Quest For Power Hobbes Descartes And The Emergence Of Modernity:

The Quest for Power Piotr Hoffman, 1996 This work examines two thinkers who can lay claim to be the founding fathers of modern philosophy Hobbes and Descartes Although worlds apart on some issues both thinkers take the same point of departure Hobbes in political and moral philosophy and Descartes in epistemology and metaphysics

Dichotomy of Power Richard A. Matthew, 2002-01-01 Dichotomy of Power studies the future of the nation state as the world's basic political organization and the foundation of modern international relations Richard A Matthew argues that this Hegelian construct once championed as the rational and preferred basis for global order developed through a series of dichotomies the cut and thrust of realism mediated by idealism coercive power politics balanced by a constitutive mode of power and a collaborative search for a just society The book analyzes the conceptualization of the nation state in the Western tradition of political thought from the classical bifurcation of politics to the postmodern debate about the nation state as the ideal mechanism for organizing power in a new global age

The Force of Reason and the Logic of Force R. Lee, 2004-08-20 The Force of Reason and the Logic of Force investigates the concept of force through various episodes in the history of philosophy The author argues that force arises on the basis of the distinction of reality and mere appearance The book looks at figures who reduce force to something other than itself as well as figures who develop a logic of force that allows them to trace the operation of force without such a reduction

Violence Inevitable Rick Parrish, 2006-01-01 Taking persons as the creators of meaning and value in the world Violence Inevitable explores the inevitability of violence within any system of justice and examines the paradoxes that lie at the core of justice itself These themes are illuminated through original and interwoven readings of Jacques Derrida Friedrich Nietzsche Thomas Hobbes Isaiah Berlin and other important figures from ancient Chinese spirituality to contemporary American politics

What Moves Man Annette Freyberg-Inan, 2012-02-01 The realist theory of international relations is based on a particularly gloomy set of assumptions about universal human motives Believing people to be essentially asocial selfish and untrustworthy realism counsels a politics of distrust and competition in the international arena What Moves Man subjects realism to a broad and deep critique Freyberg Inan argues first that realist psychology is

incomplete and suffers from a pessimistic bias Second she explains how this bias systematically undermines both realist scholarship and efforts to promote international cooperation and peace Third she argues that realism s bias has a tendency to function as a self fulfilling prophecy it nurtures and promotes the very behaviors it assumes predominate human nature Freyberg Inan concludes by suggesting how a broader and more complex view of human motivation would deliver more complete explanations of international behavior reduce the risk of bias and better promote practical progress in the conduct of international affairs

A Polite Exchange of Bullets Stephen Banks,2010 Explores why minor slights to certain kinds of gentlemen led to duels in order for honour to be satisfied and how such ideas about honour changed over time This book the most comprehensive study of the English pistol duel yet undertaken examines what it meant to be a man of honour in eighteenth and nineteenth century England A thorough survey of the incidence and distribution of duelling both socially and geographically identifies those sub groups of gentlemen most likely to duel The author considers the mores and manners of such groups and asks why it was that within specific professions minor slightscould only be requited by a demand for satisfaction In doing so the author rejects those traditional histories of duelling which have failed to engage with the internal dynamics and internal logic of the phenomenon itself Too often historians have explained the rise of opposition to duelling in terms of social and cultural change whilst at the same time treating the duel as though its ideological content had become irrevocably fixed in the early seventeenth century Honour culture too had a social and an intellectual history and the author outlines those conflicts of ideas within the culture of honour itself that did much to hasten the demise of the English duel *A Polite Exchange of Bullets* will be welcomed as a fresh approach to an important social phenomenon by all those interested in duelling and in English social and cultural history STEPHEN BANKS is a lecturer in criminal law at Reading University Law School and co director of The Forum of Legal and Historical Research

Spinoza's Modernity Willi Goetschel,2004-01-15 Spinoza's Modernity is a major original work of intellectual history that reassesses the philosophical project of Baruch Spinoza uncovers his influence on later thinkers and demonstrates how that crucial influence on Moses Mendelssohn G E Lessing and Heinrich Heine shaped the development of modern critical thought Excommunicated by his Jewish community Spinoza was a controversial figure in his lifetime and for centuries afterward Willi Goetschel shows how Spinoza's philosophy was a direct challenge to the theological and metaphysical assumptions of modern European thought He locates the driving force of this challenge in Spinoza's Jewishness which is deeply inscribed in his philosophy and defines the radical nature of his modernity The Meanings of Love Bob Wagoner,1997-05-21 This introductory text offers a clear concise look at the philosophy of love The author's presentation assumes no previous knowledge of philosophy providing the humanities student with an insightful introduction to some of the most prominent writers and philosophers both ancient and modern From the dialogues of Plato to the writings of feminist philosopher Luce Irigaray Wagoner presents six major ideas of love erotic love Christian love romantic love moral love love as power and mutual love This study asserts that even though we have only one word for love six fundamentally different meanings can be distinguished erotic love Christian love romantic love moral love love as power and mutual love Wagoner identifies each of these ideas of love in terms of the special meaning it brings to experience No one meaning is comprehensive Each is shown to have a logic and legitimacy of its own Why each view seems real and compelling is the focus of separate discussions as well as the price that may be exacted by each idea The extent to which these ideas throw light on actual experience is striking but the book is not an empirical or psychological inquiry How one self finds itself in another is first defined and then explored further to see how this shapes the rational and sexual aspects of life Religarnos Elías González Gómez,2023-01-25 La crítica a la religión se ha convertido en un lugar común Abundan tanto las denuncias a sus abusos históricos e institucionales como las propuestas que apelan por una espiritualidad sin religión De lo que no se ha hablado suficientemente es de su papel en la crisis civilizatoria Este libro denuncia la dimensión religiosa de la crisis actual Desvela la religión como el monopolio radical que secuestra las capacidades personales y colectivas para relacionarnos con el Misterio enajenándonos de la realidad en aras de un proyecto de mundo puramente artificial El autor se aleja en su análisis tanto de las religiones institucionalizadas como de los rostros de la espiritualidad asimilada por el mercado Busca la recuperación de la relación personal y comunitaria con la misteriosidad de lo real a través de la amistad y el retorno a los sentidos *History and Modernity in the Thought of Thomas Hobbes* Robert P. Kraynak,1990 **Liminality and the Modern** Bjørn Thomassen,2016-05-06 This book provides the history and genealogy of an increasingly important subject liminality Coming to the fore in recent years in social and political theory and extending beyond its original use as developed within anthropology liminality has come to denote spaces and moments in which the taken for granted order of the world ceases to

exist and novel forms emerge often in unpredictable ways Liminality and the Modern offers a comprehensive introduction to this concept discussing its development and laying out a conceptual and experiential framework for thinking about change in terms of liminality Applying this framework to questions surrounding the implosion of non spaces the analysis of major historical periods and the study of political revolution the book also explores its possible uses in social science research and its implications for our understanding of the uncertainty and contingency of the liquid structures of modern society Shedding new light on a concept central to social thought as well as its capacity for pushing social and political theory in new directions this book will be of interest to scholars across the social sciences and philosophy working in fields such as social political and anthropological theory cultural studies social and cultural geography and historical anthropology and sociology
