Questions Of Competence Culture Classification And Intellectual Disability:

Questions of Competence Richard Jenkins, 1999-02-04 This collection argues for a new conceptualization of intellectual disability that stresses its cultural variability and social construction and deemphasizes its medicalized physiological nature. It is aimed at disability specialists in social anthropology, sociology, social policy, and psychology and at the broader health medical anthropology audience. It is novel and radical in its treatment of intellectual disability not purely as an inherent property of individuals but also as a social phenomenon.

Questions of Competence Richard Jenkins, 1998 This book offers a conceptualisation of intellectual disability emphasising its cultural variability and social construction.

Psychiatry of Intellectual Disability Across Cultures Regi Alexander, Samuel Tromans, Satheesh Kumar Gangadharan, Chaya Kapugama, Sabyasachi Bhaumik, 2024 An insightful addition to the Oxford Cultural Psychiatry series. *Psychiatry of Intellectual Disability across Cultures* explores the health support structures and societal attitudes towards people with intellectual disabilities throughout the world.

Handbook of Developmental Disabilities Samuel L. Odom, Robert H. Horner, Martha E. Snell, 2009-01-21 This authoritative handbook reviews the breadth of current knowledge about developmental disabilities: neuroscientific and genetic foundations, the impact on health, learning, and behavior, and effective educational and clinical practices. Leading authorities analyze what works in intervening with diverse children and families from infancy through the school years and the transition to adulthood. Chapters present established and emerging approaches to promoting communication and language abilities, academic skills, positive social relationships, and vocational and independent living skills. Current practices in positive behavior support are discussed, as are strategies for supporting family adaptation and resilience.

Interrogating Disability in India Nandini Ghosh, 2016-09-13 This book discusses the multifaceted concept of disability in the context of India. Through analyses of theoretical propositions of disability in South Asia and empirical explorations of the lives of persons with disabilities in India, this book not only brings to the forefront a hitherto unexplored realm in academic discourse but also bridges the gap between theory and lived reality and between policy and practice. Thus, it is an important addition to the field of development studies in South Asia. The papers herein represent multidisciplinary and interdisciplinary perspectives from architects, lawyers, sociologists, political scientists, historians, economists, and linguists to social work practitioners from the grassroots level. This range of insights from different disciplines allows for the exploration of a wide range of issues around disability and the lives of disabled people, moving from theoretical assumptions to exploring structural and infrastructural barriers to problematizing different aspects of the lives of disabled people and from objective realms to more subjective domains. Along with students and researchers of disability studies, this book is of interest to a diverse readership encompassing the social sciences, mental health, and development studies.

Managing Uncertainty Richard Jenkins, Hanne Jessen, Vibeke Steffen, 2005 The overall focus of this book is the ways humans deal with life conditions with destiny, uncertainty, and misfortune: how we try to control the risks of living through medicines, technologies, and magic.

When dealing with questions of health and illness rational solutions and meaningful explanations may be hard to find and treatment efforts are often guided just as much by hope as by rational choice Evaluating the risks of illness is just one of a number of ways in which human beings attempt to exert some sense of control over their lives New methods of testing for illness and new developments in for example genetic screening and in vitro fertilisation combined with the growing demands of well informed patients seem to have turned concern from the actual problems of specific diseases toward controlling life and the risks of living in general The chapters of this book reflect a common effort to transgress the limits of the medical by drawing on a fundamental concern with the logic of social and cultural practice The book represents a de medicalization of medical anthropology and a return to some of the classic themes in anthropology but with a different approach emphasizing subjectivity intentionality and agency

A Guide to Psychological Understanding of People with Learning Disabilities Jenny Webb, 2013-07-31 Who are the people we describe as having learning or intellectual disability Many clinical psychologists working in a mental health setting are now encountering people with learning disabilities in some cases for the first time This book provides the background information and understanding required to provide a basis for a truly inclusive and effective service for people with learning disability In A Guide to Psychological Understanding of People with Learning Disabilities Jenny Webb argues that we need a new clinically based definition of learning disability and an approach which integrates scientific rigour with humanistic concern for this group of people who are so often vulnerable to misunderstanding and marginalisation Psychological approaches need to be grounded in an understanding of historical theoretical and ethical influences as well as a body of knowledge from other disciplines The Eight Domains is a simple but holistic method for information gathering while The Three Stories is an integrative model of formulation for use in relation for those people whose needs do not fit neatly into any one theory Divided into three sections the book explores Understanding the context Understanding the person eight domains Making sense three stories This book provides an invaluable guide for trainee clinical psychologists and their supervisors and tutors working with adults with learning disability It will also be valuable for clinical psychologists working in mainstream settings who may now be receiving referrals for people with learning disability and want to update their skills
