Integrative Sport and Exercise Nutrition Ian Craig,Justin Roberts,2025-09-17 Integrative Sport and Exercise Nutrition A Health Feeds

Performance Perspective defines health as an underpinning requirement for active pursuit and sporting performance. By focusing on the empowerment of scientists and practitioners who support such individuals, this new textbook powerfully disseminates academic and experiential knowledge in a thoroughly applied context. The prevailing paradigm that has existed within the academic enquiry of sports nutrition has typically viewed macronutrients as fuel for exercise endeavours. While this notion provides a basis of quantitative nutritional support, what happens when our active individual lacks adequate digestive health to assimilate these foods and in the process creates an inflammatory tone in their body? And what happens when our aspiring athlete is genetically not suited to the diet that is prescribed by the sports nutritionist, which is based merely on the energetic needs of their sport? The underlying aim of Integrative Sport and Exercise Nutrition is to encourage sport exercise and nutrition professionals, academics, and students to embrace the physiological complexity and individuality of an exercising person. This approach highlights the need to go beyond traditional macronutrient approaches dominant in this field and consider how our food impacts physiological health from an integrative body systems perspective. Within the context of heavy training loads often alongside significant life stressors, such practitioners can support the robust health and performance requirements of active individuals. This cutting edge book thereby brings together the scientific voice of academics with the real world experience of nutrition and exercise practitioners, and by doing so, the authors wish to stimulate a new paradigm of thought towards integrative and personalised thinking in sport and exercise.

Nutrition for Sport, Exercise, and Performance Adrienne Forsyth, Evangeline Mantzioris, Regina Belski, 2024-03-29

Nutrition for Sport Exercise and Performance offers a clear practical and accessible guide to building a comprehensive understanding of sport and exercise nutrition from leading experts in nutrition and exercise science. Nutrition before, during, and after training or a sporting event can improve the comfort, energy, and performance of athletes of all levels, from elite to recreational, as well as providing long-term health benefits. As such, nutrition is a key element of an athlete's health and performance strategy, whether competing recreationally or at an elite level. Split into three parts, this new and revised edition of **Nutrition for Sport Exercise and Performance** provides an evidence-based introduction to nutrition for sport exercise and performance. Part I focusses on nutrition and sport science by explaining key principles underpinning sports nutrition science, including energy systems, exercise physiology, and metabolism, and the digestion and absorption of macronutrients and micronutrients essential for performance, and discusses factors influencing dietary intake, energy availability, and the process of dietary assessment. Part II is focussed on nutrition for exercise, pre and post training, hydration, supplements, and body composition measurement and modification. The final part, Part III, focusses on applied sports nutrition for a range of sports and athletes. This second edition delivers new insights into working with female athletes, occupational athletes, and athletes in contemporary sports, including sport climbing, surfing, skateboarding, and breaking. Featuring contributions from a range of sport and exercise nutrition professionals with practical sports nutrition strategies and the latest evidence and practice guidelines, this is a core
