An Introduction For Kids Wouldn't it be fun to find out more about what your father or mother was like when he or she was a kid Or get to tell your parents which of their friends you think looks dorkiest Wouldn't conversation be more interesting if you and your family traded unexpected questions and answers at dinner rather than just talked about what homework did or didn't get done There are a lot of great things to talk about that no one ever brings up because we usually think conversation is serious rather than a way of being playful Of course conversation should be about serious things some of the time some of the questions in this book are about very serious topics But other times questions should be asked just to create new ways to think about things look back on our lives or imagine what life would be like if we could design in any way we wanted In fact I wrote this book because I think talking can be terrific fun and even talking to your parents and brothers or sisters can be a kind of great game Everyone can get to know each other and laugh a lot and be amazed from time to time No one wins or loses but there is an element of surprise in finding out personal information about parents and sharing some of your ideas daydreams and opinions with them My idea is to think of some of the world's most interesting questions that parents and kids could talk about and give everyone the chance to pick the ones they'd like to hear about Each person picks a question to ask and then answers a question when his or her turn comes around All you have to do is choose from the list under 201 Questions to Ask Your Parents and ask any question you want Your parents can take as long or as short a time they want to answer Any you can all discuss the topic if you like But then they go into their section of the book and ask you questions Some of them might not be so interesting but others like asking you who is the meanest kid you know might be cool to think about and share with them They'll learn a lot about what you think are ways kids act nasty You can wiggle out of any two questions that don't interest you or are embarrassing but no more than that It's good if a question makes you squirm a little that means you either haven't thought about it before or you have but you haven't wanted to deal with it But why not try out and answer Pick a set length of time to play for and my guess is you'll want to extend it These questions get addictive You can play them at the dinner table or after dinner or on a car trip or anytime you feel like hearing what your parents say about something So this is a book about how to

have interesting and often funny conversations with your family. It's a way to avoid dead boring silences and fill the time instead with questions and answers that everyone will enjoy thinking about. I know that in my family it is too easy for us to get stuck talking about practical things like who has to be taken where the next day. That isn't particularly fun. It doesn't let me in on what my kids are thinking and it doesn't help my two teenagers learn things that might help them understand me a little better. 117 Questions to Ask Your Kids Instead of Asking "How Was Your Day?" Ann R. Sutton, 2018-12-23. Do you find it difficult to start a long conversation with your kid after a day at school? Do you always meet a dead end when trying to know about your kids' thoughts, emotions, and wants? These conversation starters are proven to stimulate real conversation where kids will feel well cared for and parents will be satisfied to know more about their kids' state of mind and their activities in school. With such weaknesses are being detected, a parent will easily know what to emphasize when it comes to teaching a kid a new skill. Also, these questions have been experimented in honing kids' social intelligence where the stimulation of thoughts, disposition, and perception will take place in kids. Your kid will learn how to talk about themselves, learn effective listening skills, express themselves in groups, and be able to ask the right questions in class. The overall shyness and social anxiety common in most kids can be eliminated using the conversational strategies. Since practice makes perfect, a kid will learn how to open up about what they feel without the need to be timid or doubtful about other people's reaction. Ultimately, they will grow into confident adults, responsible and down to earth. With over 117 questions, your conversation will never be boring. You can blend any of the questions during dinner or even while they are playing. Since kids' mental ability can be

determined through the answers to these questions you will easily know when to allow them to assume certain responsibilities around the house when to just let go of a particular control and when to warn them about social vices and peer pressure
