Intimacies and Family Life reveals the subjective histories of lesbian intimacy during the period both highlighting the huge variety in women's experiences and tracing shifting patterns of relationship and family formation. Combined with analysis of representations of lesbian intimacy in literature, press articles, medical texts and archival material, the book demonstrates the ways in which changing political and cultural concepts of sexuality impacted on individual and collective attitudes. With a unique transnational perspective, Jennings uncovers how feminist and lesbian networks between Britain and Australia promoted knowledge sharing and helped foster change in the familial practices of each country, such as through the adoption of reproductive technologies and alternate routes into motherhood. Through considering the rise of divorce and challenges to traditional marriage practices in the period, this book highlights how lesbian relationships provided alternative models of interpersonal relations, impacting on broader patterns of sexuality and helping to redefine notions of the family in the modern era.

The Drug Effect Suzanne Fraser, David Moore, 2011-09-05. *The Drug Effect: Health, Crime and Society* offers new perspectives on critical debates in the field of alcohol and other drug use. The Routledge Companion to the Suburbs Bernadette Hanlon, Thomas Vicino, 2018-09-03. *The Routledge Companion to the Suburbs* provides one of the most comprehensive examinations available to date of the suburbs around the world. International in scope and interdisciplinary in nature, this volume will serve as the definitive reference for scholars and students of the suburbs. This volume brings together the leading scholars of the suburbs, researching in different parts of the world, to better understand how and why suburbs and their communities grow, decline and regenerate. The volume sets out four goals: 1 to provide a synthesis and critical appraisal of the historical and current state of understanding about the development of suburbs in the world; 2 to provide a forum for a comprehensive examination into the conceptual, theoretical, spatial and empirical discontents of suburbanization; 3 to engage in a scholarly conversation about the transformation of suburbs that is interdisciplinary in nature and bridges the divide between the Global North and the Global South; and 4 to reflect on the implications of the socioeconomic, cultural and political transformations of the suburbs for policymakers and planners. *The Routledge Companion to the Suburbs* is composed of original scholarly contributions from the leading scholars of the study of how and why suburbs grow, decline and transform. Special attention is paid to the global nature of suburbanization and its regional variations, with a focus on comparative

analysis of suburbs through regions across the world in the Global North and the Global South Articulated in a common voice the volume is integrated by the very nature of the concept of a suburb as the unit of analysis offering multidisciplinary perspectives from the fields of economics geography planning political science sociology and urban studies **Queerying Planning** Petra L. Doan, 2016-05-23 Current planning practices have largely neglected the needs of the Lesbian Gay Bisexual and Transgender LGBT community for safe urban spaces in which to live work and play This volume fills the gap in the literature on the planning and development of queer spaces and highlights some of the resistance within the planning profession to incorporate gay and lesbian concerns into the planning mainstream Planning lags behind other disciplines concerned with queer urban issues In contrast the field of geography has developed a rich sub specialty in the geographies of sex and gender that examines spaces and the variety of non heteronormative populations that inhabit them This volume brings together both planners and geographers with experience in planning to examine some of the fundamental assumptions of urban planning as they relate to the LGBT community The first few chapters are substantial revisions and expansions of earlier influential work on planning for non conformist populations and the preservation of LGBT neighborhoods Subsequent chapters comprise original contributions that draw on the rich literature from queer theory planning theory and the geography of sexualities to explore the ways that nonconformist populations struggle with heteronormative expectations embedded in planning theory and procedures These chapters consider the intersection of planning and a range of populations including transgendered and gender variant individuals Subsequent chapters examine the ways that variations in the scale of urban and regional governance influence local politics around the implementation of more equitable policies at the city level In addition several chapters critically examine the implications of using the tolerance component of Richard Florida s creative cities arguments The final section consists of two chapters that explore the ways that urban planning regimes have been used to regulate sexually oriented businesses and the way this regulation of sexualized spaces has implications on the heteronormativity of plans and planners In summary these chapters interrogate planning practice and pose questions for academic and professional planners about the ways that the queer community and its needs for spaces have shifted What do those changes mean for the practice of planning 40 years after the North American Stonewall rebellion and looking forward to the next 40 years To what extent does existing planning practice constrain the evolution of queer communities or seek to commercialize such spaces to the benefit of large developers and the detriment of marginalized members of the community How might planning practice change to provide more direct support to the evolution of queer people and the spaces in which they live This volume draws on these insights as well as the experiences of the various authors to lay out possible future directions for the field of planning to create truly inclusive urban areas **Acts of Love and Lust** Lisa Featherstone, 2014-10-02 The past six decades have seen astonishing changes in the construction of sexuality as an apparatus of knowledge and as a lived experience Australia like much of the West has undergone a veritable sexual
