

Responsibility, liability, and professional indemnity insurance—security v. design quality?

This report of the Council debate on Thursday 26 March 1987 has been prepared by Raydon Flett FRSA. It is published on being at readers' attention the thought of Council members on these important, topical issues. The President has made proposals to Council on the action to be taken as a result of the debate, a resolution report of which will be placed in the Library in due course.

The Editor welcomes readers' views on the topics debated.

Introduction

The current situation as regards professional engineers' responsibility, professional liability, and the options available for PI insurance, were discussed at a recent meeting of the Institution's Council, also attended by some invited guests. Some new factors, such as the impact of the Latest Damage Act 1986, were also considered.

The discussion was introduced by the President, Professor Hapgood, who summarised the main problems. Peter Blackburn, of Bore Hapgood, and Jim Armstrong (Vice-President), of BOP, identified some problems faced by professional practices and John Ward, of Shute & Company, gave a solicitor's view, based on his firm's long experience of PI claims.

Different alternatives for insurance cover were described. Mr Alan Kiggins, of Christian & Armour, summarised the principal points of the present system of insurance, held by most firms. Mr Brian Shaw described the options for single project insurance, and Mr Brian Glass, of London Remuneration Owners Mutual Insurance Ltd., told of the experience from other industries of mutual funds, which are becoming more prevalent also in construction.

Professor Donald Bishop, Chairman of the Building & Civil Engineering BOP's Insurance Feasibility Committee, described the findings of his survey and some of the tentative conclusions reached, which give new matter for discussion prior to being put forward formally.

David Cowen, an eminent former lawyer, summarised the discussion, accepting that his views might be coloured by the fact that the lawyers were only just going home.

The meeting generated a very lively discussion, with extremely important issues debated. Some of these are summarised below.

Professional duties and some current problems

The basic yardstick by which competence or negligence may be judged is usually the need to exercise the reasonable skill and care to be expected from a competent engineer. This is also the requirement in the ACEE Preamble of Agreement which are widely used by consulting engineers to define their responsibilities.

The view of the lawyers at the meeting was that, for small firms, engineers must take responsibility, but that they may be too ready to accept added responsibilities from clients through added contract clauses.

The hazards of litigation are considerable and, in the view of most engineers, they are increasing. Design teams involving more companies with a wider choice of methods, materials, and components. Greater size is necessary to keep up with such changes and also to keep abreast of the increasing number of people involved in the process, all of them generating information and papers. All these factors have added to the risk of an error and possible litigation. This extra effort required of designers is in total conflict with the aims of many clients, and particularly public clients, in seeking for low competition and therefore a reduction of design input and even redress for error. If there is a defect, someone is guilty!

Extended responsibilities

Considerable pressure is often exerted on engineers by their clients, or their clients' lawyers, to extend their responsibilities. This provision of special contractual requirements from public and private clients and their lawyers is costly to legal fees and the time required to have them expertly assessed.

Typically, clients increasingly ask for a duty of care to third parties or other third parties. Such contracts can be extremely long, following American trends, and often aim to extend the engineer's responsibilities—for example, by asking for letters of opinion. A standard shorter contract agreed by clients and engineering bodies would be of great benefit to both factors and consultants, even if not to lawyers.

The law of contribution

The law of contribution is an area of special hazard. It means that where there is a shared responsibility for a defect, one perhaps quite a small share, the service is a court case may find that he has to pay for 50% of the claim when other, perhaps more negligent, parties have agreed to trade or are unavailable. Lawyers see little chance of changing this law, as any change would probably be seen by the courts as no longer being even-handed between the client and his professional advisers or contractors. Politically lobbying on this issue may then be a waste of energy.

The Latest Damage Act

The 1986 Latest Damage Act is a new factor. It does not affect contractual claims, limiting itself to negligence and claims in tort. It contains a long-stop whereby such claims cannot be brought after 11 years. The risk may be that the long-stop will be seen as the means for action. Greater claims in contribution whereby a party found negligent

can not other parties, claims could actually extend to rather longer periods. Such claims would start after the initial settlement, i.e. 11 years plus 1 year, plus the time taken to reach a finding. It would therefore be necessary for consultants to keep records for perhaps 20 years. This may be thought to go against one intention of the new Act—to avoid stale claims. The Latest Damage Act also specifically includes willful misconduct from the long-stop. In the past, willful misconduct has been claimed by actions for matters clearly not intended to be fraudulent, such as concealment of reinforcement in concrete. The first action since the new Act is due to be judged in the near future, and may give guidance how courts will in future interpret such concealment.

Limiting liability

Most consultations will work as partnerships. Limitation may be limited to law, at least slightly, by forming a limited company. There are, however, problems in this. If clients believe that they run greater risks, they will probably ask for indemnities or performance bonds as they already do from contractors. Partnerships may also offer tax benefits. Each firm must therefore explore its own situation.

There may be opportunities to limit liability through the contract between client and consultant.

For off-site supervision it may be possible for designers to obtain an indemnity from the contractor responsible for the works, but this is of value only while the contractor is operating. The client may also wish to be sure that his chances of redress are not reduced.

It is, however, essential to avoid drawing up a contract which, if not even-handed, would then be treated by the courts as null and void. It may therefore be easier to define responsibilities and prescribe them than actually to exclude them in a contract.

Questions on the duties of designers of calculations and designs were inconclusive, but evidently firms will need to ensure that personal liability by their employees is covered within a firm's insurance policy where individually signed certificates are issued.

Continuing duty to warn

The recent Ashbridge judgment was seen as a particular new hazard, as it seems to extend the need for consultants to warn a client for old projects about any hazard since discovered. In practice, this could mean a total review of every job ever designed, to cost new research findings or other information indicates them to be at risk.

The case highlighted some difficulties. Does a policy cover death or injury due to negligent design? Is some other policy covering risk to third parties? If not, there is a risk that the Courts, wishing to

Quest For Quality An Engineers View On Responsibility And Liability

Quest For Quality An Engineers View On Responsibility And Liability Introduction

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In today's fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Quest For Quality An Engineers View On Responsibility And Liability PDF books and manuals is the internet's largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. The availability of free PDF books and manuals on this platform demonstrates its commitment to democratizing education and empowering individuals with the tools needed to succeed in their chosen fields. It allows anyone, regardless of their background or financial limitations, to expand their horizons and gain insights from experts in various disciplines. One of the most significant advantages of downloading PDF books and manuals lies in their portability. Unlike physical copies, digital books can be stored and carried on a single device, such as a tablet or smartphone, saving valuable space and weight. This convenience makes it possible for readers to have their entire library at their fingertips, whether they are commuting, traveling, or simply enjoying a lazy afternoon at home. Additionally, digital files are easily searchable, enabling readers to locate specific information within seconds. With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture of continuous learning. By removing financial barriers, more people can access educational resources and pursue lifelong learning, contributing to personal growth and professional development. This democratization

of knowledge promotes intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free Quest For Quality An Engineers View On Responsibility And Liability PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal boundaries, ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources available. In conclusion, the availability of Quest For Quality An Engineers View On Responsibility And Liability free PDF books and manuals for download has revolutionized the way we access and consume knowledge. With just a few clicks, individuals can explore a vast collection of resources across different disciplines, all free of charge. This accessibility empowers individuals to become lifelong learners, contributing to personal growth, professional development, and the advancement of society as a whole. So why not unlock a world of knowledge today? Start exploring the vast sea of free PDF books and manuals waiting to be discovered right at your fingertips.

FAQs About Quest For Quality An Engineers View On Responsibility And Liability Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Quest For Quality An Engineers View On Responsibility And Liability is one of the best book in our library for free trial. We provide copy of Quest For Quality An Engineers View On Responsibility And Liability in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Quest For Quality An Engineers View On Responsibility And Liability. Where to download Quest For Quality An Engineers View On Responsibility And Liability online for free? Are you looking for Quest For Quality An Engineers View On Responsibility And Liability PDF? This is definitely going to save you time and cash in something you should think about.
