understanding of the various roles each of the key services play within the crucial first 24 hours of a mental health crisis and the challenges they face. It fosters interprofessional collaboration to create a whole system approach to crisis care. It helps professionals to understand good practice and the challenges of other services when aiding a person in crisis. It critically evaluates service provision and ways to improve crisis care. It explores recovery and collaboration with service users experiencing a crisis and their significant others. The book is timely and essential in its promotion of high quality interdisciplinary response and emphasis on integration and collaboration between service providers. **A Pragmatic Approach to Psychiatric Rehabilitation: Lessons from Chicago's Thresholds Program** Jerry Dincin, 1995-12-27. There are three components in psychiatric rehabilitation: medication, the rehabilitation relationship, and rehabilitation program efforts. This volume deals with all three, assessing their importance and explaining how they can be integrated in comprehensive psychiatric rehabilitation. The example used throughout is the program approach at Thresholds, a Chicago-based agency for psychiatric rehabilitation. All the contributors have held important staff roles at Thresholds. This volume contains the contributors' current thoughts on psychiatric rehabilitation, illustrated by the story of how and why Thresholds operates as it does and how it arrived where it is today. This is the 68th issue of the quarterly journal *New Directions for Mental Health Services*. For more information on the series, please see the Journals and Periodicals page.

**Rethinking Rights-Based Mental Health Laws** Bernadette McSherry, Penny Weller, 2010-08-16. Mental health laws exist in many countries to regulate the involuntary detention and treatment of individuals with serious mental illnesses. Rights-based legalism is a term used to describe mental health laws that refer to the rights of individuals with mental illnesses somewhere in their provisions. The advent of the United Nations Convention on the Rights of Persons with Disabilities makes it timely to rethink the way in which the rights of individuals to autonomy and liberty are balanced against state interests in protecting individuals from harm to self or others. This collection addresses some of the current issues and problems arising from rights-based mental health laws. The chapters have been grouped in five parts as follows: Historical Foundations; The International Human Rights Framework and the United Nations Convention on the Rights of Persons with Disabilities; Gaps Between Law and Practice; Review Processes and the Role of Tribunals; Access to Mental Health Services. Many of the chapters in this collection emphasise the importance of moving away from the limitations of a negative rights approach to mental health laws towards more positive rights of social participation. While the law may not always be the best way through which to alleviate social and personal predicaments, legislation is paramount for the functioning of the mental health system. The aim of this collection is to encourage the enactment of legal provisions governing treatment, detention, and care that are workable and conform to international human rights documents.

**Perspectives on Palliative and End-of-Life Care** Rebecca S. Allen, Brian D. Carpenter, Morgan Eichorst, 2018-06-13. Individuals and families face challenges at the end of life that can vary significantly depending on social and cultural contexts, yet more than ever is now known about the needs that cut across the great diversity of experiences in the face of dying and death. A number of behavioural interventions and clinical approaches to addressing these needs have been developed and are available to help providers care for clients and assist them in achieving their goals. *Perspectives on Palliative and End of Life Care: Disease, Social and Cultural Contexts* explores how these interventions can be used to address a range of issues across social and cultural contexts for those in
