Quaternary History Of The Irish Sea:

The Quaternary History of the Irish Sea C. Kidson, Michael John Tooley, 1977 **The Quaternary History of the Irish Sea** Kidson, 1980-01-01 *The Irish Sea* John C. Sweeney, 1989 **British and Irish Archaeology**, 1994 *A New History of the Isle of Man: Evolution of the natural landscape* Richard Chiverrell, Dr. Geoff Thomas, John Belchem, Seán Duffy, Harold Mytum, 2000-01-01 This volume provides a fascinating account of the natural forces which shaped the Island's landscape from its formation some 500 million years ago to the present nature of the Manx environment and landscape The story of the island's colonisation by plants and animals sets the scene for the later volumes which deal with the impact of man's arrival A key element of the volume is an in depth examination of the contemporary landscape with an appraisal of how the environment has affected man and how man has affected the environment **The Quaternary History of Ireland** Kevin J. Edwards, William P. Warren, 1985 **Geological History of Britain and Ireland** Nigel H. Woodcock, R. A. Strachan, 2009-04-01 Britain Ireland and their surrounding areas have a remarkably varied geology for so small a fragment of continental crust This region contains a fine rock record from all the geological periods from Quaternary back to Cambrian and a less continuous but still impressive catalogue of events back through nearly 2500 million years of Precambrian time This protracted geological history would have been interesting enough to reconstruct if it had been played out on relatively stable continental crust However Britain and Ireland have developed instead at a tectonic crossroads on crust traversed intermittently by subduction zones and volcanic arcs continental rifts and mountain belts The resulting complexity makes the geological history of this region at once fascinating and perplexing Geological History of Britain and Ireland tells the geological story of the region at a level accessible to undergraduate geologists as well as to postgraduates professionals or informed amateurs The book takes a multi disciplinary rather than a purely stratigraphical approach and aims to bring to life the processes behind the catalogue of historical events Full coverage is given to the rich Precambrian and Early Palaeozoic history as well as to later events more relevant to hydrocarbon exploration The book is profusely illustrated and contains guides to further reading and full references to data sources making it an essential starting point for more detailed studies of the regional geology All British Earth science undergraduates will be required to spend some time studying British Geological History and this book will be the only one available to British undergraduates The book takes a process based approach rather than simply describing the regional stratigraphy Lavishly illustrated with high quality diagrams

Pleistocene Environments in the British Isles R.L. Jones, D.H. Keen, 2012-12-06 Recent developments in Pleistocene research have prompted the authors to produce this up to date concise account of environmental changes during the past two million years Well illustrated and referenced it possesses a unique position in the literature on Pleistocene events in the British Isles *Bibliography of the Quaternary History of Irish Sea Coasts* International Union for Quaternary Research. Subcommission on Shorelines of Northwestern Europe, 1977 **Studies in the Vegetational History of the British Isles**,

Saltmarshes J. R. L. Allen, K. Pye, 1992-04-09 Seven scientists present an overview of the effects on saltmarshes that are threatened by natural and human events

The Climatic Scene Michael J. Tooley, Gillian M. Sheail, 2019-10-30 Originally published in 1985 this volume of essays was compiled in honour of Gordon Manley a major and distinctive twentieth century figure in climatology The range and scope of the topics covered reflect the eclectic interests of Manley whose orientation was always towards the importance of climate and its impact on mankind The state of the art of climatic change is considered at different scales by the contributors from instrumental records on a local scale from Durham and Manchester to discussions on the regional and continental scale Methodological problems relating to climatic change are treated The effects of climate and climatic change on plant distribution disease vectors and agricultural pests are also considered

The Isle of Man Vaughan Robinson, Danny McCarroll, 1990-01-01 This book drawing on wide experience of the Isle of Man describes interprets and explains the features that make the Island's physical and human landscapes so distinctive and give it a unique sense of place Although the editors have taken a strongly geographical approach to their theme the book is unparalleled in writings on the Isle of Man in the broad range of contributions it has assembled geology quaternary science geomorphology archaeology history natural history political science demography social policy and economics The book definitively reviews current geographical knowledge relating to the Isle of Man bringing together hitherto fragmented scattered and inaccessible work Particular emphasis is placed upon the way in which geographers are returning to their intellectual roots with a renewed focus on both the distinctiveness and sense of place By helping readers to understand the processes that formed and continue to change the Isle of Man's unique physical and human landscapes this book aims both to inform and to enhance enjoyment of the Island

Fluvial Geomorphology of Great Britain K.J. Gregory, 2012-12-06 Fluvial Geomorphology of Great Britain studies the development of river made land forms together with the associated fluvial processes There are many sites of scientific interest and value throughout the UK The GCR sites described in this volume represent the wide range of fluvial land forms in the UK and the accounts provide scientific descriptions of all the fluvial geomorphology sites in Britain selected for statutory nature conservation as SSSIs

The Geomorphology of North-west England Richard Hugh Johnson, 1985

In Sight of the Suture N. H. Woodcock, 1999 In Sight of the Suture is the first overview of the pre Carboniferous geology of the Isle of Man since the 1960s It will be of prime interest to research workers in the geology of the Caledonian Appalachian orogenic belt to sedimentologists interested in deep marine processes and to petroleum geologists focusing on exploration in the Irish Sea
