Que Son Los Alimentos Transgenicos:

Alimentos transgenicos / Transgenic Food Julio Muñoz Rubio, 2004-10-30 Uno de los temas más polémicos derivados de las investigaciones en biotecnología es el de los llamados alimentos transgénicos. Las grandes posibilidades que se encuentran en la fabricación de nuevas variedades de alimentos a partir de la manipulación genética de los organismos han sido ensalzadas por los impulsores de tales tecnologías quienes defienden su punto de vista planteando que en el futuro inmediato estos organismos pueden ser una herramienta poderosa que ayude a reducir el hambre en el mundo sin embargo frente a estos puntos de vista fuertes oposiciones se han levantado en amplias regiones del mundo por parte de ecologistas campesinos y el movimiento contra la globalización todos han denunciado los peligros a la salud y al ambiente que dichos alimentos conllevan y han denunciado el papel que las grandes compañías transnacionales están jugando al buscar imponer sus intereses económicos en todo el mundo y destruir las formas autóctonas de cultivo y aprovechamiento de los alimentos. Es prácticamente la primera vez que se logra reunir en un solo libro las contribuciones de la mayoría de los principales estudiosos del problema de los alimentos transgénicos en México desde académicos hasta miembros de organizaciones no gubernamentales. En él están representadas las diversas posiciones que al respecto se están manifestando en nuestro país. Su lectura resultará estimulante para todo aquel interesado en esta problemática sea un especialista o no. La intención al editarlo es hacer comprensible para una amplia gama de sectores sociales esta interesante polémica. Este libro tiene como antecedente el ciclo de mesas redondas Alimentos transgénicos. Un problema y una solución desde la interdisciplina organizado por el Centro de Investigaciones Interdisciplinarias en Ciencias y Humanidades de la UNAM en noviembre de 2002. Aspectos científicos, jurídicos y éticos de los transgénicos Juan Ramón Lacadena, 2001 La utilización de plantas y alimentos transgénicos ha suscitado recelo y temor en la sociedad por sus posibles peligros ecológicos y bio sanitarios. Por otro lado la utilización de animales transgénicos en experimentación también puede plantear problemas importantes. Dada la preocupación de Javier Gafo por los temas biotecnológicos no es de extrañar que eligiera este tema para el debate anual de la Cátedra de Biotecnología. **Producción y**

Inconciencia de la ciencia Acosta, Alberto, Martínez, Esperanza, 2014-02-28 La prohibición del uso de transgénicos de nuestra Constitución de Montecristi es un gran logro en contra de una de las agresiones más claras al acceso a semillas. Son muchas las preocupaciones alrededor de los transgénicos pero la mayor de ellas es que restringen y distorsionan el ciclo de la vida que de una semilla nazca una planta que con sol y agua produzca una nueva semilla. Los transgénicos son una verdadera amenaza no solo a la salud, el ambiente y el patrimonio genético de nuestra biodiversidad. Son sobre todo una amenaza económica para los agricultores. No es verdad que se genere a través de los transgénicos un incremento de la productividad. Es una falacia que los transgénicos ayuden a los pequeños productores o que con ellos se pueda triplicar o cuadruplicar la producción agrícola. Más bien sucede todo lo contrario. Los transgénicos generan mayor concentración de la tierra, no ayudan a aumentar la producción y restan puestos de empleo en el sector rural.

Derecho al consumidor ¿Sabes lo que comes? Rosmery Barrantes, 2019-06-01 El presente libro desarrolla el tratamiento del etiquetado de los alimentos y su relación con los organismos vivos modificados tanto en Perú como en México desde el enfoque normativo. También se aborda cuál es la relevancia del etiquetado del alimento en el mercado para que éste cumpla con su debida descripción y la estipulación constitucional se alada con anterioridad. Asimismo se tiene como finalidad que el Estado cumpla de manera efectiva con el principio de transparencia y el principio precautorio respetando también la política pública de proteger la salud y seguridad de los consumidores a través de una normativa apropiada y actualizada promoviendo la creación de normas reglamentarias para la producción y comercialización de productos fiscalizando su cumplimiento a través de los organismos competentes y garantizando el derecho a la información de los consumidores.
