Joachim Ahman,2011-12-05 Most of us do not immediately think of health protection measures as trade barriers Yet to the trade liberalization interest they are often exactly that hidden protectionism some would say When the conflict between trade and health hardens into a confrontation allocation of the burden of proof becomes the critical factor in determining the outcome And the outcome of such a WTO dispute may affect a very large number of people This important book examines the WTO provisions applicable to health protection measures from a burden of proof perspective with an up to date and thorough analysis of all relevant case law It clearly demonstrates and explains the following and more how burden of proof decisions following from the burden of proof concept as it has developed in national legal systems and in general international law may favour or disfavor different interests the problems that may occur when risk related facts have to be proved how the legal facts in the WTO provisions specifically regulating the adoption of health protection measures have been interpreted in case law and how the burden of proof concept can be used to balance the conflicting interests in ways other than those used so far No other source offers such a comprehensive analysis of WTO provisions applicable to health protection measures This book s burden of proof perspective makes it an especially valuable resource for trade law experts WTO member representatives

and interested NGOs seeking to understand and discuss the balancing of health protection and trade liberalization
