**Paleo in a Nutshell** Geoff Bond, 2017-05-04  
Nature has provided every creature that roams the earth a diet designed to sustain and maximize its life What these diets are composed of is based on a creature's location climate accessibility and physical prowess As humans our ancient forefathers and mothers were raised and nourished in the same manner as the beasts that surrounded them These Stone Age diets now called Paleo diets reflect the types of foods that nature intended us to eat Unfortunately we have lost touch with how nature intended us to live and mistakenly think we can eat anything sitting on our supermarket shelves Paleo in a Nutshell is an eye opening guide to restoring our health by eating the foods for which our bodies are designed to consume Author Geoff Bond is a world renowned scientist who has extensively researched forager societies of the past and present What he has discovered is that our hunter gatherer ancestors had never experienced the health disorders that plague us today This is because their diets environments and daily activities were far more in touch with their bodies than our way of life today Although our diet has become our most dysfunctional feature other aspects of the Paleo lifestyle are essential to explore as well In Part One of this book we learn how and why our ancestors thrived and explore how things went wrong when we stopped behaving in agreement with our evolutionary past In Part Two we are provided with an Owner's Manual a guide to appropriate and healthy foods with which to fuel our bodies and a step by step plan for implementing this way of eating While you may no longer have time to hunt and forage for your food this book offers modern and simple substitutions for you to use as well as several delicious recipes Written in simple to understand language Paleo in a Nutshell is all you need to find your way back

to a healthier and more natural way of living
