was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher *Nursing Theory* Martha Raile Alligood, 2013-08-13 Nursing Theory Utilization the application of different nursing theories models and philosophies and the expansion of these practices with a look toward the future This text provides the opportunity for students who have learned the background of nursing theory using the companion title *Nursing Theorists and Their Work* to apply what they have learned to actual nursing practice through various patient scenarios Real life case history examples included in application chapters promotes evidence based practice and further demonstrates how a theory is used in practical situations Consistent case history featuring the patient Debbie in every chapter and the nursing plan that follows help you apply philosophies theories and models presented in the text Critical thinking exercises provide a more application based approach rather than just contemplation of theories presented Chapters written by contributors who utilize the work offer a unique approach to using theory in practice Nursing metaparadigm discussion illustrates the four center concepts with which the discipline is concerned to help you see the scope of concern for the profession Logical organization presents content in three distinct parts Glossary offers quick access to key terms throughout the text Updated nursing application examples feature realistic scenarios that promote evidence based practice Scenarios have been updated using references to current literature and evidence based clinical research New information on the benefits and cautions associated with evidence based practice including a new discussion of praxis a dynamic process where theory and practice come together Updated critical thinking exercises reflect the role of the nursing professional and advanced nursing practice encouraging a higher level of thinking regarding the integration of theory and practice
