Nutzpflanzen in Deutschland - Kulturgeschichte und Biologie Koerber-Grohne Udelgard, 1988 *The Archaeology of Medieval Germany* Günter P. Fehring, 2014-10-24 Medieval archaeology is a relatively young discipline It relies heavily on and contributes to the neighbouring disciplines of history and geography as well as certain of the natural sciences The kinds of sources investigated in the context of medieval archaeology also cast light on many aspects of life in later centuries The main sources used are graveyards churches and churchyards castles and fortifications rural and urban settlements technical production sites and routes of communication Closely allied to these are the numerous finds of small objects of everyday life from cutlery and tools to animal remains and grain This book is a comprehensive discussion of what can be established from the use of such materials about the culture and daily life of medieval Germany Each subject is augmented with the use of many illustrations Besides methodological questions the author considers what can be learnt about the history of settlement and architecture of technology of economic and social matters of churches and missions and of population diet and vegetation

Biology and Breeding of Crucifers Surinder Kumar Gupta, 2016-04-19 Considerable interest has developed in recent years in crucifers and particularly in their wild relatives as they contain genetic material that may be utilized for further evolution of superior crop varieties through introgression and distant hybridization Until now there has been no single volume that focuses exclusively on the biology and bree *Mansfeld's Encyclopedia of Agricultural and Horticultural Crops* R. Büttner, 2001-04-10 With contributions by numerous experts *The Origins and Spread of Domestic Plants in Southwest Asia and Europe* Sue Colledge, James Conolly, 2016-06-16 Leading scholars demonstrate the importance of archaeobotanical evidence in the understanding of the spread of agriculture in southwest Asia and Europe

The Ancient Mediterranean Environment between Science and History William V. Harris, 2013-07-25 Scientists historians and archaeologists are at last beginning to collaborate seriously on studies of the long term history of the environment The fruit of an international conference held in Rome in 2011 The Ancient Mediterranean Environment between Science and History brings together scientists and scholars who are interested in the interaction of their several disciplines as well as in specific problems such as the effects of climate change and other environmental factors on historical developments and events the sources of the energy and fuel used in ancient civilizations and the effects of humans on the lands around the Mediterranean The collection balances broad Mediterranean wide studies and tightly focused studies of particular regions in Italy and Jordan *Handbook of Plant Palaeoecology (First edition 2012)* René T. J. Cappers, Reinder Neef, 2012-01-06 Plant palaeoecologists use data from plant fossils and plant subfossils to reconstruct ecosystems of the past This book deals with the study of subfossil plant material retrieved from archaeological excavations and cores dated to the Late Glacial and Holocene One of the main objectives of this book is to describe the processes that underlie the formation of the

archaeobotanical archive and the ultimate composition of the archaeobotanical records being the data that are sampled and identified from this immense archive Our understanding of these processes benefits from a knowledge of plant ecology and traditional agricultural practices and food processing This handbook summarizes the basic ecological principles that relate to the reconstruction of former vegetations and of agricultural practices in particular We hope this book will help palaeobotanists environmental archaeologists and colleagues from related disciplines optimize inferences based on what we could term old style archaeobotany And we hope that our observations will serve as an eye opener and improve future research not only as it is practised in our laboratories but also as it is practised in the field **Kulturgeschichte der**

Biology of Brassica Coenospecies C. Gomez-Campo,1999-07-07 Brassica crop species and their allies Raphanus Sinapis Eruca etc are important sources of edible roots stems leaves buds and inflorescences as well as of edible or industrial oils condiments and forage Many well known names of plants or plant products such as kale cabbage broccoli cauliflower Brussels sprouts kohlrabi Chinese cabbage turnip rape rutabaga swede colza or rapeseed canola mustard rocket etc are directly associated to this botanical group The scientific interest for this botanical group has run parallel to its economical importance and research achievements in our days would have certainly appeared unimaginable only two decades ago As the end of the millenium approaches entirely new fields transformation somatic fusion etc have been added to the classical ones Thus nobody can doubt the opportuneness of this book which combines and presents both the basic and applied biological aspects of the Brassica species

The Competition of Fibres Wolfram Schier,Susan Pollock,2020-04-30 The central issues discussed in this new collected work in the highly successful ancient textiles series are the relationships between fiber resources and availability on the one hand and the ways those resources were exploited to produce textiles on the other Technological and economic practices for example the strategies by which raw materials were acquired and prepared in the production of textiles play a major role in the papers collected here Contributions investigate the beginnings of wool use in western Asia and southeastern Europe The importance of wool in considerations of early textiles is due to at least two factors First both wild as well as some domesticated sheep are characterized by a hairy rather than a woolly coat This raises the

question of when and where woolly sheep emerged a question that has not up to now been resolvable by genetic or other biological analyses Second wool as a fiber has played a major role both economically and socially in both western Asian and European societies from as early as the 3rd millennium BCE in Mesopotamia and it continues to do so in different ways up to the modern day Despite the importance of wool as a fiber resource contributors demonstrate clearly that its development and use can only be properly addressed in the context of a consideration of other fibers both plant and animal Only within a framework that takes into account historically and regionally variable strategies of procurement processing and the products of different types of fibers is it possible to gain real insights into the changing roles played by fibers and textiles in the lives of people in different places and times in the past With relatively rare albeit sometimes spectacular exceptions archaeological contexts offer only poor conditions of preservation for textiles As a result archaeologists are dependent on indirect or proxy indicators such as textile tools e g loom weights spindle whorls and the analysis of faunal remains to explore a range of such proxies and methods by which they may be analyzed and evaluated in order to contribute to an understanding of fiber and textile production and use in the past

Ebla and its Landscape Paolo Matthiae, Nicoló Marchetti, 2016-06-16 The discovery of 17 000 tablets at the mid third millennium BC site of Ebla in Syria has revolutionized the study of the ancient Near East This is the first major English language volume describing the multidisciplinary archaeological research at Ebla Using an innovative regional landscape approach the 29 contributions to this expansive volume examine Ebla in its regional context through lenses of archaeological textual archaeobiological archaeometric geomorphological and remote sensing analysis In doing so they are able to provide us with a detailed picture of the constituent elements and trajectories of early state development at Ebla essential to those studying the ancient Near East and to other archaeologists historians anthropologists and linguists This work was made possible by an IDEAS grant from the European Research Council

Why Europe? Michael Mitterauer, 2010-07-15 Why did capitalism and colonialism arise in Europe and not elsewhere Why were parliamentary and democratic forms of government founded there What factors led to Europe's unique position in shaping the world Thoroughly researched and persuasively argued Why Europe tackles these classic questions with illuminating results Michael Mitterauer traces the roots of Europe's singularity to the medieval era specifically to developments in agriculture While most historians have located the beginning of Europe's special path in the rise of state power in the modern era Mitterauer establishes its origins in rye and oats These new crops played a decisive role in remaking the European family he contends spurring the rise of individualism and softening the constraints of patriarchy Mitterauer reaches these conclusions by comparing Europe with other cultures especially China and the Islamic world while surveying the most important characteristics of European society as they took shape from the decline of the Roman empire to the invention of the printing press Along the way Why Europe offers up a dazzling series of novel hypotheses to explain the unique evolution of European culture
