Occasions Of Identity A Study In The Metaphysics Of Persistence Change And Sameness:

Occasions of Identity André Gallois, 2003 In this exploration of timeless philosophical issues regarding persistence change time and sameness Andre Gallois offers a critical survey of a number of rival views about the nature of identity and change and proposes his own original theory in the face of the prevailing orthodoxy *Issues in Theoretical Diversity* Kristie Lyn Miller, 2007-05-01 Our world is full of composite objects that persist through time dogs persons chairs and rocks But in virtue of what do a bunch of little objects get to compose some bigger object and how does that bigger object persist through time This book aims to answer these questions but it does so by looking at accounts of composition and persistence through a new methodological lens It asks the question what does it take for two theories to be genuinely different and how can we know whether what seems like metaphysical disagreement is really just semantic disagreement By offering a framework within which to explore issues of theoretical diversity this book provides a novel way of thinking about the inter relationship between composition and persistence Ultimately it argues for a new way of thinking about these issues a way that does not preserve the standard theoretical dichotomies between four dimensionalist theories on the one hand and three dimensionalist theories on the other

At the Sources of the Twentieth-Century Analytical Movement , 2022-05-20 The volume contains works showing the comprehensive contribution of Kazimierz Twardowski the founder of the Lvov Warsaw School to the European analytical movement The readers of the volume will learn among other things how the theoretically fertile distinction between act and product introduced by Twardowski turned out to be Furthermore this volume illustrates the importance of Twardowski s defense of alethic absolutism Finally readers will learn about the conceptual tools developed by Twardowski enabling the explanation of the phenomenon of still lingering prejudices as well as Twardowski s conception of rationality and about his attitude towards formal and informal logic as well as logical education An undoubted novelty of the volume is that it provides a kind of parametrization of Twardowski s continuously increasing position in global philosophy by referring to the complete bibliography of works by and on Twardowski in European languages other than his native language up until 2020

Personal Identity Georg Gasser, Matthias Stefan, 2012-11-15 We take it for granted that a person persists over time when we make plans we assume that we will carry them out when we punish someone for a crime we assume that she is the same person as the one who committed it Metaphysical questions underlying these assumptions point towards an area of deep existential and philosophical interest In this volume leading metaphysicians discuss key questions about personal identity including What are we How do we persist and Which conditions guarantee our identity over time They discuss whether personal identity is complex whereby it is analyzable in terms of simpler relations such as physical or psychological features or whether it is simple namely something that cannot be analyzed in terms of more fundamental relations Their essays offer an innovative discussion of this topic and will be of interest to a wide readership in metaphysics

Oxford Studies in Metaphysics Volume 13 Karen Bennett, Dean W. Zimmerman, 2023-01-24 Much of the most interesting

work in philosophy today is metaphysical in character Oxford Studies in Metaphysics is a forum for the best new work in this flourishing field OSM offers a broad view of the subject featuring not only the traditionally central topics such as existence identity modality time and causation but also the rich clusters of metaphysical questions in neighbouring fields such as philosophy of mind and philosophy of science Besides independent essays volumes will often contain a critical essay on a recent book or a symposium that allows participants to respond to one another's criticisms and questions Anyone who wants to know what's happening in metaphysics can start here

[The Structure of Objects](#) Kathrin Koslicki, 2008-04-17 The objects we encounter in ordinary life and scientific practice cars trees people houses molecules galaxies and the like have long been a fruitful source of perplexity for metaphysicians The Structure of Objects gives an original analysis of those material objects to which we take ourselves to be committed in our ordinary scientifically informed discourse Koslicki focuses on material objects in particular or as metaphysicians like to call them concrete particulars i.e. objects which occupy a single region of space time at each time at which they exist and which have a certain range of properties that go along with space occupancy such as weight shape color texture and temperature The Structure of Objects focuses in particular on the question of how the parts of such objects assuming that they have parts are related to the wholes which they compose

[Dictionary of World Philosophy](#) A. Pablo Iannone, 2013-04-15 The Dictionary of World Philosophy covers the diverse and challenging terminology concepts schools and traditions of the vast field of world philosophy Providing an extremely comprehensive resource and an essential point of reference in a complex and expanding field of study the Dictionary covers all major subfields of the discipline Key features Cross references are used to highlight interconnections and the cross cultural diffusion and adaptation of terms which has taken place over time The user is led from specific terms to master entries which provide valuable historical and cultural context Each master entry is followed by at least two suggestions for further reading on the subject creating a substantial bibliography of world philosophy References extend beyond philosophy to related areas such as cognitive science computer science language and physics Subdisciplines covered include aesthetics ethics sociopolitical philosophy the philosophy of law epistemology logic the philosophy of science the philosophy of mind the philosophy of culture and history metaphysics the philosophy of religion Entries are drawn from West Africa Arabic Chinese Indian Japanese Jewish Korean Latin American Maori and Native American philosophy including the important and so far largely neglected instance of Pre Hispanic thought Nahua philosophy

Composition as Identity A. J. Cotnoir, Donald L. M. Baxter, 2014-08-07 Composition is the relation between a whole and its parts the parts are said to compose the whole the whole is composed of the parts But is a whole anything distinct from its parts taken collectively It is often said that a whole is nothing over and above its parts but what might we mean by that Could it be that a whole just is its parts This collection of essays is the first of its kind to focus on the relationship between composition and identity Twelve original articles written by internationally renowned scholars and rising stars in the field argue for and against the controversial doctrine that

composition is identity An editor's introduction sets out the formal and philosophical groundwork to bring readers to the forefront of the debate

Vagueness, Logic and Ontology Dominic Hyde, 2016-02-17 The topic of vagueness re-emerged in the twentieth century from relative obscurity It deals with the phenomenon in natural language that manifests itself in apparent semantic indeterminacy the indeterminacy for example that arises when asked to draw the line between the tall and non tall or the drunk and the sober An associated paradox emphasises the challenging nature of the phenomenon presenting one of the most resilient paradoxes of logic The apparent threat posed for orthodox theories of the semantics and logic of natural language has become the focus of intense philosophical scrutiny amongst philosophers and non philosophers alike Vagueness Logic and Ontology explores various responses to the philosophical problems generated by vagueness and its associated paradox the sorites paradox Hyde argues that the theoretical space in which vagueness is sometimes ontologically grounded and modelled by a truth functional logic affords a coherent response to the problems posed by vagueness Showing how the concept of vagueness can be applied to the world Hyde's ontological account proposes a substantial revision of orthodox semantics metaphysics and logic This book will be of particular interest to readers in philosophy linguistics cognitive science and geographic information systems

Fundamentals of Ontological Commitment Paolo Valore, 2016-01-15 Scientific literature on particular themes in ontology is extremely abundant but it is often very hard for freshmen or sophomores to find a red thread between the various proposals This text is an opinionated introduction a preliminary text to research in ontology from the so called standard approach to ontological commitment that is from the particular point of view that connects ontological questions to quantificational questions It offers a survey of this viewpoint in ontology together with their possible applications through a broad array of examples and open problems and at the same time essential references to the classics of philosophy so as to allow non specialists to understand the terms and analysis procedures characterizing the discipline Its result is a wide ranging overview of the issues tackled by ontology with a particular focus on the most relevant problems of contemporary debate categorial taxonomies nonexistent objects case studies of ontological debates in specific fields of knowledge

Vagueness and Thought Andrew Bacon, 2018 Vagueness is the study of concepts that admit borderline cases the property of being bald is vague because there are people who are neither definitely bald nor definitely not bald The epistemology of vagueness concerns the sorts of attitudes we ought to have towards propositions we know to be borderline Is it possible to discover whether a borderline bald man is bald Could two people with access to the same facts reasonably disagree about whether he is bald Does it matter when making practical decisions whether he is bald By drawing on such considerations Andrew Bacon develops a novel theory of vagueness in which vagueness is fundamentally a property of propositions and is explicated in terms of its role in thought On this theory language plays little role in explaining the central puzzles of vagueness Part I of the book outlines some of the central questions regarding the logic and epistemology of vagueness and criticizes some extant approaches to them Part II concerns

issues in the epistemology of vagueness touching on the ramifications of vague thoughts on the study of evidence ignorance desire probability theory and decision theory By examining the effects of vague information on one's beliefs about the precise a positive theory of vagueness is proposed Part III concerns the logic of vagueness including the interaction between vagueness and modality vague identity and the paradoxes of higher order vagueness Bacon suggests that some familiar philosophical notions including the concept of a fundamental proposition a possible world and a precisification need to be revised

The World-Time Parallel A. A. Rini, M. J. Cresswell, 2012-01-19 The only book to investigate the parallel between what happens at other times and what happens in other possible worlds

International Law and Time Klara Polackova Van der Ploeg, Luca Pasquet, León Castellanos-Jankiewicz, 2022-12-16 This book explores the close complex and consequential yet to a large extent implicit relationship between international law and time There is a conspicuous discrepancy between international law's technical preoccupation with the mechanics of temporal rules and the absence of more foundational considerations of how time both as an irrepressible physical dimension manifesting in the passage of time and as a social construct shaped by diverse social and cultural factors impacts and interacts with international law Divided into five parts and 21 chapters this book explores key aspects of the relationship between international law and time and puts the spotlight on time's fundamental significance for international law as a legal order and as a discipline Pursuing diverse approaches to international law the authors consider the notion significance manifestations uses and implications of time in international law in a wide range of contexts and offer insights into the various ways in which international law and international lawyers cope with time both in terms of constructing narratives and in devising and employing particular legal techniques

The Antipodean Philosopher Graham Robert Oppy, Graham Oppy, Nick Trakakis, 2011-01-01 This volume presents an accessible and engaging collection of essays by prominent Australasian philosophers covering a wide array of topics and drawn from a series of public lectures on Philosophy in Australia and Zealand convened over a period of four years The essays explore the rich philosophical past of Australasia while also illustrating why philosophy in Australasia ranks highly in influence and esteem

The Antipodean Philosopher Graham Oppy, N. N. Trakakis, Lynda Burns, Steven Gardner, Fiona Leigh, 2011-02-22 Philosophy in both Australia and New Zealand has been experiencing for some time now something of a golden age exercising an influence in the global arena that is disproportionate to the population of the two countries To capture the distinctive and internationally recognised contributions Australasian philosophers have made to their discipline a series of public talks by leading Australasian philosophers was convened at various literary events and festivals across Australia and New Zealand from 2006 to 2009 These engaging and often entertaining talks attracted large audiences and covered diverse themes ranging from local histories of philosophy in particular the fortunes of philosophy in Melbourne Sydney Brisbane Adelaide and New Zealand to discussions of specific topics including love free will religion ecology feminism and civilisation especially as these have featured in the Australasian philosophy and to examinations of the

intellectual state of universities in Australasia at the beginning of the twenty first century These talks are now collected here for the first time to provide not only students and scholars but also the wider community with a deeper appreciation of the philosophical heritage of Australia and New Zealand

Mereology and Location Shieva Kleinschmidt,2014 A team of leading philosophers presents original work on theories of parthood and of location Topics covered include how we ought to axiomatise our mereology whether we can reduce mereological relations to identity or to locative relations whether Mereological Essentialism is true different ways in which entities persist through space time spacetime and even hypertime conflicting intuitions we have about space and what mereology and propositions can tell us about one another The breadth and accessibility of the papers make this volume an excellent introduction for those not yet working on these topics Further the papers contain important contributions to these central areas of metaphysics and thus are essential reading for anyone working in the field

Soul, Body, and Survival Kevin Corcoran,2018-08-06 How are soul and body related to one another Are human beings immaterial souls or complex physical organisms Will we survive the death of our bodies Does only the dualist view allow the possibility of life after death This collection brings together cutting edge research on the metaphysics of human nature and the possibility of post mortem survival Kevin Corcoran s collection *Soul Body and Survival* includes chapters from those who embrace traditional soul body dualism those who assert person body identity and those who propose entirely new views that fall outside the categories of monism and dualism The first book to connect the metaphysics of persons with the belief in life after death thus intersecting with theological as well as philosophical inquiry it blurs the divide between metaphysics and the philosophy of mind

Particulars, Actuality, and Identity over Time, vol 4 Michael Tooley,2013-10-08 Volume 4 in the 5 volume series titled *Analytical Metaphysics* The essays in this volume are concerned with three main issues First what account can be given of the nature of a particular Second is identity over time a basic and irreducible relation or can it be analysed If so what is the correct analysis Third what account can be offered of what it is to be actual The final account of this volume involves the claim that actuality is a special property that is possessed by one and only one possible world
