Renewing Philosophy:

Renewing Philosophy Hilary Putnam, 1995-08-11 Hilary Putnam one of America's most distinguished philosophers surveys an astonishingly wide range of issues and proposes a new clear cut approach to philosophical questions a renewal of philosophy He discusses topics from artificial intelligence to natural selection *Renewing Philosophy*, 2002 **Space, Time and Culture** David Carr, Chan-Fai Cheung, 2012-11-03 Interculturality has been one of key concepts in phenomenological literature It seeks to clarify the philosophical basis for intercultural exchange within the horizon of our life world The essays in this volume focus on the themes around space time and culture from the perspectives of Chinese and Western phenomenologists Though the discussions begin with classical phenomenological texts in Husserl Heidegger or Merleau Ponty they extend to the problems of Daoism and Buddhism as well as to sociology and analytic philosophy The collection of this volume is a fruitful result of inter cultural exchange of phenomenology Managing Self-renewal in Secondary Education William Jay Bailey, 1975 Pragmatism Russell B. Goodman, 2020-11-25 Russell Goodman examines the curious reemergence of pragmatism in a field dominated in the past decades by phenomenology logic positivism and deconstruction With contributions from major contemporary and classical thinkers such as Cornel West Richard Rorty Nancy Fraser Charles Sanders Peirce and Ralph Waldo Emerson Russell has gathered an impressive chorus of philosophical voices that reexamine the origins and complexities of neo pragmatism The contributors discuss the relationship of pragmatism and literary theory phenomenology existentialism and the work of Ralph Waldo Emerson They question the meaning of pragmatics what it is to be practical and ask provocative questions such as what is reading and whether democracy is a precondition for the functioning of intelligence This work places this reemergent and interesting neo development in its proper context and will provide readers with a strong sense of the movement's foundations history and subtleties

Neurophilosophy of Free Will Henrik Walter, 2009-01-23 Walter applies the methodology of neurophilosophy to one of philosophy's central challenges the notion of free will Neurophilosophical conclusions are based on and consistent with scientific knowledge about the brain and its functioning Neuroscientists routinely investigate such classical philosophical topics as consciousness thought language meaning aesthetics and death According to Henrik Walter philosophers should in turn embrace the wealth of research findings and ideas provided by neuroscience In this book Walter applies the methodology of neurophilosophy to one of philosophy's central challenges the notion of free will Neurophilosophical conclusions are based on and consistent with scientific knowledge about the brain and its functioning Walter's answer to whether there is free will is It depends The basic questions concerning free will are 1 whether we are able to choose other than we actually do 2 whether our choices are made intelligibly and 3 whether we are really the originators of our choices According to Walter freedom of will is an illusion if we mean by it that under identical conditions we would be able to do or decide otherwise while simultaneously acting only for reasons and being the true originators of our actions In place of this

scientifically untenable strong version of free will Walter offers what he calls natural autonomy self determination unaided by supernatural powers that could exist even in an entirely determined universe Although natural autonomy can support neither our traditional concept of guilt nor certain cherished illusions about ourselves it does not imply the abandonment of all concepts of responsibility For we are not mere marionettes with no influence over our thoughts or actions *Badiou and the German Tradition of Philosophy* Jan Völker,2019-02-07 The oeuvre of Alain Badiou has gained international success and recognition but most of the secondary literature focuses on internal problems of Badiou s philosophy rather than its position within a broader philosophical genealogy This book unites philosophers from Germany Slovenia the UK Australia and France to trace the relation between elements of Badiou s philosophy and the German philosophical tradition namely the three significant movements of German Idealism Phenomenology Marxism and the Frankfurt School This is a discussion that has not yet been established although the parallels and decisive differences between poststructuralist French philosophy and German philosophy are apparent Through these paradigms Badiou s reception of German Idealism Marxism Adorno and the Critical Theory and Heideggerian phenomenology the authors shed light onto Badiou s inheritance of and engagement with these specific traditions but also highlight the links between these philosophies to open up new questions for contemporary continental thought With an original chapter from Alain Badiou himself looking back at his influences and antagonisms within the German tradition this book is essential for readers interested in the exploration of Badiou s legacy It illustrates the continuation of poststructuralist philosophy Critical Theory and the Frankfurt School assessing the place of classic continental philosophy to tackle how we might benefit from these intellectual exchanges today *Logic, Meaning, and Conversation* Jay David Atlas,2005-02-17 This fresh look at the philosophy of language focuses on the interface between a theory of literal meaning and pragmatics a philosophical examination of the relationship between meaning and language use and its contexts Here Atlas develops the contrast between verbal ambiguity and verbal generality works out a detailed theory of conversational inference using the work of Paul Grice on Implicature as a starting point and gives an account of their interface as an example of the relationship between Chomsky s Internalist Semantics and Language Performance Atlas then discusses consequences of his theory of the Interface for the distinction between metaphorical and literal language for Grice s account of meaning for the Analytic Synthetic distinction for Meaning Holism and for Formal Semantics of Natural Language This book makes an important contribution to the philosophy of language and will appeal to philosophers linguists and cognitive scientists **In Dewey's Wake** William J. Gavin,2012-02-01 In a pluralistic tapestry of approaches eminent Dewey scholars address his pragmatic philosophy and whether it should be reinterpreted reconfigured or passed by so as to better deal with the problems posed by the twenty first century For some Dewey s contextualism remains intact requiring more to be amended than radically changed For others his work needs significant revision if he is to be relevant in the new millennium Finally there are those who argue that we should not be so quick to pass Dewey by for he has much to offer that

has still gone unnoticed or unappreciated This rich narrative indicates both where the context has changed and what needs to be preserved and nurtured in Dewey as we advance into the future **Beyond Deconstruction** Alberto

Martinengo,2012-08-31 The controversy over Jacques Derrida's legacy is one of the most effective engines driving the contemporary debate far beyond the bounds of philosophy By now the variety of contesting positions is so wide that it calls for a critical assessment to achieve a unified theoretical scheme The dyad of deconstruction and reconstruction to which the title of the volume refers aims at composing a kind of map of this debate The three sections of the book include essays that investigate specific aspects of Derrida's reception from the view of 1 philosophy 2 literary studies and 3 politics and law These contributions study the implications of deconstruction beyond its original scope and intervene by taking stock of its most relevant aporias Toward a Global Discourse on Religion in a Secular Age Ludwig Nagl,2023-10-31 Do we all today

live in a secular age Examining this open question the book focuses in Part 1 The Re-Emerging Philosophical Discourse on Religion on recent interpretations of human existence in Asian European and American thought Part 2 1 The Weakening of Dogmatic Scientism discusses Wittgenstein's Derrida's Habermas's and Taylor's critiques of abstract modes of Enlightenment Part 2 2 Various Approaches to Religious Faith in Pragmatism and Neo Pragmatism deals with the writings of Peirce James Dewey Rorty West and Putnam and explores the significance of Josiah Royce's thought for contemporary global debates on religious belief Volume 1 Richard Heinrich, Elisabeth Nemeth, Wolfram Pichler, David Wagner, 2013-05-02

What is an image How can we describe the experience of looking at images and how do they become meaningful to us In what sense are images like or unlike propositions Participants of the 33rd International Wittgenstein Symposium philosophers as well as historians of art science and literature provide many stimulating answers Some of the contributions are dedicated to Wittgenstein's thoughts on images while others testify to the important role notions coined or inspired by Wittgenstein seeing as picture games and the dichotomy of saying and showing play in the field of picture theory today This first volume of the Proceedings of the 2010 conference addresses readers interested in the history and theory of images and in the philosophy of Wittgenstein **Naturalism, Realism, and Normativity** Hilary Putnam, 2016-04-11 Hilary Putnam's

writings have shaped epistemology ethics metaphysics philosophy of physics and mathematics and philosophy of mind This volume illustrates his willingness to revisit past arguments above all how to articulate a theory of naturalism which acknowledges that normative phenomena form an ineluctable part of human experience Following Putnam's Trail, 2015-06-29 Following Putnam's Trail addresses Putnam's path through important philosophical problems One outstanding feature of Putnam's philosophy has been his contribution to the development of American pragmatism as well as his many changes of mind when thinking about realism Realism and pragmatism are indeed the central focus of the contributions to the volume The book includes a defence of pragmatism by Putnam himself and several commentaries on it This volume should be of interest both to scholars who specialize in analytical philosophy as well as to those who have a wider interest in

philosophy Hilary Putnam James Conant, Urszula M. Zeglen, 2012-10-02 One of the most influential contemporary philosophers Hilary Putnam's involvement in philosophy spans philosophy of mind philosophy of language ontology and epistemology and logic This specially commissioned collection discusses his contribution to the realist and pragmatist debate Hilary Putnam comments on the issues raised in each article making it invaluable for any scholar of his work Manifesto of a Passionate Moderate Susan Haack, 2000-04 Forthright and wryly humorous philosopher Susan Haack deploys her analytic skills on some of the most highly charged cultural and social debates of recent years Relativism multiculturalism feminism affirmative action pragmatisms old and new science literature the future of the academy and of philosophy itself all come under her keen scrutiny in Manifesto of a Passionate Moderate Haack's goal in these essays is to get beyond fads fashions obfuscations and false dichotomies to the central and most essential questions whether there is such a thing as truth whether honest inquiry is possible or desirable whether there is a real difference between knowledge and propaganda There is Haack argues but serious inquiry is difficult and demanding evidence can be ambiguous or misleading and what passes for truth is sometimes false *Computability* B. Jack Copeland, Carl J. Posy, Oron Shagrir, 2015-01-30 Computer scientists mathematicians and philosophers discuss the conceptual foundations of the notion of computability as well as recent theoretical developments In the 1930s a series of seminal works published by Alan Turing Kurt G del Alonzo Church and others established the theoretical basis for computability This work advancing precise characterizations of effective algorithmic computability was the culmination of intensive investigations into the foundations of mathematics In the decades since the theory of computability has moved to the center of discussions in philosophy computer science and cognitive science In this volume distinguished computer scientists mathematicians logicians and philosophers consider the conceptual foundations of computability in light of our modern understanding Some chapters focus on the pioneering work by Turing G del and Church including the Church Turing thesis and G del's response to Church's and Turing's proposals Other chapters cover more recent technical developments including computability over the reals G del's influence on mathematical logic and on recursion theory and the impact of work by Turing and Emil Post on our theoretical understanding of online and interactive computing and others relate computability and complexity to issues in the philosophy of mind the philosophy of science and the philosophy of mathematics Contributors Scott Aaronson Dorit Aharonov B Jack Copeland Martin Davis Solomon Feferman Saul Kripke Carl J Posy Hilary Putnam Oron Shagrir Stewart Shapiro Wilfried Sieg Robert I Soare Umesh V Vazirani **Illuminating Eco** Charlotte Ross, 2017-03-02 Illuminating Eco covers the range of British scholarship on the prolific literary and theoretical work of Umberto Eco With essays by scholars such as Michael Caesar and David Robey the volume provides an overview of current research being carried out by a new generation of academics In addition it provides an opportunity to view the interaction between Eco's fiction and his theoretical texts and suggests future avenues of research The interdisciplinary nature of the contributions makes this collection accessible to Italianists and non Italian speakers alike

in order to situate Eco's work in the wider literary and critical sphere Contributions have been divided into four sections with the first containing essays that engage with Eco's writing through a strong awareness of the reading strategies suggested and required by his texts The second section is composed of essays that discuss different approaches to interpretative strategies including the relationship between Eco's theoretical writing and his own fiction The third part consists of new responses to Eco's work each of which questions previous theoretical interpretations and creates new applications for established approaches Finally the fourth section contains a written response from Eco himself to some of the questions raised by these essays and a translation of the final chapter from his most recent publication *Sulla letteratura* which discusses the development of his narrative works from conception to execution
