Electrical Review and Western Electrician with which is Consolidated Electrocraft ,1915 *Parameterized Complexity* Rodney G. Downey, M.R. Fellows, 2012-12-06 The idea for this book was conceived over the second bottle of Villa Maria s Cabernet Medot 89 at the dinner of the Australasian Combinatorics Conference held at Palmerston North New Zealand in December 1990 where the authors first met and discovered they had a number of interests in common Initially we embarked on a small project to try to formulate reductions to address the apparent parameterized intractability of DOMINATING SET and to introduce a structure in which to frame our answers Having spent several months trying to get the definitions for the reductions right they now seem so obvious we turned to our tattered copies of Garey and Johnson s work 239 We were stunned to find that virtually none of the classical reductions worked in the parameterized setting We then wondered if we d be able to find any interesting reductions Several years many more bottles so many papers and reductions later it seemed that we had unwittingly stumbled upon what we believe is a truly central and new area of complexity theory It seemed to us that the material would be of great

interest to people working in areas where exact algorithms for a small range of parameters are natural and useful e.g. Molecular Biology VLSI design The tractability theory was rich with distinctive and powerful techniques The intractability theory seemed to have a deep structure and techniques all of its own *Graph-Theoretic Concepts in Computer Science* H. Bodlaender, 2003-10-29 This book constitutes the thoroughly refereed postproceedings of the 29th International Workshop on Graph Theoretic Concepts in Computer Science WG 2003 held in Elspeet The Netherlands in June 2003 The 30 revised full papers presented together with 2 invited papers were carefully reviewed improved and selected from 78 submissions The papers present a wealth of new results for various classes of graphs graph computations graph algorithms and graph theoretical applications in various fields **Graph-Theoretic Concepts in Computer Science** Hans L.

Bodlaender, 2003-10-27 The 29th International Workshop on Graph Theoretic Concepts in Computer Science WG2003 was held in the Mennorode conference center in Elspeet The Netherlands

The workshop was organized by the Center for Algorithmic Systems of the Institute of Information and Computing Sciences of Utrecht University The workshop took place June 19-21 2003 The 72 participants of WG 2003 came from universities and research institutes from 18 different countries and five different continents The workshop looks back at a long tradition It was first held in 1975 and has been held 20 times in Germany twice in Austria and once in Italy Slovakia Switzerland and the Czech Republic and has now been held for the third time in The Netherlands The workshop aims at uniting theory and practice by demonstrating how graph theoretic concepts can be applied to various areas in computer science or by extracting new problems from applications It is devoted to the theoretical and practical aspects of graph concepts in computer science The goal is to present recent research results and to identify and explore directions of future research The talks given at the workshop showed how recent research results from algorithmic graph theory can be used in computer science and which graph theoretic questions arise from new developments in computer science *FST TCS 2000:*
